The organization of retailers, and I may state right here that the Hardwaremen are in the front ranks in the movement, into local, State and National associations is a step in the evolution of a readjustment of conditions that are changing. Concerted action was evidently needed when individual efforts had been in vain, and there can be no doubt of the fact that the work is slowly bearing fruit. It has thrown down the barriers of competitive enmity, and established a fraternal feeling of good fellowship between dealers who, in the meetings, really became aware of the fact that the outside encroachments they had to contend with as a body amounted more to each one than the competition of his neighboring dealer.

CO-OPERATIVE BUYING.

It was with perhaps a hazy idea of the importance of the work that the Chicago Association first took up the plan of buying together. It has, so to speak, developed itself until its effects are farther reaching than the casual observer would suspect. For instance, a few years ago, when the department stores began to loom up, a towering menace to the smaller dealers, and the best of us could hardly take other than a pessimistic view of the matter, in the conviction that we would all be crowded out, we had no argument to offer. People seemed to come and trade with us more as a neighborly favor than anything else. If they did not say it in so many words one could almost read the thought in their faces, that the downtown stores, buying, as they did, in immense quantities, could sell cheaper than we, but, as we did pretty well for little fellows, they would sacrifice a little for our sake. Let them come now, and we can make a convincing statement, when we tell them that we belong to an association of Hardware merchants who buy their goods in a lump,

and thus get the best price that the market affords. Before they leave us we have started the wheel spinning in our favor. Ten chances to one in talking with friends they will hit on this very theme during the conversation.

#### INCREASES CONFIDENCE IN PRICES.

Furthermore, co-operative buying gives each individual member greater confidence in his prices. He knows that his neighbor and his neighbor's neighbor all pay the same price that he does, and that the price must be just about right, because it was obtained in the open market in fair competition. He can, therefore, ask a fair profit and stick to it, without the fear that he may have paid more than the market value for the article, in case a customer came in quoting some catch ad. price.

It has taken most earnest and painstaking efforts on the part of past workers to bring the system to where it now is, in the Chicago Association, and it hardly receives the concerted support that it should even yet; neither is the whole matter handled with the discretion that should be given it by the individual members. Manufacturers will always be chary about giving out prices and concessions, only to have the same made public property of. All merchants should be aware of this fact, but it will require a whole lot of coaching yet before some of our members learn the value of prudence in this respect.

At the close of the reading of Mr. Peppler's paper, Mr. McLaughlin asked Mr. Porter, the treasurer, whether he was able to state the amount of money he had saved during the past year by the co-operative buying plan, and the amount of goods that had been bought in this way. Mr. Porter said that during the past year the association had bought \$16,000 worth of goods which could be definitely traced, and on these goods the members of the association had saved from \$3,500 to \$3,700. Besides this, \$16,000 worth of many goods had been delivered directly to dealers by manufacturers and were impossible to follow up.

Z. T. Miller, of Bloomington, was next called on, and he read the following paper on a prophetic subject of which we give a part:

#### WHAT OF THE FUTURE?

At the beginning of the century just closed, when town streets were so dimly lighted with common street lamps that watchmen had to patrol the streets to insure safety to pedestrians between the lamps, when competent time pieces were a scarcity and daily forecasts of weather from Government signal stations were undreamed of, watchmen cried out the hour of the night and the condition of sky and weather. In those days early morning papers containing 3 a. m. news were not looked for at the front door before breakfast, and it was not an uncommon occurrence in the passing of more than ordinary events for some one to call from open door or window: "Watchman, what of the night?"

#### PROGRESS OF THE CENTURY.

Since that time we have passed from the sickle to the grain cradle, from the grain cradle to reaper, and from reaper to binder. From the lumbering stage coach, the emigrant wagon and the schooner wagon freight trains to the steam railway; from the messenger rider to telegraphy, from slow communication to instantaneous telephonic transmission.

From the country pack peddler to the cross-road store; from the cross-road store to rivalry in business; from friendly rivalry to ruinous competition and a struggle for supremacy in trade.

From the small individual forge to the stock company furnace and rolling mill; from the single stock company enterprise to competitive evils, and from these evils to a pooling of interests, and from a pooling of interests to syndicate ownership.

#### WHAT OF THE FUTURE?

So great was the surprise of every new departure in commerce, and industry, and science, wonderful in their conception, radical in the changes they wrought, so rapid their introduction and so dangerous the economic features associated with some of them, that to-day, with every human energy aroused to duty, and every ambition stimulated by the accomplishments and experiences of the most progressive age in history to continue the march of civilization, we enter upon the duties of the new century with more than colonial-like interest in "What of the night?" and seek to penetrate the darkness for some answer to the thought: "What of the future?"

NEGLIGENCE OF OUR FOREFATHERS.

The flight of time has brought with it overwhelming evidence that the evils feared from the mechanical features of industrial improvement were totally unfounded. If our forefathers had realized the real elements of danger underlying public franchises and had made as great efforts toward incorporating measures preventing the abuse of economic equities by the corporate bodies they created as they did to prevent the mechanical operation of these enterprises, the savings to labor and the Government during the past forty years would be almost beyond computation. Many of the millions of dollars now concentrated into the hands of the few would still be in the pockets of those who produced them, and the spectre of their errors would not haunt and distress society of to-day. The environments of our forefathers, however, put them beyond the pale of serious censure; but we, living in an age of universal education, extensive faciliwe, nying in an age of universal education, extensive facilities for research and investigation, enabled to profit by the experiences of the past, knowing the force of public sentiment in the shaping of our public policies and the better advantage of concentrated effort, are amenable to a stricter censure for the perpetuation of false political economics under which hundreds of millions of dollars are annually artificially proported on families and the state of the sta ficially perverted or forcibly extorted from the producer by these legalized corporations.

#### THE GREATEST DISTURBING ELEMENTS.

Industrial corporations, whether under the name of railroad, or trust, or syndicate, are, without question, the greatest disturbing element in the economic fabric of to-day. have been denounced by some orators, seemingly, without regard to circumstances, or condition, or definite delineation of -the known quantity from which the remedy for the injuryevil they work must evolve.

They have been supported by others with every imaginable and some almost unimaginable—theories of economic evo-They have presented them under the guise of every fruit deriving from the mechanical operation of industrial enterprise, according to their respective purposes, and even socialistic leaders point to them as the twentieth century "John in the Wilderness," proclaiming the near approach of their dreams—a social millenium.

Mr. Miller's address was listened to attentively, and was regarded as being of great interest to the members. convention then took a recess until 8 o'clock, when the meeting was opened to representatives of wholesale houses.

#### THURSDAY MORNING SESSION.

The convention was called to order at 10 a. m. by President Cormick. There were about 150 delegates present, and about 25 new members were received.

L. H. Clark, of Rockford, read an interesting paper on "Local Associations, describing in detail the workings of the Rockford Association. We make several extracts from this address, which was a very practical one, and met the approval of the delegates, the opinion generally prevailing that local associations for the purpose of controlling credits, etc., could be established in all towns and cities to advantage. He spoke substantially as follows:

#### LOCAL ASSOCIATIONS.

Our local association has been in existence but two years, and yet within this period a decided change has been effected in our trade conditions, and this change is due almost entirely to the efforts of our organization. Primarily the main efforts were directed towards an arrangement of reasonable prices upon the various staple lines. From that it has gradually broadened in other directions, and not least to be noted of these is the social feature. The friendly attitude of one dealer for his fellow tradesman has grown rapidly, and a curious fact, but true, nevertheless, is that one feels less keenly a sale lost to a competitor, when one is positive that this competitor is getting a good price for his merchandise

The meetings of our organization are held monthly, unless especially convened, and at these meetings trade conditions are discussed, prices arranged to conform with the markets, and methods are adjusted. Following the meeting, a schedule of prices is prepared by the secretary, and a copy of such schedule is mailed to each member, to be posted for reference and maintenance. The new prices go into effect twenty-four hours after such schedule is adopted.

We have used our organization, too, as an aid in our buying, pooling our orders in certain lines, and thus getting quantity rates that the average individual retail dealer would

not be entitled to. Early closing hours have been established, and all the legal holidays are carefully observed, and our places of business are closed throughout the entire day upon such occasions; and at the present time we are working towards a credit system, whereby we may protect ourselves from the accumulation of bad accounts.

So satisfactory has our local association been in every respect, so much has it done for the individual firm, and so harmonious a condition has it engendered among the members of the trade, that should it become necessary for its maintainance, there is not one of our members but would gladly pay ten times the present yearly dues, rather than see its dissolution.

D. McLaughlin, of Chicago, was next called on, and he read an interesting paper on "Paints" in which he advocated the advantages of handling this valuable line in connection with a successful Hardware business.

An interesting paper on "The benefits of Our Association" was next read by W. T. Gormley, the paper being fully appreciated and meeting with cordial approval.

Discussion among the delegates followed, after which adjournment took place until afternoon.

#### THURSDAY AFTERNOON SESSION.

The Thursday afternoon session was called to order by President Cormick at 2 o'clock, the program being opened with an entertaining philosophical paper by Charles H. Williams, of Powers & Williams, Streator, on the subject of "Mental Equanimity," from which we make a few brief extracts:

When we consider that the best part of our lives is to be devoted to business, we cannot study too carefully how we may make it pleasant as well as profitable. Anyone can attend to a customer's wants when he comes in with a satisfied feeling, and all is serene, but when he comes with a complaint, with his blood riled over some real or fancied grievance, or with the determination to secure a settlement unfair to the dealer, then it is that there is needed the most cool-headed, cool-blooded management. Everybody gets unreasonable sometimes, and upon the way he is handled, when in the vernacular of the day "he had a kick coming," often hinges all future dealings with him. Property and friendship are strengthened, and the town filled with living, walking advertisements improperly, and often lifelong enemies are created. Aside from the profitable side of it, the pleasure of doing business can be greatly augmented by cultivating mental serenity and avoiding mental strain and worry.

I do not mean to be weak and easily imposed upon. Back of all diplomacy and liberal-mindedness of making concessions and allowances, when all other means fail, have a fixidity of purpose, without a bit of passion, to fight for your rights regardless of cost. Don't, however, work and walk the floor nights—make the other fellow do that.

Treat each commercial traveler as you would want to be treated if you were in his place, and it may cost you some evenings of hard work that otherwise might have been finished in the afternoon—but the fact of knowing that you have been a gentleman to each one soliciting your patronage strengthens one in his dealings with his own customers.

I doubt if in any other kind of retailing there is such a mass of detail, both in buying and selling, as in Hardware business. It all tends to bring on nervousness and the attendant disease, crankiness, the most expensive disease a business man can acquire. The means of avoiding these conditions lie within the individual. He should cultivate the society of the successful and the optimistic, and avoid the pessimistic. He should read the writings of cheerful philosophers; realize that the mind must have rest; that while American push is a good thing, thousands on the dead run are wasting the opportunities around them through not stopping to think; that worry weakens and that tension is energy going to waste; that a certain amount of mental relaxation and reverie is the best stimulant for the emergency to follow.

It is often asked why a large proportion of highly educated men fail in business, while the man of lesser educational opportunities succeeds. A plausible explanation is, that the one constantly overtaxes his mind, while the other has learned to rest his and be ready to grasp the business opportunities as they occur.

The committee on resolutions then made a full report, which concluded with the following among other resolutions:

Resolved, That it is the sense of this association that much good will be accomplished by a joint meeting between a committee representing the manufacturers of builders' Hardware and the National Retail Dealers' Association, and we therefore earnestly appeal to the National Retail Hardware Dealers' Association to make the necessary arrangements for such a conference.

D. McLaughlin, chairman of the committee on nominations, made the following report:

#### ELECTION OF OFFICERS.

President—H. G. Cormick, Centralia.

Vice-President-D. Holder, Bloomington.

Secretary-L. H. Clark, Rockford.

Treasurer-F. F. Porter, Chicago.

Executive Committee—H. G. Cormick, Centralia; D. Holder, Bloomington; L. H. Clark, Rockford; F. F. Porter, Chicago; Z. T. Miller, Bloomington; W. T. Gormley, Chicago; H. N. Murphy, Galesburg; Charles Mauer, East St. Louis; R. G. Scheurer, Vandalia; F. W. Siecke, Freeport.

Investigating Committee—G. F. Lott, Chicago; F. Geesing, East St. Louis; L. M. Reeves, Peoria; M. Fahey, Decatur; J. Seeman, Greenfield.

Legislative Committee—W. Gormley, Chicago; D. Refior, Ottawa; D. W. Zumbrock, Springfield; H. T. Bogby, Tuscola; J. A. Hunter, Peoria.

Bloomington was selected as the next place of meeting.

The report of the Finance and Auditing Committee showed that they had examined the books of the secretary and treasurer and found them correct, and continued:

There are something like 1,500 Hardware firms in the State of Illinois who are as yet not enrolled as members in our association, and for the purpose of securing as many additional members, this committee suggests that the chair be instructed to apportion the State into eight districts, more or less, as he deems advisable, and to appoint a solicitor or captain of each district to solicit eligible members to the State association, and for compensation to receive the amount of the fees of each subscriber enrolled.

We also recommend that the official manual of the National Retail Hardware Dealers' Association, together with all advertisements which will be contained in a similar edition, be printed under the direct supervision of the national officers.

#### QUESTION BOX.

At the conclusion of some miscellaneous business, the Question Box was taken up. Among the questions proposed by the delegates were the following:

- 1. Should a retail merchant solicit trade in other towns than his own?
- 2. Is glass a legitimate addition to a retail Hardware store, and what per cent of the trade handles it?
- 3. Should we not make an especial effort to induce jobbers to refrain from selling catalogue houses and department stores?
- 4. On the amount of yearly purchase, what percentage does it cost you to do business?
- 5. Do we favor the complicated manner of stove manufacturers in numbering and naming the stoves, to the detriment of our business in gaining correct name and number for our customers in getting correct repairs?
- 6. Has anything been done in the way of inducing stove manufacturers to confine themselves to six and seven-inch collars?
- 7. Should dealers handle goods manufactured under special jobbers' brands in place of manufacturers' brands?
- 8. Is it right for outside dealers to give an agent orders for stoves or any other articles to his home town for himself or friends?

All of these questions were discussed by the delegates both pro and con. Among those who spoke on the subject were F. F. Porter, of Chicago; Martin Engelhardt, of Chicago, and H. G. Cormick, of Centralia.

The convention adjourned at 4:25 p. m. to meet at Bloomington on the call of the executive committee.

## MO. RETAIL STOVE & HDWE. DEALERS' ASSN.

The fourth annual meeting of the Missouri Retail Stove and Hardware Dealers' Association convened for a two days' session in St. Louis at the rooms of the Mercantile Club, on Tuesday morning, the 18th inst. Over sixty members were present.

#### TUESDAY MORNING SESSION.

President B. F. Naylor called the meeting to order at 10 o'clock, and after extending a welcome to the delegates, proceeded to read his annual address.

Secretary F. M. Neudorff, of St. Joseph, presented his annual report, in which he gave in detail the business attended to during the period that had elapsed since the last meeting.

An address was then delivered by Taylor Frier, of Louisiana, on "Association Loyalty," which proved to be an exceedingly interesting subject, and was listened to with commendable interest. We make a few extracts from the same, regretting our inability to make use of the entire address.

There is an old saying that "In Union there is strength," but if this be true, there must be a proportionate degree of strength in the unit, and no organization can be effective or accomplish its aim that does not possess in its units or individuals the quality or characteristic that produces the desired effect.

If there is any one charactertistic that we Americans, as a nation, take pride in, it is our loyalty—loyalty to country, to flag and the principles it stands for; and there is no accusation that so hurts a true man as to be accused of disloyalty, or of being false and unfaithful. But is it not true that sometimes, because of indifference or ignorance of existing conditions, or even because of our possible inherent selfishness, we appear to lack in our commercial life that element that is so vitally necessary, and that we so admire in other avenues of life—namely, loyalty?

This association stands for certain principles, and we retailers, who constitute its membership, cannot afford, from any cause, to be disloyal or untrue to those principles and its interests.

#### LOYALTY MEANS PERSONAL SACRIFICE.

Loyalty, like any other valuable commodity, usually costs something, and association loyalty may mean personal sacrifice of means and ease and time; but are we going to betray the trust placed upon us and be found wanting because we are afraid of that test of a good soldier or trade-mark of a faithful follower, endurance of hardship, or sacrifice?

## \* \* \* \* \* \* ASSOCIATION DEMANDS HEARTY CO-OPERATION.

But even though association loyalty may demand sacrifice, and does demand hearty co-operation and manly service, by upholding the constitution, which declared that "the manufacturers and jobbers who sell direct to the customer shall not enjoy the patronage of the retailers," does it not also promise abundant reward in the consciousness of duty well done; in the satisfaction that comes to every faithful, loyal spirit who gives his influence and service for the advancement and strengthening of any good cause? And further than this, while we cannot expect to revolutionize business methods in a day, we are certainly, though slowly, gaining ground and are constantly being benefited through association channels; and as we all together stand for right and justice and the establishment of a legitimate dealing in the distribution of Stoves, Hardware, etc., we are bound to accomplish that which we could never have done individually, and which will be of great material benefit to each dealer; and, standing shoulder to shoulder, fighting a common enemy, we will unconsciously, but surely, be brought closer together, and thus, becoming more helpful to one another, we will take our place in the great brotherhood of man. And who can measure the power of the retailer, thus amalgamated for protection and action?

A call was made for the paper of August Steinmeier, of St. Louis, on "Is Co-operation Buying Practical?" which

was on the program for early delivery, but after consideration it was decided to permit this to be presented at a later session.

An extract from the president's report of the National Hardware Association was requested by a vote of the members to be read.

The chair then referred to the subject of the banquet, which was planned in honor of the visitors, and in a brief speech thanked the Association for the honor, expressing the regret, however, that it had been planned, as he felt the visiting delegates were not brought together for entertainment and pleasure, but for hard work, and he was very much afraid that their minds might become distracted from the real object of the convention by an excess of hospitality. He was followed by J. W. Poland, of Carrollton, who also spoke to similar effect. A. F. Geschwinder and F. A. Kansteiner replied to the remarks of the two gentlemen who had just been heard, in a happy and pleasant manner, saying that the plans having been carefully arranged for this event, the local association could not possibly consider the convention complete in all its details without this banquet taking place, as they felt it served to make friendship more lasting and stronger to meet as they would about the festive board.

Taylor Frier proposed that a special invitation be extended for new members. He was followed by J. W. Poland, who also advocated promptness and strict attendance to the sessions during the convention, urging upon the members present not to fail to take an active interest in the general proceedings. The chair fully indorsed these remarks, and hoped that the best results would follow.

Mr. Best, of Palmyra, made a motion that a committee to amend the by-laws be appointed, which motion was carried. The chair named as the committee Messrs. Best, Poland and Kansteiner. Mr. Best then spoke of previous methods of work, and urged that in the future more unity of purpose be contemplated, together with a higher plane of action. After a few more remarks by the president and the various committees on their work, adjournment was taken until 2 p. m.

#### TUESDAY AFTERNOON SESSION.

The convention was called to order at 2.30. An informal discussion followed, in which Frank Mayer, of Macon, and O. W. Johnson, of Marshall, participated. A paper on "The Evolution of the Hardware Business," which proved to be an exceedingly interesting reminiscent review of the evolution of the Hardware business from 1850 to 1901, written by William Kansteiner, of Hannibal, was read by F. A. Kansteiner, of St. Louis. Not desiring to give this interesting address in extracts, we reserve it for publication in full in a future issue of *Hardware*.

The next order of business was the Question Box, which a number of delegates assisted in making of an interesting character. A number of the members present were called upon by the chair for remarks, but from lack of preparation the invitation was in most instances declined.

P. E. Harney, ex-president of the Association, being present, was called upon, and gave a very interesting talk on the manifold benefits to be derived from proper organization. He spoke of the general character and class of buyers that all Hardwaremen have to deal with, and called attention to the disastrous results which spring from the cutting of prices, and how they could be prevented, if only systematic co-operation could be brought about by a more general interest and a more general membership in the present organization.

Chairman Best, of the committee on the revision of the by-laws, was asked for a report, but requested that it be deferred until Wednesday.

The subject of co-operative insurance being brought before the convention, J. M. Kenyon, of Maitland, was introduced, and in a brief address gave considerable information in connection with the Western Retail Implement and Vehicle Dealers Underwriters' Association, of which he was a member, stating that this organization was in a most satisfactory working condition, and he personally gave his endorsement to the fact that a great saving in the matter of his insurance account had resulted. F. A. Kansteiner proposed that the secretary be instructed to send notices to different members asking them if they would be in favor of organizing a Missouri Association for the purposes of co-operative insurance. Considerable doubt was expressed by one or more of the members whether a company could be formed successfully unless it had a backing of at least 200 merchants.

F. B. Haus made a plea for greater vigor in the matter of organization. He gave his views having reference to the enrollment of dealers throughout the State, and said if they will not enroll through the ordinary means of invitation by mail, personal solicitation should be employed in order to get them into line. In this manner the advantages and benefits that would come directly to them from membership in the Association could be more consistently pointed out, and made effective.

A brief address was made by R. W. Shapleigh, of the Norvell-Shapleigh Hardware Co., of St. Louis, and expresident of the National Hardware Association. While he mentioned that he had no regular paper prepared, he said he was well pleased to find so many representatives of the retail dealers of Missouri present, and made a brief address in favor of bringing together all the dealers in the State to discuss methods beneficial to all concerned. He expressed the opinion of the jobbing fraternity that great friendship was invariably felt by wholesalers for organization of this kind, as it enabled the dealers to form a closer and greater friendship for a much higher state of business morality, which results in much more favorable profits, less cutting of prices, and too many advantages in many other ways to be neglected. He extended a hearty welcome to those present, and stated it was their desire to have their stay as pleasant as possible, and their visit to St. Louis on this occasion a profitable one.

Discussion followed as to the best methods of reaching the dealers of the State in order to have them join the Association, and on that particular subject several of the leading delegates participated. J. F. Bannon, of St. Louis, in a brief speech urged that more interest be manifested in the work, and that the necessity for co-operation should be urged upon the members, believing that if the members came together for specified work success would undoubtedly follow. He argued that the Missouri Association started under the most auspicious circumstances, and that it was bound to increase in numbers and be successful in its efforts.

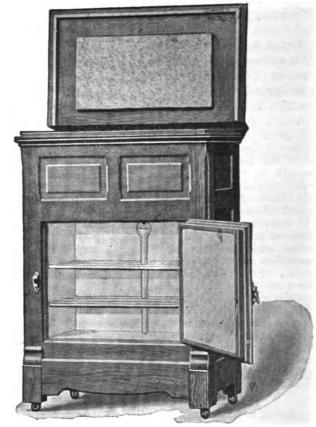

'Mr. Barclay, of the St. Louis Credit Men's Association, then read an important paper, which we regret our inability to give in this issue.

The convention then adjourned to meet later in executive session, the evening being devoted to the banquet to which reference was made in the early part of the convention.

#### Cooper & McKee's Refrigerators.

Cooper & McKee, 113-121 Gwinnett Street, Brooklyn, N. Y., have just issued their most important catalogue of their production of refrigerators and ice chests for the season of 1902. It is fully illustrated and complete in every respect. In it the place of honor is given to their glass-lined refrigerators which were first brought out last season, and

which, the manufacturers state, have proved an unqualified success. These refrigerators have been used extensively in hotels, restaurants and high-class apartment and private houses in the Metropolitan district and also in the cities of the Northern, Eastern, Middle and Southern States with entire satisfaction. The makers claim that these goods represent the acme of high-grade hygienic refrigerators, embodying all the important improvements modern science has devised. They are made of the finest materials. The warm and cold air flues are so arranged that a dry, cold, pure air is always in circulation and the food compartment with its doors is lined with 7-16-inch polished plate glass, all glass being set to glass, with ground edges, so that there is no metal or other material in corners to rust or deteriorate. The

GLASS LINED REFRIGERATOR.

shelving is of aluminum, which will not rust, corrode or tarnish. Cuts of these glass-lined refrigerators in natural colors are presented. They are made in nine sizes and styles.

The new Columbia refrigerators form another leading line to which special attention is directed. Both these lines of refrigerators are filled with "Neptune insulation," which, from its composition, is claimed to lessen compression, increase the storage of dead air and give additional insulation. They are also equipped with the company's new patent siphon, made of heavy japanned cast iron, screwed to the bottom of the refrigerator and so balanced that it is always in position and cannot fall off. Other goods illustrated and described in the present catalogue are Champion hard wood refrigerators, Household refrigerators, refrigerators specially designed for flats and apartment houses, also for delicatessens and restaurants, New Domestic refrigerators and ice chests, grocers' refrigerators and refrigerators for nursery use.

On account of the prevalence of small pox in Des Moines, the City Council deemed it advisable to close all churches and theatres in the city and prohibit public gatherings. In consequence of this state of affairs, the convention of the Iowa Retail Hardware Dealers' Association, which was to have taken place at the Kirkwood Hotel on February 18, 19 and 20, has been postponed.

## WISCONSIN RETAIL HARDWARE ASSN.

The sixth annual convention of the Wisconsin Retail Hardware Association, held at the Republican House, Milwaukee, on the 5th and 6th inst., was the largest and most important convention in its history, there being upwards of 170 dealers present.

#### OPENING SESSION.

The opening session of the convention was held on Wednesday afternoon, over 100 members responding to the roll call. The minutes of the last annual meeting were read, which was followed by the president, John Hessel, of Antigo, delivering his annual address, which we published almost complete in our last issue. Committees were appointed on Transportation, Grievances, Reception, Legislation, Auditing, Question Box and Press.

Secretary C. A. Peck, of Berlin, then delivered his report, which we printed in full in our previous issue. Treasurer George Leverenz, of New Holstein, read his report, which showed a balance on hand of \$1,078.15. The reports of the secretary and treasurer were referred to the Auditing Committee.

In accordance with the printed program, Fred Kusel, of Watertown, was to have delivered a paper on "How to Build Up a Good Retail Business," but he was reported ill and unable to be present.

The report of the committee on the revision of the constitution and by-laws being called for, Vice-president O. P. Schlafer, of Appleton, read the report of his committee, followed by the reading of the revised constitution, which was adopted section by section, one of the important changes being the consolidation of the offices of secretary and treasurer. An additional change, favorably commented upon by the delegates, was that which permanently provided for the holding of the annual meetings at Milwaukee.

The election of officers should have followed, being on the program for Wednesday afternoon, but on motion it was postponed until Thursday morning. The Question Box being announced as ready for questions from the delegates present, the following interesting questions were furnished by those present:

When will traveling men cease to spread their samples on top of a nice japanned reservoir?

Is it advisable in towns of less than 1,000 population to push the sale of hot air furnaces instead of heating stoves?

How can we best get our sons interested in the Hardware business with us?

Is there any reason why we should not form an insurance association in Wisconsin?

What size of squaring machine is best to buy for a country shop?

What is a good pointer for a remittance blank?

Why are the retailers obliged to carry freight on stoves until the invoices are paid?

How many have seen a window glass list from manufacturers to jobbers?

How can you tell how much you make each day as a merchant?

Mr. Peck explained his method. He keeps a cash book and puts down every sale, at the same time putting down the cost in another column. At night the difference between the two columns shows the profit. This is open to the criticism that clerks, of course, must know what the goods cost.

#### THURSDAY MORNING SESSION.

Immediately upon convening the election of officers was

taken up. As no Committee on Nominations had been appointed, it was decided advisable to make nominations from the floor. There was practically no contest for any of the officers, so a single ballot served to record the will of the convention, which resulted as follows:

PRESIDENT, O. P. Schlafer, Appleton.

VICE-PRESIDENT, Leonard Findeisen, Green Bay.

SECRETARY-TREASURER, C. A. Peck, Berlin.

EXECUTIVE COMMITTEE: J. Kornely, Milwaukee, and E. H. Ramm, New London, each for two years; Andrew Noll, Chilton, and H. L. McNamara, Janesville, each for one year.

The Question Box discussion was again taken up, and the following questions were added:

How can we protect our interests against employes not true to our interests?

Do you pay for goods that come damaged and you do not accept?

What is the best way to mark the cost of goods? Do you add selling expense, and if so, what percentage of cost?

Ought the retailers buy goods of the jobber or manufacturer who also drums the local retail trade?

All of these questions when presented resulted in more or less discussion by the members present, varied in character, and from which considerable information was gained. The question of "Ought the retailer buy goods of the jobber or manufacturer who also drums the local retail trade?" brought out for reply an extremely unanimous "no."

#### INTERSTATE COMMERCE.

E. P. Bacon, former president of the Milwaukee Chamber of Commerce, addressed the convention, urging action to be taken in support of national legislation which should confer on the Interstate Commerce Commission such authority as would enable it to carry the purpose of the act creating it. Mr. Bacon was given a vote of thanks at the conclusion of his address.

#### NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION.

A verbal report was then made by President Schlafer having reference to the meeting of the National Association in Chicago last March, which he attended as delegate, and considerable interesting information was communicated to the convention relative to the practical work being done, and the desirable results accomplished by the National body. M. L. Corey, of Argos, Ind., secretary of the National Retail Hardware Dealers' Association, being present, was introduced, and he took the opportunity of making an extremely interesting address on the subject of the work of his association, submitting what were considered strong arguments in favor of the Wisconsin Association taking an active part in the affairs of the National body. The address by Mr. Corey resulted in a number of members speaking in favor of the work of the National Association, and on motion, a standing vote was taken on the question of joining, the convention voting unanimously in favor of such action.

#### PRESIDENT SCHLAFER RETURNS THANKS.

President Schlafer not having had, as he claimed, opportunity previously to thank the association for the honor conferred upon him in electing him president, addressed the convention, and made a very enjoyable speech, in which he showed not only his appreciation of the honor, but also his appreciation of the fact that a deep responsibility appertained to the position, and he earnestly urged all the members present to assist him in advancing the honorable objects for which they are united.

Mr. Tietjen made a brief speech in favor of the employment of an organizer to be specially engaged in organizing local associations. He stated as his opinion there were some towns where the local merchants not being on good terms with one another, it was difficult to bring about the co-operation of the dealers in a matter so essential to their future prosperity. He thought a disinterested person could more readily harmonize their views and succeed in adding them to the members of the association. The matter of appointing an organizer was, however, left over for the present.

#### THURSDAY AFTERNOON SESSION.

The secretary read a communication dated January 31, received from Robert F. Bell, Weatherford, Texas, the secretary-treasurer of the Texas Hardware Jobbers' Association, in which he called attention to a number of questions that were being agitated by the retailers and wholesalers, which he hoped the present convention would take into consideration, the settling of which Secretary Corey, of the National Association, affirmed could be more easily accomplished by bringing personal influence to bear upon the Congressmen from each man's own Congressional district.

H. L. McNamara then read an interesting paper on "The Relations of Traveling Men to Retailers," from which we make the following extracts:

THE TRAVELING SALESMAN IN RELATION TO THE RETAILER.

The traveling salesman stands in several relations to the retailer, and not the least important of these would seem to be his friendship for him in giving him every point of advantage. As a rule there is a motive behind this too obvious to need mention. He is working for his own good while doing good to others, and certainly this is in accordance with good Christian doctrine. The house that employs the salesman doesn't think much of this doctrine, however. The house is apt to consider the doctrine quite unchristian, and sometimes harbors and even gives expression to rather un-Christian thoughts.

Aside from all pleasantries, however, the traveling salesman has one distinctive function to perform in his vocation, and this function is pre-eminently of an educational character. The traveling agent is an educator, and his most important and efficient work must lie in that direction.

To assume that the sales agent is sent out merely to be on hand when the retailer happens to be out of something would make of him just an errand boy, and to go a step further and say that he is sent out to keep competitors from monkeying with customers would still hardly justify the expense. To be sure, the expense is eventually borne by the retailer, and he in turn gets it out of the consumer. But the point is, couldn't the retailer send in his orders to the house, or any house, by mail, if it were simply a matter of ordering what he is out of, and save time and expense? Certainly he could. The agent then would have no particular office to perform.

The fact is, however, that the agent's business is not merely that of collector of orders for goods that the retailer is out of or that he needs for a season's supply. Left to himself, neither the retailer nor the consumer would ever change styles or enlarge the variety of purchases.

At the conclusion of the address, which was listened to with considerable interest, the secretary-treasurer was authorized on motion to pay the dues to the National Association out of the general fund.

Secretary Corey, of the National Association, stated that over a thousand letters had been written by the National Association on the subject of manufacturers and jobbers listing their goods to catalogue houses at prices which the retailers could meet. He deemed it to be impossible to prevent sales by manufacturers to catalogue houses, but that it was perfectly proper to ask that they place a restriction on the prices at which the goods are to be sold. This is a lawful transaction, and when a manufacturer makes a sale with such a stipulation it binds the party who buys from him not to sell under the stipulated price. The National Association is working with the Jobbers' Association to secure its co-operation with the retailers. The jobbers recognize the fact that all sales made by catalogue houses are an injury

to them, because the goods thus sold pass through neither the jobbers' nor the retailers' hands.

A general discussion then followed as to the manner in which the competition of catalogue houses could be met. It was generally agreed that if it was possible to see a consumer who was considering the purchase of goods from a catalogue house, it would be an easy matter to convince him that he could purchase the same class of goods from the local dealer at the same, and possibly a lower price, taking into consideration the freight and express charges. The only trouble is to know when parties are considering such purchases.

Secretary Peck then read a paper prepared by H. C. Scofield, of Sturgeon Bay, who was unable to be present. The paper was on the subject of "Care, Management and Display of Retail Hardware," and proved to be one of great interest to all the delegates present, it being a subject that no doubt had interested them individually on many occasions.

Mr. Scofield and Mr. McNamara were given a vote of thanks for their papers read before the convention, and the usual vote of thanks was also given to the retiring officers.

The president and secretary were elected delegates to attend the meeting of the National Association in Chicago on March 12.

Vice-President Findeisen then took the chair, as President Schlafer was obliged to retire to attend another engagement; the reports of committees were called for and the report of the Committee on Resolutions was adopted without dissent. The Auditing Committee reported that the books of the officers had been examined and found correct. The convention then adjourned sine die.

The attendance of the members displayed a greater amount of interest than any previous convention of the Association, as they were all apparently prepared to enter fully into the spirit of the occasion, and make full use of their opportunities. It was greatly to the advantage of the convention that they were able to have with them M. L. Corey, of Argos. Ind., because Mr. Corey is so full of the subject of the importance of the State Associations belonging to the National body, that he has no hesitation in making a forcible and influential address on an occasion like this having that object in view. Every effort was made to interest the delegates, invitations of all kinds being extended to them, which were cheerfully availed of, many jobbers and manufacturers contributing to this positive evidence of their belief in the advantages of conventions of this character. Many souvenirs were distributed by representatives of the manufacturers who were present, and the dealers found that preparations had been made in a number of instances for exhibits of the products of a number of manufacturing concerns, and by wholesale houses having representatives present, which made things pleasant for those in search of information regarding the goods displayed.

#### Keystone Wash Boiler Handle.

Berger Bros. Co., Philadelphia, are placing upon the market the Keystone Wash Boiler Handle, which we illustrate herewith. This handle is evidently a very strong one, and is fully guaranteed by the manufacturers. The metal

IMPROVED WASH BOILER HANDLE.

parts are handsomely tinned to prevent any possibility of rust, and the appearance of the boilers where these handles are used is very attractive. It has been deemed advisable to market these goods at a price which will be found quite low considering the high quality and fine finish. It is made in two styles, one for round and the other for square end boilers. Tinware manufacturers are invited to correspond with the company for further particulars, when, if desired, a free sample will be mailed for inspection.

## INDIANA RETAIL HARDWARE ASSOCIATION.

The third annual convention of the Indiana Retail Hardware Dealers Association was held at the Denison Hotel, Indianapolis, the opening session being called to order by President W. P. Lewis, of New Albany, at 11 a. m.

#### WEDNESDAY MORNING SESSION.

The president introduced Mayor Bookwalter of Indianapolis, who made a brief address of welcome to the delegates, which was responded to by the presiding officer. The president then appointed the following committees:

Committee on Press—E. C. Minus, Hammond; Mr. Price, of Marion; H. J. Trueblood, Washington.

Committee on Resolutions—E. E. Schenk, Mt. Vernon; W. L. Hubbard, Scottsburg; F. M. Smith, Ft. Wayne; W. A. Shipley, Lafayette.

Committee on Nominations—Chas. F. Boonshot, Petersburg; A. W. Smith, New Pass; T. M. Layne, Clovedale; Chas. B. Frame, North Manchester.

Auditing Committee—N. R. Stoner, Rochester; M. Meyer, Jr., Covington; M. P. McDaniels, Winchester.

Sergeant-at-Arms—A. H. Burkett, Gosport.

The meeting then adjourned until 2 p. m.

WEDNESDAY AFTERNOON SESSION.

President Lewis called the association to order at 2 p. m. This was followed by the delivery of the annual address by President W. P. Lewis, from which we make several selections:

#### PRESIDENT W. P. LEWIS' ADDRESS.

Wisdom has recently been defined as the ability to see large things large and small things small. There are men in the Hardware business in Indiana who, in the light of this definition, have wisdom. They see large things large and small things small; they are members of this State organization. I am zealous for our State association. It is already large, strong, active and intelligent. It has been forceful in its labors on the national field, but there are still many Hardwaremen who have not been aroused. When these men awaken and enroll their names, as they surely will, and take their place beside the loyal men who have given character to this movement, Indiana, the geographical center of this Union, will continue to stand, as she now stands, in the front rank, and will exert an influence that will sweep over the snow-lapped Rockies and be felt to the Western sea.

#### INFLUENCE OF ASSOCIATION WORK.

Few men, even in our own membership, comprehend the advancement we have made and the power of our association, State and National. These two are one and inseparable, and we shall so view them.

Association work is continuously a labor of education, manufacturers, jobbers and retailers alike being students in a great class of commercial equity.

#### THREE FUNDAMENTALS.

To develop strong and enduring organization there must be three fundamentals: 1, The principles for which we contend must be unassailable; 2, the leaders must be trained and diplomatic; 3, the membership must be energetic and cooperative. Concerning the first of these three, I am not a prophet and claim no prophetic ancestry, but I hazard the prediction that the time is not far distant when the principles for which we now contend so vigorously will be recognized as axioms, will be considered and admitted as matters of the plainest equity, and this will be brought about, not so much by the influence of trained leaders as by the co-operation of the membership. I am a believer in the greatness of the rank and file, particularly such rank and file as constitutes the membership of this body, every man being one accustomed to financial responsibility and to making decisions involving gain or loss.

Encouragement is in the air, Arkansas, Pennsylvania and

Wisconsin have joined the National, and others will follow soon. We have passed the period of uncertainty, the period of development is under way, the power and destiny of this movement is in our own hands, and when every man shall do his duty our progress will be an unchallenged march of peace.

35

T. James Fernley, secretary-treasurer of the National Hardware Association, was on the program for an address, which he took pleasure in delivering. It was an address full of the most interesting matter on "Twentieth Century Conditions," and was listened to attentively by those present; he received considerable applause as his several good points were made in the usual characteristic manner. We are only able to give a portion of his address, but that will convey a very good idea of the subject dilated upon.

## ADDRESS OF T. JAMES FERNLEY, SECRETARY-TREASURER NATIONAL HARDWARE ASSOCIATION.

It gives me a great deal of pleasure to meet with you to-day as an official of the National Hardware Association of the United States, delegated by an organization composed of 185 of the leading jobbing houses of the country, employing about 2,500 salesmen, and doing a business of probably \$160,000,000 per annum, which business is done with the retail Hardwaremen of the United States—many of whom are now members of the State Retail Hardware organizations, and through these affiliations, members of that most vigorous body, the National Retail Hardware Dealers' Association of the United States.

I bring to you the best wishes of our organization, and the sincere hope that the retail Hardwaremen of the country will all realize the necessity of connecting themselves with organizations, through which means, it is admitted on all sides, benefits can be obtained and objects accomplished which could not be obtained through individual effort.

#### HARDWAREMEN'S QUALIFICATIONS.

You gentlemen are engaged in no mean vocation. I hold that the Hardwareman of the twentieth century is, and must be, a man of more than ordinary intelligence, and must possess knowledge of the business which can only be acquired through a course of instruction, which requires years of labor. Theologians, lawyers and physicians are prone to think that they are the only ones who require an education to successfully prepare themselves for the duties and responsibilities of life. In my opinion, the Hardware merchant should be educated from boyhood in everything that pertains to the conduct of the business. Indeed, I am not sure but that the law of the various States should insist upon an examination as to the qualification to conduct any given line of business before permitting any one to embark in it. We know that the theologian must pass an examination before being permitted to enter upon his profession. The lawyer must be examined by a board of men well versed in the law before he is recognized as a practitioner before the courts. The doctor must present his diploma certifying that he thoroughly understands the human anatomy and the diseases which may attack man, and how to prescribe remedies for treating the same.

#### THE NATURAL CHANNEL.

We hold in our National Hardware Association that the natural channel through which commerce in the Hardware line should pass is from the manufacturer to the jobber, and from the jobber to the retailer and from the retailer to the consumer; and that whenever any counter current crosses this legitimate one trouble ensues. We do not hesitate to state that we believe the jobber is in a much better position to serve the retailer than any manufacturer. We further state (and are in a position to prove) that the distribution of goods through the jobber is by far the most economical method. Indeed, I think you gentlemen will admit that it would hardly be possible to conduct a retail Hardware business to-day but for the fact that within a short distance, not over a few hours' time at the most, there is a central depot of supply upon which you can call for the wants of your customers on very short notice.

I would further call your attention to the fact that before the organization of the first retail Hardware dealers' association, the National Hardware Association of the United States was doing its utmost to prevent the inroads which were being made upon the retail Hardware business, by what we consider illegitimate competition, and while we have to a large extent been successful, yet, notwithstanding our efforts, these "quacks" in commerce have continued to grow, and the members of this association, as well as the members of the one I represent, have been the sufferers.

#### UP TO THE MANUFACTURER.

The remedy lies with the manufacturer. As long as he will recognize these people as entitled to consideration, they will continue to thrive. The jobber is compelled to carry such goods as his customers demand. However, when the manufacturer learns that he is losing caste with the twenty odd thousand retailers of the country, because he is selling 100 or 150 department stores and catalogue houses, he will be very apt to chance his tactics.

#### POWER OF RETAIL ASSOCIATION.

The power which you gentlemen possess is a great one. This organization and similar ones can be worth hundreds, and perhaps thousands, of dollars per annum to each individual member.

We are very much pleased to note the enthusiasm which seems to be attending all the meetings of retail associations during the past year. You have enjoyed individually a good share of prosperity, and there is every indication that this pleasing era will be lengthened. Eight months ago it was thought that possibly a much lower range of prices would prevail with the beginning of the year 1902. Such, however, is not the case. Leading manufacturers of many lines of goods are declining orders, and this in itself would indicate that your business will be good during this year. deserve to prosper.

The members of the National Hardware Association of the United States come to you with the offer of the power of their organization, to assist you in placing your business upon a plane which will make you the most happy and prosperous of merchants.

#### THURSDAY MORNING SESSION.

The secretary called the roll. This was followed by the reading of the report of the secretary, etc.

#### SECRETARY'S REPORT.

THE RETAILER'S TRUE FRIEND.

With few exceptions manufacturers and jobbers assure you to-day they want only the business of the retail Hardware dealers. Some write asking if we object to their selling certain parties or such and such a line of goods. Others who even one year ago were selling a dozen customers, handling different lines of goods in a town, have been kept so busy apologizing and explaining that they are becoming more careful in their dealings. Each claims he is the dealer's true friend and can prove it. Have you noticed it? The right spirit prevails. Let us encourage and insist upon it being maintained. Just as the evil grew upon us slowly, almost unnoticed, so the changes are slowly yet surely developing and the pressure is beginning to tell. Our plain duty is to be right and fair, and the future will show decided improved conditions.

#### WORK OF THE SECRETARY.

The work demanded of your secretary has increased manyfold. According to your instructions given me at last meeting, President Lewis' address was printed and mailed to 500 dealers, accompanied by a circular letter from the secretary. We have mailed over 2,500 letters and bulletins (the latter mostly upon request) during the year, and about 1,500 letters, programs, etc., to our members. This does not include bulletins or letters sent by the National.

We tried to secure new members entirely by mail, and while it is much less expensive the results are not so great, and it is our opinion that a personal visit is the best plan.

\*

I appreciate to the fullest extent the confidence, friend-ship and encouragement you have universally accorded me. In conclusion, I want to bring to your notice the active part your president has taken in this work. We have been in constant communication and never a semblance of discord or diverging opinion. His counsel has been wise and freely given—never a demand that he has not met nor a task that he has evaded.

And now, brothers, a few words as to our individual duty.

If you knew the thief was coming at the midnight hour you could prepare to successfully oppose him. If you knew nails would advance \$20 per ton to-morrow you could place your The professional deadbeat can go from store to store obtaining credit simply because you do not know he has already robbed your neighbor. Then one of the absolute necessities of successful work is a true knowledge of the sit-This must come from you personally. Every memuation. ber should report occasionally—it may be to send a circular, an advertisement, particulars of some swindle or departure. The accumulated reports furnish intelligent knowledge for successful work. Your secretary is no mind reader, he cannot afford the chances of taking a false position; then he looks to you and you alone for true, reliable information and co-operation and assistance.

#### PROUD OF ITS LEADER.

The Indiana Retail Hardware Dealers' Association has good reason for being proud of its leader. His elevation to the presidency of the National Hardware Association is a direct compliment to you. When we remember that he has not only met these duties so nobly and well, but has also found time to woo and win a most lovely wife, I am sure you will all join me in a hearty Godspeed and sincere wishes for his future welfare and happiness.

#### TREASURER'S REPORT.

The treasurer's report was read, showing a balance in the treasury of \$255.74, not including the money taken in during the sessions of the present meeting. The report of the treasurer was referred to the auditing committee. William Powell, of Commerce, read a paper on "Illegitimate Competition," which was received with interest by the assembled delegates.

A paper was read on "Window Display and the Art of Selling," by H. W. Beegle, of Rochester, N. Y., who treated the subject exhaustively and interested the delegates exceedingly.

An address was prepared by J. D. Warren, of Chicago, on the subject of

#### HARDWARE STORE ARRANGEMENT

which possessed considerable interest for the members, and as he was unable to be present on account of illness, the reading of it devolved upon the secretary.

H. P. Townley, of Terre Haute, held the attention of the convention during the delivery of an address on "Up-to-Date Hardware Advertising," which we reserve for a special article in an early issue of Hardware, it being full of good practical common sense, on an important subject.

#### THURSDAY AFTERNOON SESSION.

The session was called to order at 2 p. m. by the president Charles F. Shirley, of Orleans, was then introduced and addressed the association on the subject of "Indiscriminate Selling."

The auditing committee reported they had examined the books of the treasurer, and found them correct, which report was adopted. The report of the committee on resolutions then followed, which was unanimously adopted.

On motion, an additional allowance of \$50 was made to the secretary for his services during the past year. It was also adopted that the salary of the secretary for the ensuing year be made \$300. The nominating committee then reported as follows:

Mr. President and Gentlemen of the Association: I will say when I look into the faces of the dealers present and witness the enthusiastic interest that you have manifested in this meeting, I realize what a work has been accomplished; what an endless amount of stoking has been done to create the enthusiasm, and when I recognize Mr. Corey's ability as a stoker and a steam raiser and the enthusiasm he has manifested in this work, and when I see the dignity that our worthy president exercises in presiding at the meetings, and when I see the pleasant countenance of our vice-president always in evidence about here, yonder and everywhere, I realize that we have been so fortunate in our selection of officers that it will be a great detriment to this association to make a change at this time. (Applause.) Your committee have not only followed the inclinations of their own minds and ideas in this matter, but we have been careful to consult with many of you as to how you felt in the matter and without a dissenting voice the impression prevailed that we should continue this board of officers for another year. Therefore, in current with this feeling, the nominating committee put in nomination our old board of officers as follows:

President, W. P. Lewis, New Albany. Vice-President, Jas. L. Hutton, Portland. Secretary and Treasurer, M. L. Corey, Argos.

Members Executive Committee: I. A. Sibley, South Bend;

E. M. Bush, Evansville; W. H. Weed, Vincennes.

Mr. Boonshot took the chair and put the motion for the adoption and selection of the old officers for the ensuing year, and they were unanimously elected.

The president, in response to his re-election, made a brief address in which he said:

I wish to say that I appreciate exceedingly the honors that have been bestowed upon me; but that which I appreciate very much more than mere honor is the co-operation which the members of the State of Indiana have given to the administration. I am proud of the association of the State of Indiana. Personally I have considerable State pride. I know that outside of the State we are sometimes derided, but that comes largely because of the ignorance on the part of the gentlemen who state it, because Indiana stands in the top of the list to-day when it comes to education, industry and enterprise.

It has been a great pleasure to me to be affiliated with this association during the year that has been brought to a close. When I left home I determined I would accept the responsibility no longer, but I cannot but feel that the sentiment

here is almost universal.

I also have very deep interest in the welfare of the association and the work in general, and if it is the unanimous wish of this association that we proceed, having been in the harness somewhat, I gave my consent if Mr. Corey would give his consent.

I thank you again for the honor.

The secretary also returned his thanks in the following language:

Gentlemen, I suppose it is my turn. I did not think when I left home that I could possibly under any circumstances accept the responsibilities and work connected with this office another year. I did not feel that it ought to be asked of me. I enjoy these meetings as much as anybody that belongs here, and I enjoy the acquaintances, and I appreciate the friendships that this has given me. I felt as if somebody else should take this work and carry it along, and when I spoke of it they all would not hear of it.

Gentlemen, I would not be content to act as your secretary one minute unless I felt we were doing some good and mak-

ing some genuine advancement.

I don't know that I would have accepted of any other position in any other State I have visited so far, but I have so much love for the dealers that belong to this association that I could not refuse it. I promise you I will do the best I can and I expect and know I will have your earnest cooperation. (Applause.)

The nominating committee reported the selection of Messrs. James Fulton and Howard Burkett as delegates to the national convention at Chicago, and Messrs. Jones, of Richmond, and Bush, of Evansville, were selected as alternates.

The report of the committee was adopted and a brief discussion followed in regard to local credit associations, and shortly after the convention adjourned sine die.

#### Solders.

A proper understanding of the principles which govern the composition and the application of solders, says a writer in the *Ironmonger*, would enable users of solder to make strong and satisfactory soldered joints where at present their work may fail to stand the test of hard wear and strain in active use. The process known as soldering is a union of two metallic surfaces by the interposition of a third metal

or alloy which fuses at a lower temperature than the metals joined by it. Soldering may broadly be divided into two classes—hard soldering and soft soldering, the former requiring the application of the blow-pipe in its performance. For the latter, the heat transmitted by an ordinary copper soldering bolt is sufficient.

Perhaps the most familiar use of hard solder known in the ordinary workship is in the brazing of cycle-frame tubes into their sockets. A proper joint of this sort is also as good as a weld, over which it has an advantage in that it can be effected with steel, which is weldless. It does not pay the ordinary user to make his own brazing-spelter or hard solder. The process is a difficult one, requiring the use of crucibles in which to fuse the ingredients of the alloy. We therefore avoid going into details of the manufacture, but we shall indicate the composition of the various solders in common use for various metals. For particular work care should be taken to have a solder which melts at almost, but just under, the heat necessary to fuse the metals being joined. With iron and steel this is impossible, as their melting-points are too high, but with other materials it is practicable. To make first-class work when the metals and the solder have an almost equal fusing-temperature requires great care, as there is danger of melting the metals and spoiling the work. The advantage of the fusing points being approximately alike will be appreciated when we remember that heat and cold, vibration and concussion, tension and compression act upon the metals, causing them to expand or contract, and if expansion and contraction of the two be not approximately equal, disunion may be caused. Hard solders are alloys of copper. Zinc is most frequently used, and occasionally tin is employed. The melting-point of hard solder rises with the proportion of copper in the alloy. Copper alloyed with almost its own weight in silver makes a much stronger hard solder than any composition we know. Owing to its price, however, its use is restricted except for silver articles. For German silver an alloy of copper, zinc and nickel, in proportion of 47, 42, and 11 per cent. in the order named, is in common use. For copper work 53 per cent. of copper and 47 per cent. of zinc gives good work. For ordinary brass the same may be used, or a similar alloy with a greater percentage of copper—up to 60 per cent. The small proportion of tin occasionally added seldom exceeds 2 per cent. In hard soldering the solder is bought in a granular state, and, as stated above, a forced gas jet, in the form of a blow-pipe, is used to fuse it. Blow-pipe flames with petroleum instead of gas as fuel should be avoided if gas can be had. There are several appliances in the market for brazing by petroleum. As a rule, they are not satisfactory in practice. Soft solders are used for tinplates, lead, zinc, and for brass and copper work in which wearing qualities are not essential—as, for instance, in the attachment of ornaments to gasfittings. Ordinary soft solder is a mixture of tin and lead, and by increasing the proportion of tin up to about 70 per cent. the fusing point is lowered. The melting point of tin is 440 degrees Fahr., and of lead 620 degrees Fahr., yet an alloy consisting of two parts of tin and one of lead fuses at 338 degrees Fahr. As a general rule, the greater the number of metals in an alloy the lower is the melting-point. This condition makes it possible to alloy metals to suit any particular class of work. Bismuth is used for solders to fuse at low temperatures. For ordinary tinplates equal parts of lead and tin are usually alloyed into a solder. The value of the solder and the quality rise as the proportion of tin is increased, but 60 per cent. need not be exceeded, though for common jewelry and brass 70 per cent. of tin may be recommended. Pewterers use an extremely fusible solder made of 50 per cent. bismuth, 25 per cent. tin and 25 per cent. lead. This fuses at 203 degrees Fahr. This composition is what is known as Rose's alloy. For wiped joints lead should outweigh the tin by three to one, and for plumbers' compo. pipe two parts of lead and one of tin is the usual composition.

## RECENT TRADE PUBLICATIONS.

Joseph Dixon Crucible Co., Jersey City, N. J. 26-page booklet having reference to Dixon's Automobile Graphites, which are meeting with an exceedingly popular and extended sale. The principal object in publishing the several publications relating to this product of the company gives them an opportunity for adding a large number of new automobile testimonials which are of the most convincing character, and just the kind to impress the dealer.

Sterling Wrench Co., Rockford, Ill. 16-page pamphlet catalogue embracing their line of high-grade tools and mechanics' specialties, among which will be found the Sterling Saw Sharpener, Chuck Wrench, Calipers and Dividers, Tool Handle, Fence Tool, Riveter and Delineator, all of them extremely useful and desirable tools for the Hardware trade to handle. As the manufacturers themselves state, feeling that they have no competition in their line at present, they rely entirely upon the superior quality of their goods for their introduction, guaranteeing to replace or repair at any time any defects in workmanship or quality of material that might occur through their negligence, every article in the catalogue being patented or with patents pending.

HERCULES SPECIALTY Co., Erie, Pa. 32-page catalogue of their product in the shape of Sectional Ladders, Extension Ladders and Step Ladders; also Extension Planks for paper-hangers; Platform Swing Stages, Adjustable Scaffold Jacks and Ladder Brackets, including as well Adjustable Scaffold Horses. These goods are of the character that makes them worthy of the distribution the Hardware trade would afford. The catalogue is illustrated throughout with half-tone illustrations, indicating the use of these desirable appliances, showing every possible form of construction by which they may be extended and lengthened, and indicating the manner and style of their use in so many different ways as to make it a valuable pamphlet of the Hardwareman's library.

Berridge Shear Co., Sturgis, Mich., and 127 Duane Street, New York. 16-page catalogue embracing their line of highgrade steel laid Shears and Double-Acting Pipe Snips. Well printed on coated paper, with good illustrations showing the various styles manufactured by this company, all of which are improved by the addition of the Berridge patent lock, nut and bolt, which is quite an improvement to first-class goods like these, the company manufacturing only the one quality, which are fully guaranteed in every respect. The Double-Acting Pipe Snip is an article of original construction, only intended for cutting tin and other light metals, but for that purpose is regarded by the manufacturer as being without a rival. A larger size of this double-acting tool is made with crimper, which will command the attention of those in the trade having use for a tool of this kind.

Stover Mrg. Co., Freeport, Ill. 80-page catalogue of the usual Hardware size, which is their No. 11, covering a large line of specialties made by this company, including as well articles in the Shelf Hardware and Builders' Hardware line, this company manufacturing as they do a number of other lines of equal importance, covering "Windmills for pumping and power purposes"; "Grinding Mills, Sweep and Belt Power"; Corn Shellers, Wood Saws, etc. To each separate line a catalogue has been given. The catalogue under review includes in its contents Spring Hinges in large variety, single and double acting; Sash Locks, Sash Pulleys, Shelf Brackets, Door Pulls, cast Shingling Hatchets and Hammers, Stove Pipe Dampers and Stove Specialties, etc.

Charles Morrill, 277 Broadway, New York, is distributing an 8-page booklet with characteristic cover, having reference to the Pearson "Cyclone" Spike Puller, which has recently been added to his line of Hardware specialties. It fills a positive want for an article of this character, and will, no doubt, meet with an extended sale. The spike puller weighs 30 pounds, and with a pressure of 100 pounds on the lever handle it will lift over 3½ tons, four movements only being required to completely remove any railroad spike from any position in which it may be: guard rail, switches, frogs, etc. All parts are interchangeable, the frame being cast steel, while the jaws are forged from the best properly tempered Swedish steel. The other parts are of the best stool steel, and the tubing is of the best heavy gauge bicycle tubing.

HARRINGTON & RICHARDSON ARMS Co., Worcester, Mass., among their artistic publications have recently issued an exceedingly handsome little catalogue of 28 pages, with cover in gold and colors, covering their line of Automatic Ejecting and Non-Ejecting Single Guns, Automatic Double-Action, Police Automatic and "Premier" Revolvers, all of which are illustrated in graphic shape, full descriptions being given. A long variety of Revolvers of various styles is given in connection with the contents, including such well-known goods as "Bicycle" Double-Action, "Bicycle" Hammerless, having shorter barrels than common; their regular Hammerless Revolver and Double-Action Revolver with Knife Attachment, etc., etc.; also the cheaper styles that are represented by the "Bull Dog" and "Young America" Double Action. The artistic appearance of the catalogue is considerably increased by several pages being printed in colors, showing the uses of the firearms in an exceedingly graphic manner.

H. P. Townley, Terre Haute, Ind., is the publisher of a series of 50 Stove Ads. which he has found useful in the extension of his own business, and believes it would be advantageous for the advertising department of any store to make use of the same. He publishes a collection of these books, as follows: 100 Steel Range Ads., \$1.00; 50 Hardware Ads., 50 cents; 50 Bicycle Ads., 50 cents; 50 Hot Air Furnace and Heater Ads., 50 cents; 20 Implement and Vehicle Ads., 50 cents. No doubt they will be of considerable assistance to the advertiser who does not have sufficient time of his own to spend over his daily advertising in the local papers.

SARGENT & Co., New Haven, Conn., and 149-153 Leonard Street, New York, have just issued for gratuitous distribution the "Gem Chopper Cook Book," which is to be used in connection with the sale of their Gem Food Chopper, Nos. 20, 22 and 24, having a cutting capacity per minute of 2,  $2\frac{1}{2}$  and 3 pounds, respectively. It is an attractive cloth covered, copyrighted book of 96 pages, 7x4½ inches. The book contains a total of 207 recipes, which includes dishes and desserts of savory excellence, which may be prepared through the medium of this Chopper. Many of the recipes have been especially prepared by Janet McKenzie Hill, editor of the Boston Cooking School Magazine and a regular contributor to the Ladies' Home Journal. Many of the others have been selected from accepted sources, the name of the author of each being given with the recipe. A page is occasionally left quadrille ruled for the incorporation of the individual hometried recipes, so that they are always available and classified At the back of the book is a table of cooking measures, and an index to the various classes of dishes is also included.

## NORTH DAKOTA RETAIL HDWE. ASSOCIATION.

The fifth annual meeting of the North Dakota Retail Hardware Association was held in Loyal Knights Temple, Fargo, N. D., Wednesday and Thursday, February 19 and 20. The attendance was the largest in the history of the association and the meeting most profitable to all concerned. In addition to the members there were present representatives from all the jobbing houses in the West, and many members of manufacturing firms who desired to make the personal acquaintance of their customers, and it was not long before the gathering took shape as a sort of love feast between seller and buyer, at any rate the greatest harmony prevailed throughout the session, and before they adjourned both sides had ample opportunity to exchange views as to trade relations and kindred subjects of mutual interest.

FEBRUARY 25, 1902.

The dealers evidently stood in with the weather clerk, for Old Sol never shone brighter and a chinook wind came from the warm shores of the Pacific as a first reminder that Spring and increased business activity were at hand.

#### WEDNESDAY MORNING SESSION.

After a few cordial words of greeting to the members when he called the association to order at 10:30 a. m., Wednesday, President Helgesen introduced Mayor Johnson, of Fargo. The Mayor said he was glad to once more greet the members of the association, which he referred to in complimentary terms, and said the gates of the city had been taken off to give them free entry; that they were free to all the city possessed in the way of welcome, and guessed that as most of the members had "been there before" they would not need a guide to the best there was in the place; that the boys must remember this was a Prohibition State, and he cautioned them against drinking the river dry, for there was something else to be had for the asking "on the other side of Jordan," that is to say—at Moorhead, across the "Raging Red."

The president made a very able response to the address of welcome extended by Mayor Johnson, which was received with every demonstration of approval.

President Helgesen then appointed the following committees:

Transportation—H. Harrington, Fargo; H. F. Emery, Fargo; C. N. Barnes, Grand Forks.

Nominations—H. F. Strehlow, Casselton; I. L. Newgard, Grafton; W. R. McIntosh, Bottineau.

Resolutions—H. S. Diesem, LaMoure; H. N. Joy, Hamilton; C. A. Heegaard, Mandan.

Question Box—H. B. Allen, Jamestown; H. H. Walters, Casselton; O. A. Gallup, Edgeley.

WEDNESDAY AFTERNOON SESSION.

A recess was then taken till 2:30 p.m.

Upon reassembling in the afternoon H. P. Allen, of Jamestown, read an address as follows on

FAKES AND FAKIRS, OR LEG PULLING.

"Eternal vigilance is the price of liberty."

This is an old adage, and if it was true generations ago it is more true at the present time, and under existing circumstances conditions are constantly changing, and, unless we change our tactics and quicken our pace to conform to present conditions we will not be in the race. In every avocation of life there is a demand for the best talent, also for those who use that talent to the best of their ability. When Daniel Webster told a friend that he had decided to be a lawyer, the friend tried to have him change his plan by telling him that the legal profession was already overcrowded. But the reply of the great orator was, "There is always room at the top," and so it proved in his case, and it is true in every calling.

Let us apply this principle to our own case and strive for the best we can attain. If we are not able to win the approval of the whole country we can at least of a proportion of it, surely of the community in which we live—and remembering that we are not held responsible for the talent that we do not possess. The loyal citizens are just as necessary to a great nation as great statesmen.

From my limited experience I am convinced that some are not using their ability to the best purpose. Experts for working evil and confidence men are as much in demand as experts in legitimate business, and with too many the price paid decides which place they take. I do not believe that the world is growing worse and that everything is going to the bad, but it does seem that the struggle for wealth diverts too much of the strenuous life of our own citizens.

I do not wish you to think, brothers of the Hardware profession, that I know more about "these tricks that are dark and these ways that are vain" than others. I have never attempted to work them on others, nor have I been victimized oftener than the average man, but I think there are few of us who will not confess that they have been "held up" sometime in our business career by some one who had a sort of hypnotic power over us. Perhaps an experience meeting on this line might be of benefit and help some of us to avoid the rocks and shoals that others have run against, and enable us to learn a lesson without the experience—for experience is a dear teacher.

If our fakirs were all of the same class and kind we would soon learn to know them and be able to turn them down. But their ways of working are legion and they take us unawares and before we comprehend them they have convinced us that it is necessary for us to enter into their schemes—as it will prove a great success and increase our trade— and, besides, if we do not embrace this offer our competitor will be given the opportunity—in fact, he has already become interested, but he will give us the first chance as he has been told that we are the more progressive and up to date. Our heart warms toward our new friend, and we cannot be ungrateful to one who has shown such interest in us and favors us in preference to others.

Some of their methods are very mild and are worked year after year, without our realizing how we are sold. For example: A smooth man comes into your place of business and tells you the hotel keeper has bought a register of him and would like to have you take a card on the blotting page. It would be a splendid way to advertise your business and it costs you only \$3. The hotel man will appreciate it, and, he being a customer and friend for years, the \$3 and nineteen other merchants do the same thing, and the consequence is that the out of town man gets a hundred dollars from the merchants and furnishes a hotel register not worth over \$10.

The same scheme is worked in selling writing desks for hotel offices with raised backs for holding advertisements. From \$75 to \$100 is collected for advertising space, while the desk is not worth over \$10, the difference goes to the out of town promoter.

The piano racket is along the same line. A portion of the merchants are solicited to pay from forty to sixty dollars each, for consideration. They are to receive tickets which they are to give out to their customers at the rate of one to every twenty-five cent purchase. Each ticket is a vote for some organization to receive the piano. The promoter carries off from \$500 to \$600 and furnishes a piano which can be bought for \$125.

I am not condemning these ways of advertising but the exorbitant prices paid to outside strangers. If you wish to furnish a hotel keeper a register for the advertising it is legitimate, but buy it for what it is worth, and the same with the writing desk and the piano. Buy them, as you buy your Hardware, pay what they are worth and no more.

Another class which we should discourage is the common, every-day beggar. They come to us in divers ways and conditions, but they are not hard to identify.

There is the man who walks on all fours, the blind man led by the little boy, the deaf man with his poetry, the poor widow with the large family of small children. If they do not belong to your community turn them down, for by contributing to them you encourage a nuisance which will continue so long as it pays.

Perhaps no one line of fakirs has had greater success nor carried more money out of the State than the vendors of mining stocks. They are such slick talkers and have a dozens specimens of very rich ore, it will yield so much per ton, and, only think of it! -You may have stock at ten cents on the dollar. It will be worth par inside a year, no doubt, and the company has decided to raise the stock to 25 cents in the near future. There is but very little more for sale, but they wish to interest a few of the leading men in each town, so with false representation, and flattery, and persistency they work the spider and fly racket to a finish.

Then there are scores of ways that men part with their money without equitable remuneration, from the gaid brick swindle to the inflated bladder.

I will call your attention to but one more, which came under my observation within the last few months. very smooth gentlemen visited North Dakota towns ostensibly to sell an innocent little article for kitchen use, worth at retail, after allowing a manufacturer's and dealer's profit, about \$3. They proved to be experts in their line, and succeeded in getting two or three hundred orders at \$12.88 cents each. They could not deliver the article for some time as the factory was behind in its orders; but it proved to be such a ready seller that they turned their attention to selling county rights and disposed of most of North Dakota and most of Minnesota at \$288 for each county right, so, after the above towns has parted with about \$7,000, more or less, all they have to show are the two or three hundred articles, many of which can be bought for 25 per cent. of their cost, and the county rights, which, in my opinion, are not worth the paper they are written on. Sometimes the adage about the fool and his money is forced upon us.

Now, I do not wish to leave the impression with you that I consider the making and hoarding of money the chief end of man. If our money is to do good it must be spent. It has been said the money we spend we have, and what we keep we lose—and this is true when it is spent wisely. I have referred to several ways which I do not consider wise ways of disposing of money. In closing let me recommend a few investments that will prove more satisfactory.

An industrious farmer who had a poor crop for two years in succession loses his house and contents by fire; his neighbors and friends rally to his relief, and in a short time he has as good a house as before, furnished. Who will ever regret being one of the good Samaritans in such a case? Or the poor woman who makes a living by taking in washing and selling milk. The cow dies; who would ever feel the poorer by helping to buy another? Bestow your charities on the worthy unfortunate in your own community with generous hand and cheerful hearts.

We are only stewards, and the money we control is placed in our hands for investment. Let us invest it in such a manner that it will bear the scrutiny of Him who gives us the power to achieve wealth.

Let us not be in too great haste to get rich, but follow our legitimate calling and give it our closest attention, and by caring for it it will care for us.

Let us not put too much confidence in strangers who are dealers in stocks and patent rights.

Do not let your sentiment and sympathy overrule your judgment. Take time to consider and ask advice before making radical changes in business; count the cost and consider both sides of the question before embarking in new enterprises, and last, but not least, join the North Dakota Retail Association, attend the annual meetings and ask the secretary to allow you to write a paper for next year's convention.

Two hours were then given up to hearing the views of traveling men and manufacturers, President Helgesen prefacing his invitation by saying he wanted the gentlemen to be frank, and if they had any grievances to "speak right out in meeting." The debate that followed was participated in by sellers and buyers, and many points of difference were discussed to mutual advantage and several matters of controversy were cleared up. The remarks demonstrated the best of feeling between the respective interests and evidenced the desire of the jobbers to assist the association in all ways possible against illegitimate dealers and "catalogue" men. A feature of the debate was the manner of figuring the retailer's profit and what should be considered a fair profit. There was a wide divergence in view as to the latter, but many good

points regarding figuring the cost and what it should include were brought out for the benefit of those who had been doing business on the guess basis.

The jobbers and traveling men present then passed a vote of thanks to the association for courtesies shown, which was reciprocated in kind by the association.

The afternoon session closed after the reading by H. F. Emery, of Fargo, of a paper on

SOME DIFFICULTIES HARDWARE DEALERS HAVE TO CONTEND WITH.
THURSDAY MORNING SESSION.

The second day of the North Dakota Hardwaremen's convention opened as bright as the one preceding, and the members were on hand in a happy frame of mind for the work of the day.

The roll call showed a largely augmented attendance, many members having arrived during the night and morning. Quite a number of new members were taken in also.

President Helgesen made no formal address, but in a few words thanked the members for their uniform courtesy to him, spoke of the bright prospects for the achievement of good for the association and called for the report of the secretary, which was as follows:

C. N. Barnes, secretary, then delivered his annual report.

REPORT OF SECRETARY.

In several of my reports read at previous annual meetings I have felt they were of so lengthy a nature that they were tiresome and very uninteresting to those in attendance.

In this, my fifth report, I will attempt to carry you through the twelve months past and tell you as briefly as possible of the work performed in your secretary's office, and add possibly a suggestion or two for your consideration while here together.

Since our organization, this has been the first year that the Executive Committee has not been called together to act on matters to come before them, which would seem conclusive that our work has been running along in a smooth manner and indicating something accomplished at least.

By the Executive Committee not meeting, I do not mean that we have not had complaints and grievances to contend with as in previous years, but they have been handled by use of mails, wires and consultation of your officers, and most of the problems have been satisfactorily adjusted to all interested. One or two of the more recent complaints will be discussed by the Executive Committee during this meeting and proper action taken.

Early last year, various matters came up that could not be satisfactorily adjusted by correspondence, so your president and myself met in St. Paul with the Hardware jobbers soliciting trade in the Northwest, and discussed the issues arising and received assurances of their co-operation, and which has been manifested since that meeting.

#### CORRESPONDENCE.

The correspondence of this office during the past year has been no less than in previous ones, and from postage used it would indicate that it far exceeds all others. There are several causes that can be attributed to this increase. First, we have had double the complaints presented this year than former ones, for investigation and adjustment.

Another cause is that we have been trying to secure an accurate list of the Hardware dealers in the State, and there has been no end to the correspondence in this connection.

The large emigration to our State has made many new towns, and necessarily many new Hardware firms have entered the field. To secure their membership has made a large amount of correspondence and used a great deal of postage.

I regret to say it, but I believe that it is a safe assertion that not more than one quarter of the dealers in our association answer the first letter I send them, consequently through their neglect in not answering letters sent them, many dollars have been wasted in postage.

#### MEMBERSHIP.

Our membership to-day is 135, and with the exception of six, all of that number are in good standing. Undoubtedly these will be paid up during this meeting. Although our present membership shows only sixteen more members than last year, we have secured thirty-five. This difference is due to the fact that we have been compelled to drop some on account of changes in their business location, others because of their retirement from business and non-payment of dues, etc.

Nevertheless, we have never met in annual session since our organization without having a larger membership than the meeting previous.

From every available source known to me to secure information, I find there are at this date 228 dealers engaged in the legitimate Hardware business in this State, which is seventeen more than there were last year. The names of these firms you will find incorporated in our program, and while you are together you will confer a great favor on your officers if you will look these names over carefully and advise them of any errors or omissions.

I do not approve of mixing politics with our association work, but there are many abuses confronting the merchants throughout the State that can not be successfully controlled other than through legislation. It would seem advisable at this meeting to appoint a legislative committee to attend to framing bills that appear necessary now, or that may develop later, and to look after their interests at the next session of the legislature which convenes next Winter.

NATIONAL ASSOCIATION. Through the medium of the National Hardware Bulletin, our members have been able to keep in touch during the last year with matters handled by that organization, and I am sure that I accord the sentiment of our entire membership in expressing our satisfaction with the able manner the affairs of that association are being handled, and with the cord they have so successfully tied in connecting most of the State associations together.

We have read with pleasure, I am sure, the account of the Wisconsin annual meeting held two weeks ago and their decision in joining with the other States in the National, and we hope that the other States who have not as yet thought best to cast their lot with those affiliated with the National will think more favorably of so doing, and that action will be taken by them at their annual meeting.

I have made this report somewhat longer than contemplated at start, but I desire before closing to express to the Hardware trade throughout the State, and to the officers of the association, and members of the Executive Committee, my appreciation for the splendid support and co-operation than have given us in the past, and thereby permitted us to they have given us in the past, and thereby permitted us to continue to hold the supremacy above all other similar organizations, in having for our membership the largest number of dealers in proportion to the available ones of any State Retail Hardware Association in the United States.

The treasurer's report followed. It showed the association to be in a remarkably good financial condition, having a large balance in the treasury.

A committee from the North Dakota Grocers' Association appeared before the meeting and extended the good will of their association and asked that the Hardwaremen join them in organizing a mutual fire insurance association. Hardwaremen felt that they were not at present in a position to take action on such a matter owing to their allegiance to the Minnesota Hardware Association's Mutual Co., with which they were affiliated.

A number of jobbers and manufacturers were then introduced, and an interesting exchange of views was enjoyed till the noon recess.

At the afternoon session, which was executive, the following officers were elected:

President-H., N. Joy, Hamilton.

Vice-President—H. F. Emery, Fargo.

Treasurer—W. H. Pinkerton, Lakota. Secretary—C. N. Barnes, Grand Forks.

Members Executive Committee for three years—Anton Enger, Cooperstown; Frank Lish, Dickinson.

Representatives to National Retail Hardware Dealers' Association-H. N. Joy, Hamilton; H. T. Helgesen, Milton; C. N. Barnes, Grand Forks.

Next Place of Meeting-Grand Forks.

Resolutions were then adopted, which included the follow-

Resolved, That the action of the Executive Committee at its meeting of July 10, 1901, in rescinding the resolutions of September 29, 1897, and February 16, 1898, and the adoption in lieu thereof of the following resolutions, be approved:

Resolved, That it never has been, and is not now, the purpose or the intention of the association to dictate or in any way to attempt to control the prices at which Hardware, stoves, tinware or any other article of a kindred nature shall be sold in this State, either by foreign jobbers or by retail dealers, nor is it the purpose of the association to attempt to limit the full and free competition in the importation and sale of said articles in this State. The object of this association is, in general terms, to promote the interests of its members and by all lawful means to protect the legitimate Hardware trade.

At times there are certain persons engaged in the sale of the articles above mentioned who are objectionable to the members of this association.

We do not in any way attempt to limit the right of such persons to buy of whoever will sell to them, or to sell at whatever price he chooses to put upon his goods, but the members of this association will exercise the right, which they maintain they have, to refuse to purchase goods of any manufacturer or jobber who persists in selling, either directly or indirectly, to any person who shall for any reason be declared objectionable to this association.

Resolved, That we are greatly indebted to President Helesen and Secretary Barnes for the efficient manner in which they have conducted the affairs of the association for the We realize that we are unable to adequately reward them for the many sacrifices which they have necessarily made in furthering our interests, but assure them that we deeply appreciate it, and sincerely hope that fortune may beam beneficently upon them.

During the session the following papers were read:

"One Way to Compete With Supply Houses," by O. A. Gallup, Edgeley.

"Dealers' Associations, Their Object and What They may Accomplish," by James McPhail, Langdon.

"The Practical Hardwareman," by Levi B. Hanson, Shel-

Their addresses were well received, and were followed by discussions from the Question Box, until 5 p. m., when the convention adjourned sine die.

#### Eastern New York and Vermont Hardware and Iron Association.

The annual meeting of this association was held on the 20th at the Fort Orange Club, Albany, N. Y., the members being entertained as the guests of the Albany Hardware & Iron Co. After luncheon a business meeting was held, and it being the annual, election followed, the result of which was the unanimous re-election of the officers of the preceding year, as follows: President, James L. Dunn, Troy, N. Y.; vicepresident, Richard Ryan, Rutland, Vt.; secretary, Charles H. Turner, Albany, N. Y.; treasurer, Guilford Dudley, Poughkeepsie, N. Y. Directors: Charles Croissant, Albany, N. Y.; J. T. Johnson, Rondout, N. Y.; James F. Whalen, Burlington, Vt.

The next meeting will be held on the third Thursday in May, and it is presumed that it will take place at Kingston, N. Y., the full decision being in the hands of the committee.

#### He Bought It.

A Washington attorney had a caller yesterday. He was an uncouth looking individual, and said he hailed from Montgomery County, Md.

"Judge," he said, "I reckon I'll hev ter buy a few words of advice.'

"Well, what is it?"

"Thar's a sto'keeper up my way, an' I've hed a good many dealin's with him fust and last. I reckon I've seed him put his right thumb in the scales a hundred times when he weighed things I bought."

"Well, you ought to have stopped him. You can't collect damages for that," interrupted the attorney.

'I don't want no damages." "Well, what do you want?"

"You see, we got in a fout yestiddy, an' I bit off that thumb, an' I want ter know if, as many times as I bought it, I don't own it, so that he kain't get damages for my bitin' it off."—Washington Star.

## NEW GOODS AND SPECIALTIES.

#### Standard Spray Pump.

Admiral Lamp Co., Marysville, Ohio, are the manufacturers of the Standard Spray Pump, the usefulness of which is shown in the following illustrations, Fig. 1 representing the old methods performing the spraying operation previous to the advent of the Standard Pump, while the ease with which spraying may be accomplished by its aid is shown in Fig. 2, which indicates one manner of its use where it is used with effect, having three feet of hose and strainer. The pump

FIG. 1.

may be used with bucket, knapsack, tank or barrel, and is intended for spraying orchards, gardens, vineyards, or for use in whitewashing, disinfecting chicken houses, etc. It is provided with two nozzles, which are interchangeable, No. 1 of which will throw a solid stream 50 to 60 feet, while No. 2 may be attached to No. 1 and will throw a fine spray 28 feet. If attached to the pump direct, it throws a coarser spray 40 feet. The operator standing on the ground, is thus enabled to cover the highest fruit tree with a fine spray, and with

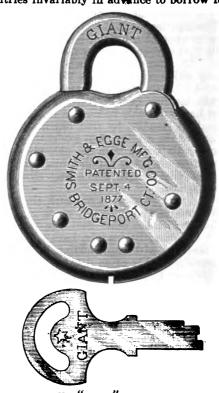

FIG. 2.

exceedingly little effort under the circumstances. Any solution may be used in its operation, from paris green to kerosene emulsion.

#### The "Giant" Padlock.

Smith & Egge Mfg. Co., Bridgeport, Conn., are the manufacturers of the style of bronze metal padlock which we illustrate herewith, and which has been in general use for a number of years. So perfect in its construction, and so well adapted for general purposes, this peculiar form of padlock has been one of the most popular ever placed before the Hardware trade. It is particularly well known in connection with the Post-Office Department of the United States, where it has

been in use on mail bags for a number of years. Postmasters General come and go, but no administration thinks of changing the locks on the mail bags, no better form of safe protection ever having been brought before the department. Other countries invariably in advance to borrow ideas of this

THE "GIANT" PADLOCK.

kind from the United States have found it desirable to adopt the Smith & Egge Lock in their postal service. All the padlocks made by this house are provided with four tumblers each, and the safety insured by the internal construction which forms its underlying principle of security, and which has been used for nearly twenty years by the locks supplied by the Smith & Egge Mfg. Co., recommends the use of this lock to all requiring a portable appliance of undoubted security.

#### Ohio "Water Tight" Steel Hods.

Geauga Foundry & Mfg. Co., Painesville, Ohio, are manufacturing a great improvement over the old-fashioned mortar

OHIO WATER-TIGHT BRICK HOD.

and brick hod, which will be evident from the illustration of the Mortar Hod which we give in connection herewith. While the Ohio "Water Tight" Steel Hods are claimed to be 25 to 50 per cent. lighter when in use than the common wooden hod, they are, in addition, positively water tight. The bodies are made by being folded from a single piece of

(Continued on pages 48 and 49.)

### REVIEW OF THE MARKETS.

Wire Nails: The demand continues in satisfactory shape, but prompt deliveries have not been facilitated by the recent stormy weather. The present market is a firm one, and is represented by the quotation of \$2.05 to \$2.10 f. o. b. Pittsburgh, plus actual freight to destination.

New York. The demand has been but moderate, owing to the disadvantages of the weather, and the following prices represent the local market for quantities stated.

Carloads on dock are quoted at \$2.25; small lots from store \$2.30 to \$2.35.

Cet Nails: The Cut Nail market, at the quotations recently established, is a firm one. The quotations are as follows: f. o. b. Pittsburgh, plus the actual freight to point of destination, terms 60 days, or 2 per cent. off in 10 days:

New York. The local demand has been held in good shape by the concession in prices recently adopted, the following representing the market.

| Carload lots on  | dock          |   |                         | \$2.08 |
|------------------|---------------|---|-------------------------|--------|
| Less than carlos | d lots on doc | k | • • • • • • • • • • • • | 2.18   |

Barb Wire: The demand for Barb Wire is a noticeable one, as large size specifications are being entered for Spring delivery, no surplus stock accumulating at the mills. The prices previously quoted for quantity lots remain in force.

| To jobbers   | in carload lots, Painted                   | 2.60        |
|--------------|--------------------------------------------|-------------|
| 4            | " Galvanised                               | 2.90        |
| 44           | less than carload lots, Painted            | 2.65        |
| **           | " Galvanized                               | 2.95        |
| To retailers | in carload lots, Painted                   | 2.70        |
| - 44         | " Galvanized                               | B.00        |
| **           | less than carload lots. Painted            | 2.20        |
| 44           | less than carload lots, Painted Galvanised | <b>8.10</b> |

Ellwood & Baker Wire is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plais Wire: An unusual demand for prompt deliveries, especially for manufacturing purposes, continues to give the manufacturers uneasiness to deliver promptly on time. The market is a strong one, and no concessions are heard of. Present quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

|    |                      | Plain.                          | Galv.  |
|----|----------------------|---------------------------------|--------|
| To | iobbers in carload   | lots\$2.00                      | \$2.85 |
| To | fobbers in less than | lots\$2.00<br>carload lots 2.05 | 2.40   |
| Ť  | retailers in carload | lots 2.10                       | 2.45   |
|    |                      | n carload lots 2.20             | 2.55   |

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances, as follows:

| 6 to 9      | Base   |        |      |      | <br>  |   |       | <b>8</b> 0.40 | extra. |
|-------------|--------|--------|------|------|-------|---|-------|---------------|--------|
| 10          | .80.05 | dvance | over | base | <br>  |   | • • • | .40           | 64     |
| 11          |        | **     | 44   | **   | <br>  |   |       | .40           | 64     |

For even weight bundles, 50 pounds and over, 5 cents per bundle advance on above.

Augers and Bits: Prices previously existing on Augers and Bits have been confirmed by the manufacturers at a meeting held on February 12. There is a steady demand, and deliveries are fairly prompt.

Chiscis and Drawing Knives: Prices that previously held the market on Chisels and Drawing Knives were confirmed at a meeting held by the makers on February 13. The quotations are regarded as being favorable for the business in sight, and the demand is an exceedingly good one.

Axes: A consolidation of the interests of a number of Axe manufacturers in order to make a much more steady market for these goods than has previously obtained, has resulted in an advance on the leading goods, the details of which have not come to hand. The goods will be advanced, it is understood, from 5 to 10 per cent., the new prices going into effect before March 1st. Every effort will be made to maintain the prices as established, as the season just past, in the way of profits, has not been as satisfactory as the amount of trade would warrant.

Steel Goods: The Iowa Farming Tool Co., Fort Madison, Iowa, under date of February 1st, have withdrawn all quotations on Steel Goods and Sundries. New prices will be named on application, with specification of buyer's wants.

Bisder Twine: A demand is being noted for Binder Twine, and quotations from some of the manufacturers are as follows, which is subject to 1/4 cent per pound rebate when purchased in carload lots:

|              | Per pound |    |
|--------------|-----------|----|
| Sisal        | 11 cent   | 8. |
| Standard     | 11 cent   | A. |
| Manuaru      | 1814 cent |    |
| Manila       |           | •• |
| Pure Manila. |           | 3. |

Cordage: The rope market is still a firm one, recent advances changing the quotations which we give below, and which now represent the market, although further advances may be looked for.

Linsced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels......54 cents per gallon. In lots of 5 barrels or more.......68 cents per gallon.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

#### THE PHILADELPHIA TRADE.

Midwinter is never the time for very heavy trade, and, in attending a trade convention last week, the writer had the pleasure of hearing a very sage remark made by a veteran Hardwareman. The talk had been running on the competition which exists to-day—especially on goods sold out of season, and, after tales of woe had been discussed for some time, the veteran remarked—"Well, I have lived through a great many years in the Hardware business, and have some times found it difficult to live through February, but if I once reached March, I always found I could live through the balance of the year."

There is a great deal of truth in this, and it confirms what was often said by the late Charles L. Mead, of the Stanley Rule & Level Co., who used to say, apropos of the March sun, "We are all sun-worshippers yet. The absence of the sun makes business dull, and no one is disposed to do very much, but as soon as the warm Spring sun comes out, and mankind feels its glow, in the vigor of new life, he begins to feel like buying a plane, or a hatchet, or a spade and getting to work." It has always seemed to us as if there was much sage philosophy in this saying, and it is undoubtedly true.

This would seem to indicate that trade was dull. This, however, is not the case. On the contrary, it is keeping up

in very good shape, and in volume will compare favorably with last year.

There is an excellent demand for goods, but the cold and wintry weather of the last few days has caused a slight lull, which is giving jobbers a chance to catch up on their business.

The outlook in all directions is bright. Manufacturers are extremely busy, and great difficulty exists in getting supplies, especially in nails and wire, where supplies are detained by reason of the short supply of cars and the block in transportation.

Prices are still growing firmer. The Axe men have just announced their prices for the coming year, which show an advance on last year's figures, and we understand a combination has been made including all the axe manufacturers of

the country, so there is every probability that higher prices will rule on this line for some time to come.

BIDDLE HARDWARE Co.

#### THE PITTSBURGH TRADE.

Business during the present month has been somewhat retarded on account of weather conditions. For the past two weeks Western Pennsylvania has experienced snow storms of greater severity than for a number of years past. In many districts the roads were rendered impassable, and traveling men report much difficulty in covering their routes in outlying districts.

The effect of this is seen in the volume of business, which is hardly as large as had been expected, and as the prosperous condition of things in general would lead one to expect. However, the number of orders for future shipment of

# TO SUPERSEDE EMERY CRAIG MINE CRYSTAL CCRUNDUM.

WHAT THEY SAY ABOUT IT.

BRADLEY & HUBBARD, Meriden, Ct.—"After making careful tests of your No. 24, 70, 100 and 140 (Craig Mine Crystal) Corundum on leather covered wheels, polishing cast iron, am pleased to inform you it is the best abrasive we have ever used. It will polish at least twice as much work as any emery we have ever tried; cuts very fast, and leaves a fine, clear finish."

INTERNATIONAL SILVER CO., Factory "G," (Formerly Norwich Cutlery Co.)—"We have been using No. 40 (Craig Mine Crystal) Corundum steadily for six months, and we find that it will do just double the work that any other emery that we have ever had will do, and that it is impossible to burn a (knife) blade with it which is a great advantage to us as all emery will burn, and consequently draw the temper. We are using finer grades with equal results. \* \* \* We would recommend Corundum, not only on account of the saving, but the work is very much more satisfactory."

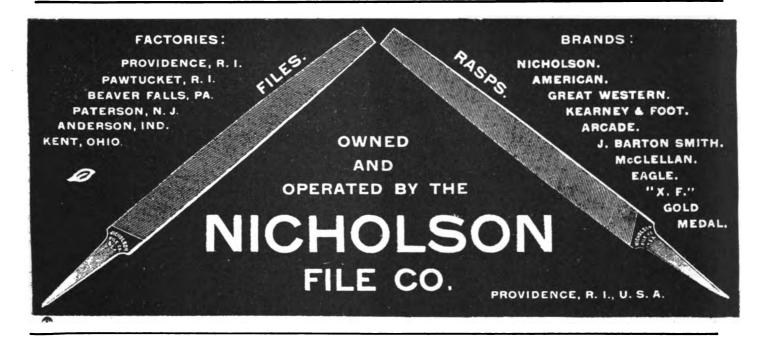

LOBDELL CAR WHEEL CO.—" Is entirely satisfactory. \* \* \* Cuts well and seems to be very pure."

Emery is an impure form of corundum. It is about 30 per cent. corundum, and 70 per cent. oxide of iron, non-crystaline alumina, etc. The 30 per cent. cuts; the 70 per cent. rubs and burns.

Labor is the chief item of expense in manufacturing. If you use much emery you will make a large saving by using Craig Mine Crystal Corundum in its stead. It is the only pure corundum produced in North America.

Send us a sample order.

THE CANADA CCRUNDUM CO., LIMITED, TORONTO.

Spring goods has been exceptionally large, and from the quantity of goods purchased it is evident that the trade in general has faith in the continuance of the remarkable business activity which the last year has witnessed. In and around Pittsburgh conditions were never better, and when the Spring trade has fairly opened there is every reason to anticipate that merchants in all lines will be as busy as they can desire.

Logan-Gregg Hardware Co.

#### THE CLEVELAND TRADE.

The report of the Industrial Commission on Trusts lacks the denunciation that they were expected to make. We are slowly learning that the danger or benefit of trusts depends upon the trust itself. That what they do is superior to any theory. That they can reduce cost is not criminal. If they retain what they gain as profit, they do not injure competitors. If they give it to the consumer, they surely benefit him. The opposition from trusts comes from both sides less they suffer. As stock in trade for politicians, it has about served its purpose as opposition to improved machinery did. Sensible men see, as all others will, that conditions created combinations, and Satan had no hand in it. A lot of cranks would be out of business if improvements were to stop. The extension of territory now furnishes a hobby for disaster discoverers, but the sun in its changes generates changes, and we have less to do than we imagine in determining the direction they take. The annexation of Louisiana and Alaska was followed by prophecies of disaster, but the country has endured it, and we may live to build monuments to those who are instrumental in securing recent extensions. The extreme cold has interfered with trade, but if it has destroyed the worms that injure the wheat we have adequate compensation. Indications make it probable that 1902 will excel any past year in prosperity. THE LOCKWOOD-TAYLOR HARDWARE Co.

#### THE DAVENPORT TRADE.

Weather continues cold but pleasant; roads good; prices steady; collections satisfactory, and indications point to a good healthy Spring trade.

SICKELS, PRESTON & NUTTING Co.

#### THE ST. PAUL TRADE.

With the month of February slipping away and March so near us, the largest Spring business we ever had is without doubt staring us in the face. The good times all over this country is with us. The trade fully appreciate that the chances are for a scarcity of goods and they are buying quite liberally for immediate as well as future delivery. We believe the merchant is wise who keeps his stock full of

goods, because, as a rule, there will be no lower prices and there may be higher ones.

Competition here is strong, prices are cut to the lowest profit, sometimes so low that the profit is out of sight, but still we hope by close work on prices and large volume of trade we shall find that this year will show a good result.

C. W. HACKETT HARDWARE Co.

#### THE OMAHA TRADE.

Trade has been flowing in very even channels since our last report. As regards volume, this is fully up to expectations, the only conditions which create friction and dissatisfaction being the extreme difficulty of procuring the goods with which to fill orders. From all sources comes the cry of a demand that apparently taxes to the utmost the ability of the manufacturers and jobbers to supply, and conditions appear to favor an increase in these conditions rather than any relief.

Collections are fully up to the average. There are a few soft spots where the crop of last year was short and some complaint is made, but in a general way conditions are prosperous and there is apparently no reason why we should not have another year that may exceed in satisfaction the results of the one just past.

WRIGHT & WILHELMY Co.

#### THE SAN FRANCISCO TRADE.

Just what this section of country is most in need of, and has been having the greater part of the week, is still manifesting itself this fifteenth day of February in a copious rainfall, and without any indication of an early let-up. Yet, notwithstanding this weather condition, so very agreeable to the Hardware, Farm Implement and Builders' Tools trades a profound sense of grief is spreading throughout San Francisco trade circles as the shocking news is spreading its way this evening of the death, this afternoon, at his home in Oakland, of Frank Folger Osborn, the pioneer Hardware and Builders' Tools dealer of this city, and president of the San Francisco and Oakland Retail Hardware Association. Deceased, fifty-two years of age, who had been confined to his home and bed four weeks, was one of the most genial of men.

Prominent officials of the California State Retail Hardware Association anticipate a record-breaking attendance at the society's third annual meeting, to convene in this city for a two days' session on the date of this issue of *Hardware*. But, as was the case at last month's meeting in Nevada City of the Pacific Retail Hardware Association, it is expected that this meeting will afford not much opportunity for trade papers' correspondents to make note of, since it is surmised that this convention of Hardwaremen is to be a

sort of executive-committee-of-the-whole affair, the first day to be devoted exclusively to an association conference for the betterment of retail trade arrangements with jobbers, the second day to be devoted to joint conference between the association members and representatives of the jobbing INDUSTRIAL PRESS ASSOCIATION. houses.

(Continued from page 42.)

#### Missouri Retail Hardware Dealers' Association.

WEDNESDAY MORNING SESSION.

The Wednesday morning session was called to order at 10 o'clock, and the association went into executive session, during the course of which an address was made by the treasurer of the National Retail Hardware Dealers' Association, H. G. Cormick. Among other things he said:

As at present organized, the National Retail Hardware Dealers' Association, being composed of a small number, is well equipped to do effective work. During the past year its efforts have been devoted principally to harmonizing the various interests in the trade, and it has in this line met It is in close touch with the prominent with great success. manufacturers and the National Hardware Association, and much relief is in sight, in the fact that we are assured that many prominent lines will not be found in the hands of illegitimate competition this year.

The National Hardware Association—a jobber's association-have demonstrated beyond a doubt that they are our friends, and I believe that each member will serve the interests of this work if he will, as far as possible, confine his purchases to members of this association, and tell others why he Personal effort along this line will produce results that will startle one who has not tried it.

Nothing can be done that will tend to help your interest more than to give to the National Retail Hardware Dealers' Association your unreserving personal loyalty. We much can be done; without it the effort will be futile. With it

To each of us, from the fact that we are a part of this organized movement, has come the conviction that there is "a community of interest" among the retail Hardware dealers of this country, and we should give to the effort in its behalf our best talent, so that at no distant day the public will realize that they will find the staple branch of Hardware in the hands of the retailer at fair prices.

After Mr. Cormick's paper had been read the association went again into executive session, and J. W. Poland, of Carrollton, of the committee on the revision of the constitution and by-laws, brought in as the labors of the committee a number of amendments to the present constitution and bylaws. They were adopted by the association. After the constitution was adopted by unanimous vote, the usual resolutions of thanks were passed.

The next thing on the program was the election of offi-John F. Bannon, of St. Louis, placed the name of Taylor Frier, of Louisiana, in nomination. August Steinmeier, of St. Louis, nominated B. F. Naylor, of Marshall. Both nominations were seconded. Mr. Naylor, however, de-

clined the honor, and Mr. Frier was elected by acclamation, the rules being suspended for the purpose.

August Steinmeier and A. F. Geschwinder, of St. Louis, were appointed a committee to escort the newly elected president to the chair. On taking the chair, Mr. Frier said:

This comes as a surprise to me. I have not sought any office within the gift of the association except that of a private in the rear ranks. After my remarks to you yesterday on the subject of association loyalty, I feel that I cannot decline this office when unanimously elected thereto. preciate the high compliment you gentlemen have given me in making me your president, and while I do not promise to revolutionize things during my term of office, I will do what I can to the best of my ability in behalf of the association, and ask the co-operation and assistance of the membership. No one man can achieve success unaided in this work. We must have united effort. I pledge you my best efforts in your behalf, and ask for and expect assistance from every member of the association.

Ed. L. Wachter, of the Wachter Hardware Co., St. Louis, was elected vice-president. The following were elected executive committee:

- J. W. Poland, of Carrollton, for three years.
- F. A. Kansteiner, of St. Louis, for two years. F. H. Mayer, of Macon, for one year.

Z. T. Miller, ex-president of the National Retail Hardware Dealers' Association, was then introduced by H. G. Cormick, on invitation of President Frier. He delivered an extremely interesting address on "The Results of Organization," in the course of which he said:

The results thus far accomplished, the objects yet to be accomplished and the new issues the future will present along this line, show the great necessity of an effective National I wish I could impress upon you a proper Association. appreciation of its importance, the immense sacrifice of time and energy in your behalf by its officers, and arouse the spirit of support due this branch of your organization.

SPEAKS FROM A DISINTERESTED STANDPOINT.

I know by experience the labors attached to both State and National Association, and it has often appeared a mystery to me that so many fail to appreciate the work that is being done. I am not here as the representative of any State or National Association, in fact, I am entirely out of the Hardware business, and speaking from this entirely dis-interested standpoint, I would urge every Hardware dealer to be a member of some State association and through it contribute liberally to the support of the National Association. Those who have never been called upon to take part in the duties of the National Association have but little idea of the labors of its officers.

The thousands of letters that must be written by your national secretary in the course of a year, the time and study required by the peculiar nature of each case, together with the diplomacy and points of law involved, the getting out of the quarterly report, which is developing to where it alone requires almost the entire time of one man, and the many other duties devolving upon him, must certainly leave but little time to devote to his individual interests.

Inasmuch as all share alike in the benefits of this work, justice would naturally demand that its burdens be equally divided and the national secretary receive a salary fully compensating him for the time and energy devoted to this work. If every Hardware dealer would join his respective State association, and subscribe for the Quarterly Bulletin, their dues and subscriptions would supply an ample fund for such a salary to conduct the affairs of the association as they should It really passes my understanding how, in this day of association, any Hardware dealer can consider his business too unnoticeable a force to be felt or consider his personality above the need of association influences.

The following committees were then appointed:

Committee on Trade Abuse-B. F. Naylor, of Marshall, chairman; M. E. Wengert, Kansas City, and R. H. Myers, St. Louis.

Auditing Committee-W. T. Shoop, Richmond, chairman; M. C. Post, Brookfield; J. L. Boehl, St. Louis.

On motion, St. Louis was chosen as the next meeting place of the association.

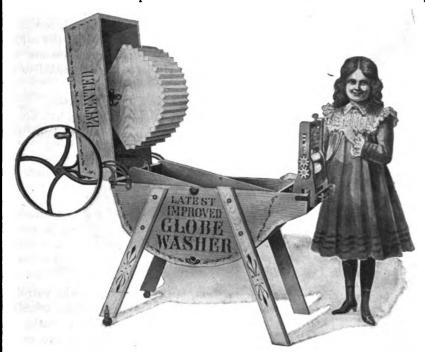

At 12:20 the convention went into executive session, and F. M. Neudorff was re-elected as secretary for the ensuing year. The convention adjourned at 2 p. m.

## HARDWARE TRADE, ATTENTION!

WE have recently acquired, by purchase, all patents and rights to manufacture THE GLOBE WASHING MACHINE, formerly made at Cincinnati, O.

We have made this addition to our line to be more fully equipped to meet the requirements of our customers.

sheet steel, without the necessity for cutting the metal. They are reinforced on the edges and at the dumping point. The improved Malleable Iron Fork and Wooden Shoulder Saddle forming part of its construction, makes it easier for the user to carry, or to attach a piece of cloth should he so desire, to

OHIO WATER-TIGHT MORTAR HOD.

the under side of the saddle than previous styles placed on the market. One of its desirable features is a one-piece Malleable Iron Fork and Socket, which is used for holding the hardwood handle and taking up the shrinkage, which enables a broken handle to be readily replaced, and also to ship the hods knocked down.

#### Wilcox Velvet Roller-Bearing House Door Hanger.

Wilcox Mfg. Co., Aurora, Ill., who have long been known in the market as manufacturers of Hardware specialties possessing great merit as sellers, are placing before the Hardware trade their Velvet Roller-Bearing House Door Hanger, shown herewith. This Hanger embodying as it does the latest improvements in a specialty adapted for this purpose, is meeting with a wide and extended sale. It possesses among its numerous advantages the fact that it is very simple in construction; it may be readily applied by any mechanic,

it is designed to run on maple track with a rounded tread, is set in and securely fastened to the solid steel U-shaped channel. In its operation it is claimed to be perfectly noiseless and smooth running. The track is so constructed that its strength is more than double the ordinary steel house door hanger track, and it is claimed in addition that the shoe which comes in contact with the wheel furnishes that absolutely noiseless quality in the Hanger which recommends it strongly to the trade. This feature has been found very attractive to the builder and user of such goods, and has largely increased the sale. In price it is extremely moderate, and the manufacturers desire correspondence on the subject of its introduction, when all the particulars necessary will be furnished, and net prices will be gladly forwarded to the dealer.

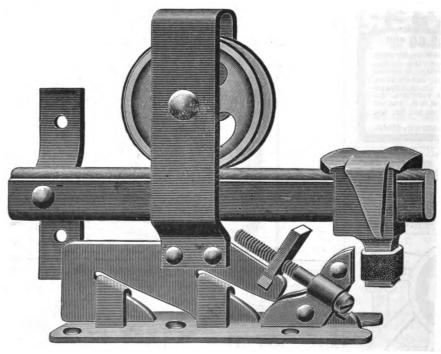

#### The Imhauser Watchman's Time Detector.

Laziness and the temptation to neglect is especially strong in night watchmen. Employees who work by day know that

THE IMHAUSER WATCHMAN'S TIME DETECTOR.

critical eyes are on them, but the watchman who patrols a factory in the dark hours is secure from human oversight and can find a dozen excuses for omitting to make the regular rounds. This state of things led long ago to the invention of mechanical checks to keep the watchman up to his work. Some of these devices were not without merit. Others were cumbrous and costly, requiring the frequent services of expert workmen to repair them. Others still could be and were tampered with by dishonest watchmen,

WILCOX VELVET ROLLER-BEARING HOUSE DOOR HANGER.

even if he has had but little or no experience in hanging doors, and this is a feature that will recommend its use. So many articles designed for this purpose are of such a complicated nature, even a skilled mechanic finds difficulty in properly adjusting the same. It is also claimed to be very strong and durable, but few pieces being used in its assembling, and under those circumstances is not likely to get out of order. The illustration gives a very clear idea of its component parts, its simple method of adjustment, and

so that the employers had no guarantee of faithful service. A near approach to perfection is made by E. Imhauser & Co., of 206 Broadway, New York, whose Watchman's Improved Time Detector is used in the United States Life Saving Service and was the only contrivance of its sort employed at the Pan-American Exposition. The Imhauser Detector was first made in 1869 by an inventor who was never satisfied with present achievement, but was always striving after something better. The present result of much study

is a clock with chronometer adjustment and works fully jeweled. It is protected by a dust proof cap and the outer edge is fitted with a safety knife blade lock attachment, which cuts the dial every time the clock is opened or closed. Tampering with such a clock is out of the question. There are 12 or 24 keys fitted to as many stations inside or outside the buildings guarded. Arriving at a station the watchman inserts the key in the keyhole and turns it to the right, once. A figure is punched on the dial at the exact time indicated by the clock. A single stamping spring made from finest steel is used. It is attached to the cover and is completely independent of the watchman. In many clocks carried by watchmen there is a separate spring for each station. The fault of this system is that the springs rust and stick together, so that all the stations are marked at once. Risk of fire is said to be so reduced when the Imhauser Clock is used that the underwriters make an allowance for from five to ten points in favor of the insured. This firm received the highest award at the Pan-American Exposition for their exhibit.

#### Eagle Pipe Wrench No. 1.

Frank Mossberg Co., Attleboro, Mass., are the manufacturers of the Eagle Pipe Wrench, full-size illustration of which is given herewith. It is certainly something new and novel in the line of wrenches, and is well described as being a complete departure from the forms previously in use. Primarily, it is a pipe wrench, but it is also adapted to a multiplicity of wants in other fields of work. It will be found an

only by the strength of the party using it. Another advantage, it will let go as quickly as it takes hold, no loss of time being made in adjusting it to the requirements of the work to be done. The manufacturers will be pleased to send full information in regard to this new and novel device, which will doubtless meet with an extended sale after its introduction.

#### The U.S. Mason Jar Wrench.

C. A. Powell, 387 Kinsman Street, Cleveland, Ohio, is offering the Mason jar wrench herewith illustrated. It is

THE U. S. MASON JAR WRENCH.

described as being constructed on the lever principle, designed to give an absolute grip and an equal pressure around the cover by means of an adjustable device. The handle is so connected to the claws or rings, it is explained, as to compress them with just sufficient force to overcome any tendency to slip, and yet not grip the cover with more pressure

admirable wrench for use in connection with automobile construction and repair. The Eagle Wrench is made from the best quality of hardened steel forgings, and will take any size of pipe or nut from 1/8 to 3/4 inch in diameter. As may readily be seen by reference to the accompanying cut, the construction is the simplest possible, requiring no adjustment, being always ready for use on any size of object within its range, while its grip is instantaneous and its tenacity limited

than is necessary, thus obviating the risk of cracking the glass or crushing the cover. It is pointed out that the wrench grips the cover around the top, so that the pressure is sustained by the glass disk, making it impossible to crack or break the jar. It is claimed that with the wrench a jar can easily be sealed air tight, and that no matter how tightly the cover may stick, it can be easily removed without prying under with a knife.

#### Help Wanted.

A. N. JACOB, 272 Bowery. New York. is in need of a well-posted Hardware clerk, who, if capable of filling the place, would receive a satisfactory salary and find a permanent position. Call and see him.

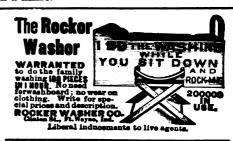

#### Situations Wanted.

HARDWARE CLERK.—A young man, aged 20 active and energetic, self-reliant and competent, would like a position in a wholesale Hardware store, where strict attention to business and ambitious application would merit early advancement. Address G. G., care HARDWARE, 275 Broadway, New York.

ADY BOOKKEEPER.—A young lady assistant bookkeeper or entry clerk, with moderate ideas as to salary, desires a place in a Hardware store, wholesale preferred. Has had several years' experience, and is fully competent. Address W. W. W., care HARDWARE, 275 Broadway, New York.

#### Side Line Wanted.

NEW YORK AND VICINITY.—A gentleman now representing a first-class line of Hardware would like to add one or more lines of importance for New York and vicinity. Best of references as to experience and ability. Address B. H., care HARDWARE, 275 Broadway, New York.

## ARE YOU INTERESTED IN SEED SOWERS?

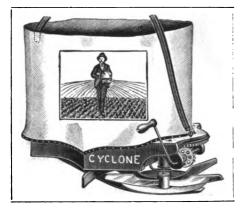

If you are we have a good proposition to make you.

Our Seeders have been on the market for over 25 years, and a large demand has been created by advertising.

## THE CYCLONE SEEDER

(Every one Warranted)

POSSESSES THE FOLLOWING POINTS OF SUPERIORITY:

1st. The machine is framed together in a manner to give it strength and durability.

2nd. It sows all kinds of grain and grass seed.

3rd. It has a slope feed board.

4th. It has a vibrate feed agitating seed from bottom which is the only correct way of agitation.

5th. It has crank shaft above distributing wheel—avoiding tiresome position of the arm and of seed being continuously thrown against hand.

6th. It has a distributing wheel 11 inches in diameter with 8 inch disk, cut and pressed out of a single piece of tin.

7th. It has an arch cut out of the side of machine so that machine fits easy and close to body and hangs in the most convenient manner, without any support or assistance of the hands.

#### New Incorporations, Etc.

Baltimore, Md.—The Monumental Manuspecialties, has been incorporated by Jacob in the near future from \$250,000 to \$300,000. W. Hook, Walter Snyder, Charles Hook, C. Howard Hook and Stanley K. Green. The capital stock is \$50,000.

Buffalo, N. Y.-John E. Smith's Sons Co. has been incorporated to manufacture can- Detroit and occupy the building originally ner's tools, etc.; capital, \$100,000. Directors, Edwin R. Smith, Alfred F. Smith and March 1. Matilda Smith, of Buffalo.

been incorporated to manufacture Hard- four-story factory. ware; capital, \$125,000.

Phelps, N. Y.-A new manufacturing company has been organized here to be known as the Lawrence-Bostwick Manufacturing Co., limited. The new company succeeds the S. M. Lawrence Co., and will manufacture the new star cream separator, a general line of tinware and specialties. The officers of the company are: G. H. Parmalee, president; R. E. Connolly, vicepresident; W. A. White, secretary and treasurer; S. M. Lawrence, superintendent; J. R. Bostwick, general manager.

Pittsburgh, Pa.-The McKinney Manufactoring Co., extensive manufacturers of hinges, door hangers and kindred products, at Allegheny, will be incorporated. Material extensions to the present works are being considered.

#### Changes and Improvements.

Bristol, R. I.—The new industry that has located in the brick building known as the "old sugar house," will commence the manufacture of metallic frame window screens. The firm will employ about a dozen hands in starting up, but intends to increase the number after the work is well under way. The company consists of Ezra Dixon, Jr., of this town, and Edward Prest, of Boston.

Cleveland, O.-E. W. Bissell and others, the owners of the Standard Lighting Co., have transferred their property and factory buildings on Perkins Avenue to the incorporation which now controls the vapor stove business of the country.

New Britain, Conn.—The Landers, Frary & Clark Hardware works will put up a large addition to its factory on the lot in the rear of the present buildings facing on Winter Street. The building will be two stories high and will contain a rolling barrel and storage rooms. Work on it will be commenced in the Spring.

the rear of its buildings on Church Street treasurer, O. B. Wilmarth. near the railroad track.

Streets.

Piqua, O.—The capital stock of the Fafacturing Co., for manufacturing tin vorite Stove Range Co. will be increased

# BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, imments, etc., will be gladly received, and promptly published.

#### New Companies, Agencies, Etc.

New York, N. Y.—Non-Slipping Rubber Tire Co. has been incorporated. Capital, \$100,000, and directors: Alonzo B. Cornell, Alfred F. Mansfield, of New York city; Clarence E. Welphey and J. Ballou Anthony, of Brooklyn, and John R. Townsend, of Arlington, N. J.

#### Changes and Improvements.

Indianapolis, Ind.-Carl G. Fisher, the progressive motor vehicle and bicycle dealer, has turned his business into a stock company, incorporated for \$10,000 under the name of the Fisher Automobile Co. The purposes are to handle motor vehicles, bicycles. carriages, buggies, etc., in Indianapolis and the State of Ohio, and to appoint agents in other States and foreign countries. The directors are Horace L. Hewitt, Carl G. Fisher and Merton H. Bintley.

Indianapolis, Ind.—The Mohawk Bicycle Co., which makes the Rumsey bicycles, has decided to cease the manufacture of motor bicycles and contemplates engaging in the manufacture of automobiles.

Ithaca, N. Y.—The new annex to the south end of the Ithaca Gun Co.'s factory at Fall Creek is nearly completed, and the company expects to be running with its merly interested in the concern, has purincreased capacity early this month. The chased the unfinished stock and material of addition to the factory is 90 feet long and the bankrupt Cooperative Cycle & Motor will furnish more space for every department of the business.

Los Angeles, Cal.—The W. H. Hoegee the entire business of the E. H. Crippen 587 Main Street. Cycle & Supply Co., of the same city.

Milwaukee, Wis .- The Merkel Mfg. Co., heretofore owned by George Merkel, is now an incorporated stock company, incorporated under the laws of the State of Wisconsin, with \$37,000 capital stock. At a meeting of the stockholders the following officers were elected: President, Theo. Jonas; vice president, O. C. Uehling; secretary and treasurer, W. J. Merkel; manager, J. F. Merkel. George Merkel, who has been the mainstay of the firm so far, will not take an active part in the business of the company, owing to the pressure of other affairs. The new firm is particularly fortunate in securing the support and services of Mr. Jonas, who is a leading Milwaukee bicycle builder and dealer.

Ord, Neb .- Morris & Stroup, handling bicycles, etc., have been succeeded by P. S.

Port Clinton, O.-William Coger, bicycle dealer, has been succeeded by Coger Bros.

preme Court has granted an order dissolv- port Fire Arms Co., the following directors ing the Rochester Cycle Manufacturing Co. were chosen: Amos T. Otis, William H.

of which amount \$14,601.10 is in cash.

#### NEW IDEA A

THE ACME OF PERFECTION, JENNINGS NEW A7% SAW. For Keen Kutting it stands alone.

Just the width you want. This saw is on new old lines. 6 inches wide at butt, 116 inches at point. A saw that has been worn down by constant use becomes invaluable to the owner, as it can be used for many purposes where a full width saw is unwieldy. They are made of the best refined spring steel, ground four gauges thin on back, full beveled filed and set, carved and full polished handle, four improved brass screws. For fine work it stands alone.

# Bissell's patented improvements

given Bissell's "Cyco" Bearing Sweepers the distinction of being head and shoulders above any other carpet sweeper ever made

"Cyco" Bearings

reduce the friction, run easier, make no noise, raise no dust and do not require oiling. Found only on Bissell Sweepers.

**Dust Proof Axle Tubes** 

prevent hairs, threads and ravelings from winding about the axle rods. Found only on Bissell Sweepers.

Anti-Raveiler

prevents dust, hair and thread from working into the holes in the end of the brush and destroying the free action of the sweeper. Found only on Bissell Sweepers.

Reversible Bail Spring

prevents the sweeper from tipping when drawn quickly across the carpet. Found only on Bissell Sweepers.

**New Handle Fastener** 

The only firm and permanent handle fastening device used on carpet sweepers. Found only on Bissell Sweepers.

**New Furniture Protector Holder** holds the braid band firmly at the corners of the sweeper. Found only on Bissell Sweepers.

on Bissell Sweepers.

No single feature ever made a successful carpet sweeper, but it's the grand combination of these patented improvements that has made Bissell Sweepers famous throughout the entire world.

Bissell Sweepers are the only sweepers isold at fixed retail prices, assuring the dealer a good large margin of profit.

WHY IS THE THE BEST ROTARY

making machine so light remning and almost noiseless.

2.—The tub is made of Louisiana Red Cypress Lumber, cherry finish; the legs are solid with tub (not removable, breakable legs fastened with screws).

3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hots ap-suds, and cleaning them without rubbing them to pieces.

4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.

5.—The tub has a wringer box fastened with steel brackets.

6.—The lid on the tub closest tight, no escape of steam.

**WASHING MACHINE?** BECAUSE-

-It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.

The tenth annual meeting of the Hardware Club of New York will be held at the club rooms on Saturday, March 15, at 12:30 p.m. At a recent meeting of the board of governors, the following named gentlemen were selected as a committee to nominate five gentlemen to serve as governors of the club for the three succeeding years: John Day, of H. L. Judd Co., chairman; Christian T. Stork, of the Columbian Hardware Co.; George F. Wiepert, of Sargent & Co.; Edward Townsend, of the Importers' & Traders' National Bank, and William S. Pitcairn. The members of the board whose terms of office expire with the annual meeting of March 15th, are as follows: George H. Sargent, Arthur G. Sherman, Robert Sickels, Robert H. Swayze and Edward C. Van Glahn. The committee have decided to rename these gentlemen as their successors.

The following named gentlemen were unanimously elected to membership in the Hardware Club of New York at the February meeting of its board of governors:

R. W. Jones, Jr., Broadway and John Street, New York. Burton W. Thompson, 105 Chambers Street, New York. Robert G. Newberger, 66 Reade Street, New York. T. B. Laska, Holmes & Edwards Co., Bridgeport, Conn. Charles B. Holderidge, Franklin, Pa.

Alfred W. Barnett, G. & H. Barnett Co., Philadelphia, Pa.

Henry W. Scattergood, G. & H. Barnett Co., Philadelphia, Pa.

R. A. Chapman, Baltimore, Md.

T. N. McCauley, Chicopee, Mass.

The membership now stands as follows: Resident, 600; non-resident, 148; on waiting list, 28.

Mortimer C. Ogden, who has for the past eleven years been the president of the Southington Cutlery Co., of Southington, Conn., resigned that position on account of ill health, February 27th. A meeting of the directors will be held on March 12th for the purpose of electing his successor. The Southington Cutlery Co. was organized in 1868, with a capital stock of \$50,000, which in 1883 was increased to \$300,000. A majority of the stock is owned in Southington. Charles D. Barnes, president of the Southington National Bank, is acting as treasurer of the company, which office Mr. Ogden also resigned.

At the annual meeting of the Albany Hardware and Iron Co., held Monday, March 3d, 1902, the directors and officers of the previous year were re-elected, viz.: Chas. H. Turner, president; Jas. K. Dunscomb, treasurer; Wm. B. Wackerhagen, secretary, the remaining directors being George I. Amsdell, Peter Kinnear and Seth Wheeler.

Frederick Pfeiffer, 88 Chambers Street, New York, who has for so long a time represented the Payson Mfg. Co., of Chicago, as their exclusive Eastern agent, reports having on hand at present a most complete stock of their numerous specialties, such as Casters, Transom Lifters, Signal Sash Locks, etc. Prompt deliveries may be anticipated on orders. The trade on the territory covered by him, which is everything east of Buffalo and Pittsburgh, has never so generously entered specifications for future and immediate delivery as during the past two months. "Fred" is a hard worker, and his never-failing diligence deserves the success he has achieved.

The Clipper Lawn Mower Co., incorporated, Norristown, Pa., have let the contract for the erection of their new plant at Main and Franklin Streets, in that city. The main building will be of brick, 150x40 feet and two stories in height. When completed this will enable them to largely increase the capacity of their present plant. The matter of an installation of an equipment of machinery for the new factory will be entertained at an early date.

Peters Cartridge Co., Cincinnati, Ohio, Eastern department, 80 Chambers Street, New York, T. H. Keller, manager, announce that they are again represented at the Sportsmen's Expositions at Madison Square Garden, New York, March 5-19, and at Boston, February 22 to March 15. They state that they will endeavor to provide suitable and comfortable headquarters for their friends at each of these popular expositions.

The season for spraying pumps is at hand, and the Barnes Mfg. Co., Mansfield, Ohio, on another page of this issue call attention to their new "Perfection" spraying pump, which can with ease be taken entirely apart to clean or repair. A 200-page catalogue of their productions may be had for the asking.

The Meriden Cutlery Co., Meriden, Conn., and for the past twelve years located at 80 Chambers Street, New York, on March first moved their New York depot to 88 Chambers Street, four doors above their old address. This popular cutlery house, which was established in 1832, manufacture almost everything in the way of superior high-grade cutlery for household use. Their line of Butches' and Cooks' Knives has long been known as of reputable excellence. The New York business is managed by Matthew Gildersleeve.

Sargent & Co., New Haven, Conn., and 149 to 153 Leonard Street, New York, among the special advertising features connected with the Gem Food Chopper, are mailing to the trade a number of mailing cards of large dimensions, forming a set of twenty different styles, and in several colors, calling attention to the selling merits of the Chopper. One side of the card has printed on it a recipe from their Gem Chopper Cook Book, recently issued, to which is added an illustration taken from the same series.

The annual meeting of the National Retail Hardware Association will be held on March 19-20, at Chicago. During the past year quite a number of State organizations have affiliated with the National Association, and several others have expressed an intention of doing so. W. P. Lewis, New Albany, Ind., is president, and M. L. Corey, Argos, Ind., is secretary.

#### New England Hardware Dealers' Association.

The Spring meeting of the New England Hardware Dealers' Association will be held at the Quincy House, Boston, on Wednesday, March 12. Dinner will be served at 5.30 P. M., after which a business meeting will be held. The Hon. Willard Howland, of Chelsea, will be the guest of the evening, and will give an address on "The Duty of the Business Men to the State." The entertainment committee is composed of E. Loring Richards and George J. Mulhall.

The Circulation of "Hardware" is Larger Than That of Any Other Paper m the United States Devoted Exclusively to the Hardware Trade.

#### Editorial Trade Review.

If any documentary evidence were needed, it could readily be furnished, showing the strength and persistence of the movement among retail Hardware dealers for organization to maintain their rights as legitimate dealers against unrighteous competition. The reports of the numerous State Associations of retail dealers who have held conventions fill many pages of the Hardware trade journals during the month past, and represent in a dignified and intelligent manner the kind of men who are the leading spirits in the Hardware interests of the day.

This movement for organization among dealers of any particular industry is one characteristically American. In no other country on the face of the globe is such frankness shown in regard to methods that enable commercial success to be achieved; in no other community is it possible for criticism of all grades of ability to be so consistently listened to, so willingly received and profited by, so freely accepted by those desiring reform in old-fashioned methods, as in these bodies of harmonious workers. Honesty and integrity underlie every step in the progress achieved under such conditions. No wonder our wholesale merchants and our intelligent, far-seeing manufacturers so promptly endorse a movement that means so much when commercial advancement, morally and financially, is the object each individual is desirous of obtaining. This consistent backing by those who form the credit department of our trade circles, of itself gives to a movement of such importance its highest justification.

Never has the evidence been so manifest as now of the growing sentiment in favor of the consolidation of such business interests for the general good. Larger accessions of numbers have taken place during the year. Greater interest has been taken in the proceedings; abler papers prepared and read to attentive students of business progression; a community of interests thoroughly established, so noticeable in the mutual insurance feature, so prominently canvassed and acted upon, and the closer harmony obtainable through the fostering of the National Retail Hardware Dealers' Association, through whose more vigorous labors much responsibility is lifted from the officers of the State Associations, and a greater degree of respect is paid by manufacturers and jobbers to just demands so persistently urged and conscientiously insisted upon.

The natural channels through which the transactions should flow of such an important industry as ours, indicate the dependence of the manufacturers upon the jobbing fraternity for distribution in certain sections, and the care and attention given by the jobbers to the retailers, who create the demand, stimulate the wants and are the final distributers of the products which create the wealth, the attainment of which is the natural desire of all who follow a business for a livelihood.

One of the most commendable features in this extensive movement for trade consolidation of mutual interests is the encouragement given to it by the National Hardware Association, whose energetic representative, Secretary-Treasurer Fernley, was present at each convention possible to reach, to explain the importance of the association principle and show how thoroughly their efforts for the accomplishment of good results is appreciated and endorsed by the National Association, which rarely hesitates very long in removing causes for friction that may arise that would in any way impede the natural relations of those two great divisions of Hardware distribution.

But few changes in prices that assume any special importance have interfered with trade transactions. The principal worry seems to be in regard to any commendable promptness in the delivery of goods already ordered under specifications as to future dates. The difficulties that have beset all forms of transportation during the past fortnight in consequence of storms and accompanying high water, have in many cases been formidable, and not only deliveries of the finished products have been delayed, but also the supply of raw material, without which no factory can show its usual production or predicate the possibilities of the immediate future. This naturally increases anxieties already too prominent.

The consolidation movement seems to be in the air. When old companies like Russell & Erwin Mfg. Co. and P. & F. Corbin, after so long a period of individual prominence, deem it advisable to create more favorable conditions by consolidation, it creates or rather adds to the general belief that the end is not yet. The trade have reason to believe the present year so auspiciously begun in this regard, may have to note a number of trade changes among the manufacturers of leading lines of Hardware with a view to lessening competition, which possibly may not prove to be the result.

#### Death of A. F. Shapleigh.

On Thursday evening, February 27th, A. F. Shapleigh, one of the pioneers of the Hardware trade in St. Louis, passed peacefully away at his residence in that city, at the advanced age of ninety-two years. He had been in failing health for several years past, but retained the full possession of his faculties to the last. He was one of the pioneers in the commercial growth of St. Louis, and a potent factor in every phase of its prosperity during all the earlier years of his life.

Augustus Frederick Shapleigh was born at Portsmouth, N. H., January 9th, 1810. Mr. Shapleigh began his business career by accepting a position in a Hardware store at a salary of \$50 a year. At the end of the first year he embarked as a sailor, making several voyages to Europe and spending three years upon the sea. His mother and sisters finally induced him to re-enter the Hardware business in his native city, where he had served his first year of business life. After some years at home he accepted a position with the Hardware firm of Rogers Bros. & Co., at Philadelphia, with whom he remained until 1843, having become a junior member. The house at that time determined upon a branch in St. Louis and Mr. Shapleigh was assigned to its management. It opened there that year under the name of Rogers, Shapleigh & Co., which upon the death of Mr. Rogers became Shapleigh, Day & Co., so continuing until 1880, when it was merged into a corporation known as the A. F. Shapleigh-Cantwell Hardware Co. In 1888 it again changed to the A. F. Shapleigh Hardware Co, with Mr. Shapleigh as its president and his sons, Frank, vice-president; Richard W., second vice-president, and Alfred Lee, secretary-treasurer. The company was burned out in 1886, but rebuilt and enlarged until it was one of the most extensive wholesale establishments of its kind in the West. The firm is now known as the Norvell-Shapleigh Hardware

The deceased retired from active interest in it last May, after continuous service since 1843. Mr. Shapleigh was identified with many prominent institutions in St. Louis at different times. He was trustee and director of the State National Bank of St. Louis, formerly known as the State Savings Institution, and for twenty-eight years was a director of the Merchants-Laclede National Bank, resigning that position in 1890 to his son, Alfred. He was for a long time president of the Phœnix Fire Insurance Co. and was vicepresident of the Covenant Mutual Life Insurance Co. He was interested in valuable mining properties and other industries, and, on retiring last July from active management, retained his stock in the institutions. He is survived by four sons and one daughter—A. F. Shapleigh, Jr., Dr. J. B. Shapleigh, dean of the department of medicine of Washington University; Richard W. Shapleigh, vice-president of the Norvell-Shapleigh Hardware Co.; Alfred L. Shapleigh, treasurer of the same company, and Mrs. J. Williams Boyd. Frank, another son, died one year ago.

The deceased is also survived by several grand and greatgrandchildren.

#### Death of Henry K. Sheldon.

Henry K. Sheldon, who was well known in his day as the head of the leading Hardware firm of Sheldon, Hoyt & Co., of New York, died at his home in Brooklyn on March 2d from a complication of diseases, after an illness of nearly a year. He was born in Windsor, Conn., seventy-six years ago, and came to Brooklyn when five years old. After studying some time abroad, he went into business with his father, James Sheldon, who was the senior member of the firm of Sheldon & Phelps, one of the largest wholesale Hardware concerns in the country at that time, and located on Chambers Street, being one of the Hardware pioneers on that well

known Hardware street. Upon the death of his father, Mr. Sheldon entered the firm, becoming at that time the senior member of the firm of Sheldon, Hoyt & Co. He retired from business about thirty years ago, and has since been devoting himself to his financial interests and to music and art, of which he was a patron. His collection of paintings is considered to be one of the finest in Brooklyn. Mr. Sheldon was for a number of years president of the Brooklyn Academy of Music, and also president and one of the first members of the Brooklyn Philharmonic Society. He was a member of the First Presbyterian Church of Brooklyn, the Rembrandt Club, of Manhattan; president of the board of directors of the Brooklyn Academy of Music, the American District Telegraph Co., the Fidelity and Casualty Co., the Brooklyn Savings Bank, American Exchange Bank, Brooklyn Trust Co. and the Long Island Savings and Trust Co. He was also trustee of the Brooklyn Art Association and of the Brooklyn Institute of Arts and Sciences. He was himself an expert musician, and had studied abroad. It was he who introduced Theodore Thomas to the musical world. He leaves a widow and one child, Anna Embury Sheldon, wife of the Rev. James Townsend Russell, rector of St. Thomas Church, Brooklyn, and two brothers, James O. Sheldon, of East Fortieth Street, and Lucius M. Sheldon, of Montague Street, Brooklyn.

#### The Sportsmen's Show.

Madison Square Garden has been undergoing the process of transportation that annually changes the ampitheatre into a great composite camp for sportsmen, the occasion being the eighth annual show of the National Sportsmen's Association which opened on Wednesday of last week.

A small army of workmen have been employed under the direction of Manager Dressel, in creating the great wooded island in the centre of the arena, and in producing the mountain and forest effects at the Fourth Avenue end of the building, typical of a section of the Adirondacks. The bed of the mountain stream, fed by cascades and waterfalls from these mountains and extending around the Island, is now completed and gives some idea of the charming pictures that have been produced. Hundreds upon hundreds of pine, spruce and hemlock trees have been delivered at the building and put into place, hiding the iron girders and columns as well as the seats and box fronts of the amphitheatre. Game parks, aviaries and aquariums are laid out and placed in position, while camp supplies, boats, canoes and sportsmen's equipment galore, constituting the exhibits, have come in by The last of the exhibits have been completed truckloads. and the Sportsmen's Show of 1902 has entered upon its career of two weeks duration.

Among the interesting features of the show this year is the display of boats, which is the most extensive in the history of the show. Power launches of from 16 to 25 feet in length, and some of which are most elaborately equipped; motors for marine and automobile purposes; canoes, ducking boats, sneak boats and row boats will be shown in great numbers and variety.

The camps of the Indians, the Adirondack and Maine guides, the Long Island baymen, Camp Rainbow, and other organizations, their occupants in the garb of woodsmen, hunter or native American will add to the picturesque effect of the scene. The game parks with their specimens of bison, moose, deer, caribou and antelope; the bear cages, the fox yards and the temporary domiciles of other fur-bearing animals, are even larger and better filled this year than last. The magnificent display of mounted birds, birds' nests and eggs, belonging to Mr. John Lewis Childs, of Floral Park, L. I., occupy more than one thousand square feet of floor space, on the northern side of the arena, and form one of the most interesting features in the show.

From the wilds of Canada will come Joe Labrea and his assistant, Ferdina Voyer, two typical representatives of the Canadian trapper. Joe is a descendant of a long line of his craft, his father and his grandfather before him having followed the business all their lives. Joe has but one arm, the missing member having been chewed off near the shoulder by a big bear that had become fastened in one of the hunter's traps. He brings with him all the devices known to his craft in the work of trapping, together with the two dogs "Chasseur" and "Gaspe" used in hauling his furs from trap to trap and finally into the settlement.

A Canadian trapper's route is from 40 to 50 miles in length. Joe's route is 46 miles long, and it requires about two weeks time to go over it. A trapper's route, under the laws of Canada, is handed down from father to son as "property." The route is marked out, and its ownership indicated by marks upon the trees. The trapper is subject only to the laws governing such pursuits and not to the mandates of the land owners over whose estate his route may lead. Even a change of ownership of lands does not affect the rights of a trapper on his route. Intruders upon an established route, or meddlers with his traps are severely dealt with by law, as a rule, and sometimes by the offended trapper.

Joe will daily give illustrations of the trapper's life, with his logs, sleds, snow shoes and traps.

The members of the Camp Rainbow Club, composed of lads from twenty or more of the best known private schools for boys in and about Greater New York, have pitched their camp on the banks of the stream near the Fourth Avenue end of the Garden, and attired as guides, will from time to time, conduct parties of visitors over a deer trail that leads over the mountains.

#### HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEB. 17, 1902.

312,251. SASH FASTENER, F. M. Case, Denver, Colo.

312,292. Convertible Shears for Cutting and Marking, I. Pribyl, Chicago, Ill.

Door Hanger, E. T. Prindle, Aurora, Ill. 312,294.

312,316. LIFTING JACK, J. Barrett, Allegheny, Pa.

Door or Window Screen, O. G. Newton, Tren-312.374, ton, Mo.

312,583. WEIGHING SCALE, C. Richtmann, Newark, N. J. PATENTS ISSUED FEB. 18, 1902.

WASHBOARD, M. E. Bingaman, New York, N. Y. 693,364.

693,421. TRAVELING LAWN SPRINKLER, A. Munch, St. Paul, Minn.

693,463. Ax Helve Grip, C. W. Todd, Orwell, Vt.

693,518. GLAZIER'S TOOL, G. W. Hamilton, Chicago, Ill.

693,546. HINGE, C. M. Johnson, Milwaukee, Wis.

DOOR HOLDER, A. J. Rosentreter, Boonton, N. J. COMBINED DOOR CHECK AND CLOSER, E. Cliff, 693,588.

Newark, N. J.

PATENTS EXPIRED FEB. 24, 1902. ..

RAZOR STRAP, B. F. Badger, Charlestown, Mass. 312,603. WINDOW SCREEN, M. L. Whitcomb, Muskegon, 312,685. Mich.

312,746. WAGON JACK, A. Mote and J. B. Brewster, Oskaloosa, Iowa.

312,805. SAFETY GAS BURNER, G. W. Browne, Brooklyn, N. Y.

312,949. COMBINED SCREEN & STORM DOOR, F. F. Barber, DeKalb, Ill.

PATENTS ISSUED FEB. 25, 1902.

693,861. WRENCH, J. H. Hobson, Mattoon, Ill.

693,875. CASTER SOCKET, W. Livingston, Flushing, N. Y.

693,893. Step Ladder & Shelf Combined, C. E. Page, Linwood, New Zealand.

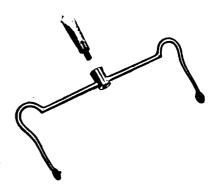

693,993. WINDOW SCREEN, S. W. Benson, Denver, Colo. 694,273. Spring Hinge, A. S. Held, Freeport, Ill.

#### Bissell's New Handle Fastening Device.

The Bissell Carpet Sweeper Co., who constantly aim to increase the demand for their sweepers through valuable patented improvements that they are making from time to time, feel certain that the trade and consumer alike will welcome

their new feature that they are just introducing in connection with their "Cyco" bearing sweepers. It is a handle fastener which does away with the old threaded wood handle substituting in its place a malleable iron screw that makes the handle present greater utility. While they have always aimed to produce improved bail sockets and handle threads, yet, there is no disguising the fact that on account of the users of carpet sweepers either failing to screw the wood handle in firmly or otherwise falling in the error of removing the handle too frequently, the thread on the handle would wear out, rendering it useless and causing a great deal of annoyance to the user. Many attempts have been made in the past to produce a satisfactory handle fastener, but not until now has anything been perfected fully meeting all require-The Bissell Carpet Sweeper Co.'s new handle fastener consists of a small iron screw with upper end enlarged where it enters the wood handle so that it cannot possibly fall out, this screwing into the iron bail, there to remain firmly for all time. This is one of the most expensive handle fasteners ever produced, and also the best Each bail socket must be milled out to insure abof solute uniformity of size, the lower end the socket must be threaded, and the attaching

milled and then threaded. This is one of the most valuable improvements on carpet sweeper handles that has been made in some years, and the Bissell Co. announce to the trade that within the next few months all their "Cyco" bearing sweepers will be furnished with their new handle fastener. It is worthy of note that this handle fastener is so constructed that no matter how the wood handle may shrink, the malleable iron attaching screw cannot fall out. In this device the more tightly it is screwed into the bail socket. the more firmly is the attaching screw refained in the wood handle. The attaching screw is made of malleable iron so as to positively insure it against breaking.

The Times, London, was first printed on Koenig's machines, November 28, 1814.

#### New England Iron and Hardware Ass'n.

The ninth annual dinner of the New England Iron and Hardware Association, at the Hotel Vendome, Boston, on February 25, was a very interesting occasion, attendance being about 130. During the serving of the dinner an orchestra played and the company sang popular songs. The president, Allan J. Chase, gave a special welcome to the four "fathers of the Hardware trade" present, Messrs. G. C. Carpenter, of Providence; James N. Frye, J. B. Sargent and D. Arthur Brown. In concluding, he introduced as toastmaster Charles Clark Adams, who was given an ovation, the company rising and cheering and finally joining in the chorus: "For he's a jolly good fellow."

Mr. Adams, after acknowledging the welcome, said: "I've heard it said that there are a good many Adamses lying under the sod, but I want to say that here is one who lies above the ground—he sometimes has to in the trade." After reading a letter of regret from Governor Crane, Mr. Adams introduced Frank Dickerson, of New York, the head of the American Tin Plate Co.

Mr. Dickerson, in speaking upon "Consolidations and Their Bearing Upon the Mercantile Interests of the Twentieth Century," said, in part: Industrial consolidations, I believe, will grow and increase in number during the twentieth century. Such consolidations are beneficial because they produce specialists and broad-minded and able men. Consolidations succeed in the same way the individual succeeded, but, while men are broader to-day, the mental vision of man has not reached its zenith. We can see farther than our grandfathers could, but the twentieth century will see men capable of dealing with fourteen or fifteen figures as readily as our grandfathers dealt with seven figures. Commercial success means efficiency, and consolidations are producing efficient men. In some States consolidations are moulded and framed by laws, many of which are stupid and some of which are beyond the comprehension of laymen. Laws have tried to poke out the eyes of consolidation, but have failed to do so. Yet there is one law, public opinion, which is right when it demands publicity about corporations.

The present era of good times has been helped by the stability of prices brought about by consolidation, and, when bad times come, the same cause will be a help. Consolidation, too, stifles competition, and thereby largely prohibits speculation. Large consumers are endeavoring to deal directly with the consolidations, but this will not grow much.

Speaker James J. Myers, of the Massachusetts House of Representatives, followed Mr. Dickerson with an address on "The Attitude of Massachusetts Toward Consolidation." As a general proposition, he said, it may be accepted as true that where competition ends some kind of supervision by outside authority must begin. This rule has been applied to all public service corporation in Massachusetts.

In considering industrial corporations, Mr. Myers continued, there are to be considered: first, what would be the wise theory if all the States applied it, and, second, what is the practical thing for Massachusetts to do under existing conditions. Industrial corporations are good if they are not over-capitalized. But the moment the stock is watered there is a tendency to collect a dividend upon the water. It is true that in the case of some corporations there are values which cannot be exactly appraised. I don't contend that we must capitalize only upon visible property, but that there should be some wise, judicious authority which should settle the amount of capitalization to be allowed in each case. I hope that Massachusetts won't stand for a narrow policy, based on merely tangible values, but I also hope that the day is far distant when she will allow a vacuum to be capitalized under her laws. More Massachusetts corporations are now organized out of the State than are organized in it, but

it is better that they should go outside than that we should have such a lack of restrictions as exists in Maine.

The next speaker was the Rev. Dr. George L. Perin, pastor of the Every-Day Church, on "The Task and the Man."

The last speaker was H. B. Lupton, of the Oliver Iron and Steel Co., of Pittsburgh. Speaking of the tremendous activity which exists in that city, he said there is a scarcity of iron, and the railroads cannot furnish cars enough. The railroads themselves, he explained, were the chief consumers of iron. Over 11,000,000 tons of steel were used in making cars alone. Immense quantities of metal are also used by steamship companies and in big buildings.

#### Northern Refrigerator Co.

Among the desirable lines of refrigerators that are being placed on the market this season, mention may be especially made of those marketed under the name of the "Glacier," manufactured by the Northern Refrigerator Co., Grand Rapids, Mich. They manufacture a popular line of Mineral Wool Insulated Refrigerators that they claim after a thorough investigation forms the best insulation obtainable for the purpose, mineral wool being a vitreous substance having the appearance of wool, but made from the slag of blast furnaces or other similar material, which is accomplished by throwing a jet of steam against a small stream of the liquid glass. In this manner it is so expanded that a given space contains 92 per cent. of air, and only 8 per cent. of the original substance. This air being confined and held in position, cannot carry heat, and consequently makes the best known insulating material. Another good feature in regard to it is that it is indestructible and will not mold nor smell. The sheathing used in this line of refrigerators is also referred to by the manufacturers as being superior, consisting of the Bird Patent Water Proof Odorless Sheathing. It is called charcoal by some manufacturers, and in some cheap grades is really the only material used for insulation, a single layer being considered sufficient. By reference to a cut shown in the catalogue of the Glacier Refrigerators, it is seen that eight walls for insulation are provided, from the outside wood to the extreme inside zinc, and including air space, three rows of sheathing, mineral wool and the wood. They make a full and complete line of Refrigerators under this name, and make a particular point by giving in connection with an agency for the sale of this line of refrigerators ample stationery for distribution to fully canvass the territory, and in the shape of small catalogues showing a complete line, and also booklets on "operating the refrigerator," very thorough and complete, and making very attractive reading matter.

#### Canada Corundum.

The best advertisement is a satisfied customer. Testimonials like the following received by the Canada Corundum Co., of Toronto, Canada, would surely seem to emphasize this fact.

MONARCH EMERY & CORUNDUM WHEEL Co. Grinding Machinery. Emery & Corundum Wheels. Campen, N. J., Jan. 23, 1902.

The Canada Corundum Co., Toronto, Canada: Gentlemen: We enclose you an order for a car load of

your Craig Mine Crystal Corundum and trust that you will see that it reaches us without delay.

Now that we are accustomed to using it, we frankly admit all that you claim for it. It is our opinion that wheels made from it with our new bond cut faster, cleaner and colder than wheels made of any other abrasive. Reports from our customers show them to have formed the same high We propose adopting it almost exclusively opinion of it. and shall want it understood that you will continue to sup-Yours truly, ply us.

MONARCH EMERY & CORUNDUM WHEEL Co., I. R. Davis, Pres.

#### Peters Cartridge Co.'s Exhibit in Boston.

The space occupied by The Peters Cartridge Co., of Cincinnati, Ohio, at the Boston Sportsmen's Show is very attractively arranged. It is draped with maroon cloth, and the most conspicuous object there shown is a magnificent painting, consisting of an officer's felt hat hung over a belt containing cartridges, to which is attached a holster containing a Colt army revolver. Beneath the holster is the wonderful world's record target made by Capt. C. S. Richmond, of Savannah, Ga., which is made up of 100 shots counting 918 points. This target was shot at a range of 50 yards, and the location of each shot shown. Beneath the target on a table is an open box of Peters Cartridges, while scattered about are cartridges and exploded shells. The whole is reproduced in colors, and is marvelous in its effect. So realistic is the painting it seems as though one could pick the revolver from its holster. This target was made with Peters Cartridges, and as a souvenir of the event the company had this painting made. It is 36x18, mounted on a green mat and framed in a beautiful gold frame surrounded by electric lights. A miniature reproduction of the picture in colors is presented to visitors, and is beautiful enough to be highly prized.

On each side of this painting are two fac-simile record targets made with Peters Cartridges. One is the full size target of Capt. Richmond; the other represents a 50 shot pistol record of the United States made by Thomas Anderton at Walnut Hill December 7th, 1901, which scores 476. Both targets are the Standard American targets, and were shot at a range of 50 yards, one with Peters 44 calibre factory loaded cartridges in a revolver; the other with Peters 22 calibre cartridges in a pistol.

The exhibit is in charge of T. H. Keller, the Eastern representative of the company, assisted by T. H. Keller, Jr., and several other gentlemen.

#### A New Cream Separator.

The Galesburg Cornice Works, Galesburg, Ill., are manufacturing for the trade a cream separator that separates cream from milk by the water process, which is now well known as a simple and effective process.

The goods are made in three sizes, 10, 15, and 20 gallon, from the best IXXX bright charcoal tin plate, and they

are nicely painted a red enamel, and decorated in gilt lettering, etc., wrapped in paper and carefully boxed, so that they are sure to reach the dealer in the best possible condition. There is a good demand for these separators, and dealers who are not selling them are losing opportunities for profitable business. A card addressed to the manufacturers will bring descriptive matter and quotations.

#### National Retail Hardware Dealers' Association.

The third annual meeting of the National Retail Hardware Dealers' Association will convene March 19-20, at the Palmer House, Chicago. There will be no open sessions. Two delegates from each of the following States, together with some of the State officers, constitute the members of this convention: North Dakota, Iowa, Missouri, Arkansas, Illinois, Wisconsin,

Indiana, Kentucky, Michigan, Ohio, Pennsylvania, Kansas, Minnesota. Reduced rates can be obtained by most of the delegates on the certificate plan through the National Association of Merchants and Travelers.

#### A Neat Souvenir Design.

J. D. Warren, of the J. D. Warren Mfg. Co., Chicago, while attending the convention of the Minnesota Retail Hardware Dealers' Association at St. Paul, distributed the up-to-date souvenir indicated in the following:

This excellent portrait of our royal guest, Prince Henry, has for its background the Masonic Temple, 354 feet high, a type of American architectural daring, which is in keeping with the advanced thought of wideawake Hardware men, demonstrated in the display rooms on the fifth floor of this building, as shown by the J. D. Warren Mfg. Co., Chicago.

#### Not in the Combination.

We have received the following communication:

Cincinnati, Ohio, Feb. 19, 1902.

MR. EDITOR: Our attention has been called to an article published in the February number of the St. Louis Sporting Goods Dealer, page 20, which states an impression seems to prevail that the Peters Cartridge Co. "are now in the agreement" with the Eastern Loading Companies. We wish to state that there is no truth whatever in this report, as we are not now, nor have we ever been members of any trust, combination or association. Neither does any combination, or member thereof own or control a dollar's worth of this company's stock. We are independent now, as we always have been and expect to remain.

(Signed.)

O. E. Peters, Pres't, The Peters Cartridge Co.

"A stranger came into the store this morning and bought every egg I had in the place," said the proprietor of the only grocery in the little Jersey village. "Do you suppose he was crazy?"

"Cracy? Well, I guess not," said the man at the mackerel keg. "He's advance agent for the man who is to lecture in the town hall to-night, and he isn't taking any chances.—
Yonkers Statesman.

Hayseed—Where is the durn gaslight in my room?

Hotel Clerk—You will find the electric light near the window.

Hayseed—Do you mean that old fish hook in a glass case? I turned the crank and the fish hook got red hot. Then I shut her off for fear it might bust.—Harper's Bazar.

## KY. RETAIL HDWE. & STOVE DL'RS ASSN.

The second annual meeting of the Kentucky Retail Hardware and Stove Dealers' Association was held in Louisville on February 25th and 26th, the place of meeting being the Liederkranz Hall. Tuesday morning was devoted to the enrollment of new members, payment of dues, and the cultivation of the general elements of sociability, many of the jobbers of Louisville being on hand to do their share toward entertaining the delegates present. The convention was called to order by President George P. Dehler, Jr., who delivered his annual address, from which we make several quotations:

PRESIDENT'S ADDRESS.

\* \* \* \* \*

Let us get together as one man and do something, and continue doing something until we have accomplished our purpose or know the reason why. If one resolution fails to bring about the desired result resolve again, and keep on resolving until we have found the correct resolution.

One drop of water continually dropping on one particular spot will eventually make a deep impression upon the hardest object. Granted that some of our manufacturers are hard objects to tackle, yet persistent drops of complaints, grievances and kicks will finally pierce them.

We have already made an impression. The eye of the manufacturer, the jobber, the catalogue house, the department store is constantly directed toward us, watching and waiting results.

#### JOBBERS RESPONSIBLE.

In my mind the catalogue house and the department store are the greatest evils we have to combat. I do not think it is necessary to go into particulars to describe their methods of doing business. Yet it may be of interest to some of you present here to-day to know that the catalogue houses carry a very small amount of goods compared to the amount of business done. And why should they when the jobber is willing to carry it for them?

I will not be so hard upon the jobber in this address, for we all know he has troubles of his own, and I believe the conservative and less grasping ones are realizing the error of their ways and are willing and aiming to mend them. They must learn that the retailer is their only friend, and without him they have little chance of existing as such.

It is not my intention at this time to touch upon every subject that may come up before this meeting. You know best your grievances as they exist, and I will say that this is the place and now is the time to make the confession.

The secretary, Paul Wagner, then read his report, which was substantially as follows:

#### SECRETARY'S REPORT.

In presenting to you this, my second annual report as secretary of this association, I shall, in as few words as possible, try to bring before your mind the work that has been done by your honored servant within the last twelve months.

On February 12, 1901, when the first annual meeting of this association was called to order at Lexington, we had 33 members enrolled. Of this number 25 were from Louisville alone. Before the meeting adjourned we had secured 11 new members, seven of them from Lexington. Since then we have enrolled eight more names to the list, making a total membership to-day of 52, representing 15 towns in the State. It has been the ambition of the secretary to increase the

It has been the ambition of the secretary to increase the membership to 100 within 60 days of this meeting. And I believe, with your assistance, it can be done. From correspondence received from various retail dealers throughout the State it would appear that they are finally awakening to the realization of cooperative action.

With an increased membership, and consequently a more satisfactory treasury, we think that much more can be accomplished in the future.

I would particularly call the attention of the retail dealer to advantages derived from reading one or the other of the various really good trade papers published. The subscription amount is so small that any dealer can afford to subscribe. They contain much that is of value to the retail Hardware

merchant, especially the reports of the different Hardware associations throughout the United States, and also the labors of the secretaries are lessened by the member being posted through such a medium.

After reports of previous standing committees, W. P. Lewis, of New Albany, Ind., president of the National Retail Hardware Dealers' Association, was introduced, and made a brief address, reviewing the work done by other State associations, referring particularly to the Indiana Retail Hardware Dealers' Association, of which he had the honor of being president. In the course of his remarks he alluded to the influence constantly being exerted by the National Association, an influence that was recognized by every manufacturer and jobber throughout the country. He urged the adoption of resolutions declaring the parcels post law now pending before Congress absolutely injurious to the Hardware dealers of the country, and hoped that the Association would take some action that would assist in preventing its passage.

The following committees were appointed by the president:

Committee on Resolutions—W. P. Oldham, Mt. Sterling; J. L. Malin, Vine Grove; U. S. Shacklett, Fulton.

Committee on Nominations—Kee R. McKee, Cadiz; Jos. Knapp, Louisville; Jno. C. Frederick, Owensboro; Geo. B. Minary, Versailles; J. W. Mahan, Lawrenceburg.

Among other resolutions brought to the attention of the convention were the following:

Resolved, That it is the sense of the Kentucky Hardware and Stove Dealers' Association, in convention assembled at Louisville, Ky., this 25th day of February, 1902, that the clause in the Rural Postal Delivery bill, now pending before Congress, and which provides for the delivery of merchandise up to the limit of 100 pounds at a very low rate of postage, is antagonistic to the interests of all retail Hardware dealers and an imposition on the machinery of government, and also it is antagonistic to the welfare of those corporations engaged in the business of common carriers.

Resolved, That the action of the association be communicated to the Senators and Representatives of this State, with the request that they take a strong stand against this bill for the aggregate interest of their merchant constituency.

#### QUESTION BOX.

The Question Box was then brought up for consideration, holding, as it did, quite a number of questions, among the most important of which were the following:

Should the legitimate dealer handle seconds? Should a retailer advertise prices?

What is the best way to fight the Steel Range peddler? Is it advisable to mark prices plainly?

T. James Fernley, secretary-treasurer of the National Hardware Association, was called upon, and made an extremely interesting address, to which the members gave very earnest attention. He dwelt upon the necessity for organized independence and the advantages of associated effort shown in the power and influence noticeable to-day in the various Hardware organizations throughout the country, local, State and national. He referred to the fact that trade association to be successful must be managed by men who are enthusiastic in their work, conservative in their judgment and determined in their endeavors to succeed. History does not record a brilliant deed the hero of which was not enthusiastic. What would have been great accomplishments have failed of success for lack of a conservative course of action. Do not coerce; persuasion is more effective.

Mr. Fernley at the conclusion of his address was given a rising vote of thanks by the convention.

W. R. Belknap, president of W. B. Belknap & Co., Louisville, then made a few remarks, in which he gave the assurance of assistance from the National Jobbers' Association in any fight which the retailers might have against the unprincipled competition of catalogue houses, department stores and retailing jobbers. His manner of expressing his thoughts on these subjects was such as to carry conviction to the members that he meant every word he said, and could be relied upon to back them up.

#### ELECTION OF OFFICERS.

The nominating committee reported, and proposed as officers for the ensuing year the following names:

W. P. Oldham, Mt. Sterling, president.

J. L. Malin, Vine Grove, first vice-president.

U. S. Shacklett, Fulton, second vice-president.

Paul Wagner, Louisville, secretary.

Jos. C. Kirchdorfer, Louisville, assistant secretary.

Henry Heick, Louisville, treasurer.

#### DELEGATES TO NATIONAL MEETING.

The delegates selected to attend the meeting of the National Retail Hardware Dealers' Association, at Chicago, on March 19-20, were Jno. C. Frederick, Owensboro, and Paul Wagner, Louisville, the alternates being J. L. Malin, Vine Grove; J. F. Van Deren, Lexington, and Jos. C. Kirchdorfer, of Louisville.

This was followed by the reading of several papers, to which the delegates gave their best attention.

J. L. Malin, of Vine Grove, read a convincing paper on "Why Hardware Dealers Should Join the State Association," in the course of which he said:

No sensible man can fail to admit that organized effort will control when individual effort might, and will, fail. Associations of every kind are primarily formed for the purpose of mutual protection. And the prime object of organization is to advance the welfare of members and incidentally the trade at large.

#### TROUBLES VARY.

My troubles may not be the same as some other dealer's in another part of the State, and his may be different from those with which some one else has to contend.

Therefore, every dealer should join his State association, and stand shoulder to shoulder, presenting a solid phalanx, so that the combined forces of those who are opposed to us cannot penetrate our lines.

Granting and demanding only what is right, we will succeed in our undertakings. Then let us take for our motto that of our grand old Commonwealth, "United we stand, divided we fall."

He was followed by Samuel B. Korb, secretary of the Louisville Retail Hardware and Stove Dealers' Association, who made an address on "Unfair Competition," from which we make a few quotations:

All other issues which this association may have now or in the future to deal with are as mere pigmies in comparison to "unfair competition." We have reason to feel alarmed with the progress it has been making in the last few years, and unless checked, the pathway, already choked with wrecked retail dealers, will be filled to overflowing with other unfortunates, and who can tell but what some of us may be among the number?

The most flagrant unfair competition is with the manufacturer or jobber who sells to you, and at the same time directly or indirectly seeks the trade of your customer. The retail dealer makes the jobber, therefore the jobber needs the retailer in order to retain his identity as a jobber.

retailer in order to retain his identity as a jobber.

Through the combined purchases of the retail dealers, jobbers are enabled to buy large quantities of merchandise, thus securing the lowest possible prices and other valuable concessions not ordinarily given to the average retail dealer.

Thus, if he chooses to do so, he can become the retail dealer's worst competitor. As matters stand to-day the retail dealer is virtually the agent of the jobber. He not only sells merchandise for him, but must become responsible for all expenses, collections, etc., necessary in the conduct of his business.

This same jobber, in his anxiety for more business and regardless of the consequences to the retail dealer, seeks other channels through which to dispose of greater quantities of

merchandise, and using no discretion whatever, he even becomes a competitor for business which absolutely belongs to some retail dealer.

Objections on the part of the retail dealer to such practices are at times entirely ignored, or perhaps the excuse may be offered that he is doing only what other jobbers are doing. Or, perhaps to keep the retailer in a good humor, in order to retain his trade, he may throw him a bone in the shape of a small commission whenever he thinks it necessary. He endeavors to make the retailer believe that his supposed grievances are purely of an imaginative nature, at least so far as he is concerned.

Thus I have not only described the most pronounced of unfair and dangerous competition, but also warn you that, unless this association finds a way to overcome such competition it will be useless to go any further in seeking reliciform other competitors.

Louisville was selected as the place of the next meeting, which will be held in February, 1903, on dates to be selected by the executive committee. The convention then adjourned.

The evening of the 25th was devoted to a Smoker and Dutch Supper, which was provided by the Louisville Retail Hardware and Stove Dealers' Association, and which was participated in by the visiting delegates with thoroughly unconventional enjoyment. Among other social features that were given during the proceedings of the convention was a theatre party given to the members and their wives through the courtesy of the wholesale Hardware house of W. B. Belknap & Co. The affair was a popular one, 81 persons participating, and Macauley's Theatre did justice to the occasion, which was a thoroughly enjoyable one. The kind hospitality of the wholesale house, through whose thoughtfulness the affair was made possible, was fully appreciated.

## Insurance Committee of Ohio Hardware Association.

A meeting of the Insurance Committee composed of the following gentlemen met at the Great Southern Hotel at Columbus, immediately after the adjournment of the Ohio Hardware Association: G. V. Guyton, Ada; O. M. Scott, Marysville; W. P. Bogardus, Mt. Vernon; C. C. Fouts, Middletown; J. P. Duffy, Greenville; Geo. B. Meyer, Cincinnati; Henry Rahe, Cleveland; Fred Haberman, Marion; W. M. Curmin, Salem, and Geo. M. Gray, Coshocton.

The following officers were elected pro tem: G. V. Guyton, president, and Geo. M. Gray, secretary. The secretary was instructed to send return postal cards to each and every retail Hardwareman in the State of Ohio, asking him to kindly state on the return card how much insurance he would be willing to take in case the company is organized on a proper basis.

The amount stated on return card will not in any way hold the writer responsible unless the company is organized on a solid foundation and on one that will be profitable to all. The committee desires this that they may be able to determine how much money can be raised prior to their efforts to establish an Insurance Co. for the retail Hardwaremen of Ohio.

If any retail Hardwareman in the State does not receive a card it will be because of an oversight, and he is asked to kindly notify the secretary, George M. Gray, Coshocton, O., and state how much insurance he would be willing to take. We trust that the retail Hardwaremen will respond promptly to this request as it is very important to the work of the committee.

Parson Johnson (catechizing)—Now, 'Rastus, yo' believes dat de whale swallered Jonah, don't yo'?

'Rastus-Yais, pahson.

Parson Johnson—Dat's right, 'Rastus; now, tell me why yo' believes it.

'Rastus--'Cause I'd git swatted ef I didn't.--Puck.

### IOWA RETAIL HARDWARE DEALERS' ASSN.

The fourth annual convention of the Iowa Retail Hardware Dealers' Association commenced its proceedings in the hall of the Y. M. C. A., Cedar Rapids, on Tuesday afternoon, March 4th. The attendance was hardly up to the average of the convention of last year, which probably arose from the fact of the postponement that had been considered necessary, and the changing of individual programmes, that militated to the disadvantage of a large attendance.

The president, W. A. McIntire, in his preliminary remarks stated that the action of the last annual convention in raising the dues from \$3 to \$5 had not met with general approval, quite a number of members sending in \$3 and canceling their dues, instead of the increased amount, which seemed to indicate a protest against the advance. The executive committee, at its meeting in Des Moines to make the necessary arrangements for this convention, deemed it advisable to authorize the officers to collect \$3 only for this year's dues, an action which he believed would be fully endorsed by the Association.

On motion of George Lister, the committee's action was endorsed.

The secretary, W. H. Keating, then submitted his report, as follows:

#### SECRETARY'S REPORT.

If my report seems to the convention to be rather brief, I wish to remind them that my term in office has also been but of short duration.

It was after the meeting of our executive committee last December in Des Moines, that our president, Mr. McIntire, called me up by 'phone and gave the information that I had been elected by that body as secretary of this Association to act until after their next meeting.

Upon receipt of the books and papers from the former secretary, I found that while there were about 400 names enrolled as members of our Association, only 102 had paid their dues for 1901.

This by no stretch of imagination can be called a very flattering showing, especially for Iowa, the State of all others that at this time is attracting the attention of the whole country, for her many brilliant and learned statesmen, her enterprise and general business prosperity.

Now the question for us to decide is, Why, with business

Now the question for us to decide is, Why, with business good and everything in a healthy and flourishing condition, should our Association continue to lag?

Is it because we are so shortsighted that as we have made a fair profit for the last year or two, we fondly imagine that those things of which we used to complain have ceased to exist? Or is it that, having joined the Association and paid our dues for one year, we sit back and expect all the reforms which we hope to be accomplished in that short space of twelve months, and because we can look across the street and see the "Racket Store" running the same as last year, we jump to the conclusion that our Association is no good and accomplishes nothing?

Another thing we did upon receipt of the books was to begin immediate preparation for the annual meeting. Together with the president, we prepared and mailed circular letters and programmes to all the dealers; afterwards we mailed the same number of postal cards notifying the trade of the change in hotel headquarters. Then again when we supposed everything was prepared and all arrangements complete for a meeting at Des Moines, came the news just a few days before the time set, that on account of smallpox being prevalent, the city council had declared a quarantine against holding public meetings. This necessitated mailing cards to all the trade postponing the meeting, and afterwards sending a circular letter calling this one at Cedar Rapids.

This was followed by the reading of Treasurer George Lister's report, showing balance on hand last year of \$190.10; received during the year, \$208; total, \$398.10; paid out, \$345.96, leaving a balance of \$52.14.

On motion of L. H. Kurtz, of Des Moines, the secretary's and treasurer's reports were referred to the executive committee to be audited.

The president then appointed the following reception committee: Geo. E. Staehle, Earlville; L. Lindenberg, Dubuque; Jacob Seither, Keokuk, and A. C. Veitch, Oakland.

The Question Box was opened, and the several questions which it contained were fully discussed by the members.

The convention adjourned to meet at 9 o'clock Wednesday morning.

Wednesday evening was devoted to a smoker at the club rooms.

#### WEDNESDAY MORNING SESSION.

The president delivered his annual address, from which we make the following quotations:

#### PRESIDENT M'INTIRE'S ADDRESS.

I am pleased with the honor of presiding over the deliberations of this body, composed as it is of a class of men not excelled in integrity and business ability by any equal number of business men in the State. Our hands may not be as soft and white or our complexions as fair as some of our brothers in the mercantile line, but our hearts are just as big and our muscles are better developed. A good combination of brawn and brain and a clear conscience are said to be essential to good digestion. We have both.

#### ORGANIZATION AND CONCERTED ACTION.

This is a day of organization and concerted action in almost every branch of industry. Self preservation in the commercial world makes this necessary. It is an evolution in business when men organize and meet at regular intervals and collectively consider business propositions with which they have come in contact in actual experience during the year. No man is so wise or so far seeing but that he will be benefited by coming in contact with others. We have but little originality in our make up. Addison said: "Mankind is more indebted to industry than ingenuity." We have gotten our knowledge largely from others. Then, if we mingle not with others we do not get the best.

#### ENCOURAGE THE TRAVELING MAN.

It is worth your while to invite a traveling salesman to sit down and spend an hour with him. His vocation puts him in touch with men and measures. He is an observing man of some ability or he could not hold his position. Treat him cordially, even if you do not give him an order. They are here with us to-day by invitation that we may be benefited by touching elbows with them. We get our knowledge by induction and deduction. We observe certain business principles adopted and followed successfully. We adopt the same and by analogy we adapt them to our business. We do more if we would be progressive.

#### THE MAGNETISM OF ASSOCIATION.

At a meeting like this, you intuitively imbibe the spirit that pervades the atmosphere. You catch the spirit of interest and energy and magnetism of those with whom you are associated. You leave the meeting with a knowledge that your ideas have been broadened and enlarged. You realize that you are only an integral part of the whole, and while you have succeeded fairly well, some of your neighbors have succeeded equally as well or better. Self conceit is a necessary element to success when tempered with good judgment. It enables one to accomplish results. It gives you opinions of your own. It gives identity, and stamps you as an important factor in your business. It directs those in your employ. No business man can succeed without it.

No clerk is worth his hire unless he can do something independently and alone. The business world wants more leaders and fewer followers, young men full of ideas and energy and old men with pronounced good judgment. The methods of doing business fifty years ago will not apply today. The business man of fifty years ago is a back number to-day, except he, by association, observation and energy, has kept abreast of the times.

Digitized by Google

#### HARD TO BREAK AWAY FROM OLD WAYS.

The ways of the world change, and one must be ever active and alert to keep pace. It is hard to break away from the well beaten path. The man who harvested his grain with a cradle and threshed it with a flail still rejoices in the knowledge of the good old times of yore and the enjoyments, if not the comforts, in those days. But how changed the conditions The financial giants are in a mad race for the goal. The Hills, and the Morgans, and the Vanderbilts are organized. The trusts are organized. Labor is organized. We, too, must be organized. Not because it is a popular fad. Not because of social pleasure altogether, but for the promotion and protection of our business.

#### NECESSITY OF INCREASING SALES

In the past few years the commercial world has enlarged. The merchant who sold \$10,000 worth of goods fifteen years ago must now sell \$20,000. Expenses are higher and margins on sales smaller. There are no trusts in our business. You must meet competition fair or unfair. Year after year we observe various articles in Hardware forced into the staples line, until to-day the bulk of the goods sold in our line may be classed as staples. The dealer must meet these prices or lose his trade. He must, therefore, increase his sales so that in the aggregate, at the close of the year, his profits will be as large or larger than formerly. The twentieth century dealer will not permit an accumulation of odds and ends, a collection of rusty, damaged and unsalable goods; but after invoicing, which should occur once a year, they are put in the best possible condition, pushed to the front and sold at some price.

The jobber to-day is in close proximity. You can get your goods clean and bright on short notice. It is not necessary to carry a heavy stock, but it must be complete. small quantities and carry what your customers call for.

H. A. Cole, of Council Bluffs, and C. R. Keating, of Mt. Ayr, read papers on "The Benefits of Organization," and S. R. Miles, of Mason City, one on "Credits." We make the following selection from Mr. C. R. Keating's paper:

There might be volumes written on the subject if we were to discuss the benefits that have been derived from a few of the more prominent organizations that have been in existence in recent years, but it is our aim to only call attention briefly to some of the benefits that have been derived, and that we may expect to derive. We may not be able to accomplish all that we would like to accomplish in the way of holding the Hardware business in the hands of the legitimate Hardware trade, but that we have accomplished a great deal along these lines is evident from the fact that we are receiving frequent communications from manufacturers and jobbers, stating that in the future they will sell only to the regular Hardware trade. Some of these same firms were a short time ago selling their goods to any and all that would buy, and in a great many cases placing them in the hands of our worst enemies. To-day they are doing all in their power to confine their business to the legitimate Hardware trade, and in many instances cooperating with the National Association.

#### KNOW YOUR COMPETITOR SOCIALLY.

I fear that the great majority of us during the rush and push of the year's business manifest very little love and charity for our neighbor, who is selling Hardware in the next block. These things ought not so to be, and would not be if we were better acquainted with our competitors. The wise thing then for us all would be to lay aside the cares of business for two or three days in the year, meet together harmoniously and talk over our various troubles and difficulties, also our successes, with the object in view of helping each other. I am sure that we would all be greatly benefited and better prepared for the requirements of business in the future by so doing.

#### THURSDAY MORNING SESSION.

George E. Staehle, of Earlville, read a paper on "Trusts and Their Relation to the Retail Dealer," and L. Lindenberg, of Dubuque, one on the subject of "Our Competitors." From the latter we quote the following:

I would like to be able to tell you how to meet this manifold competition that besets us, but a wisdom equal to Solomon's would be required to do so. As we must compete, let us do so in an honest, honorable way. My advice would be to have your stores kept clean and attractive, show your goods willingly and cheerfully; don't misrepresent. Use common sense, apply the Golden Rule in your dealings with your cus-

tomers, "Do unto others as you would have others do unto you," and don't worry. If you do this, under ordinary circumstances you should achieve success. You will not, in all probability, become wealthy, and right here let me say that wealth will not buy health nor happiness; indeed, both health and happiness are frequently lost in the scramble for wealth. If being a factor for good in the world, if being remembered by a grateful posterity, would be considered success, then Charles Dickens, for instance, would entirely eclipse our modern millionaires in having lived a useful and successful

#### State Aid to Manufacturers.

Instead of making an elaborate display of live stock, agricultural, horticultural and dairy products at the coming World's Fair in St. Louis, it is probable that several of the Eastern States will give prominence to their manufacturing industries. All the Eastern States depend largely upon the West and South for their markets, either directly or through jobbing houses, and it is considered to be in the line of good business policy to exploit that which will bring the greatest benefit to the State. To what extent the State may properly extend its aid to private individuals or concerns engaged in manufacture is a question that will be much discussed. is possible that a solution may be found in providing the installation for exhibits of manufactured products and possibly in bearing the expense of transportation. This plan would leave the manufacturer the expense of providing and maintaining the exhibit. No charge will be made for exhibit space. The cost of installation is the greatest hindrance to a general representation of manufactured products at an exposition, and it is clearly to the advantage of any city or town to have its industries well represented at an exposition of such magnitude and importance as the World's Fair at St. Louis. The manufacturing industries of Eastern towns are depended upon to employ the available labor of each town and to produce articles of usefulness to be sold in distant markets.' Money is thus brought back to the community to offset the constant outlay for goods not produced in that particular community. The community is thereby maintained in a healthy condition so far as its commercial life is concerned, and the farmers find each prosperous manufacturing center a profitable market in which to dispose of their products. It is, therefore, highly important in any manufacturing community or commonwealth that the various industries be maintained in the highest degree of prosperity, for all citizens then receive their due share of benefits. It is upon this theory that those interested in the representation of various Eastern States are proceeding, and it will be due to this departure from precedent that there will be an extraordinary display of manufactures from the East. The States of the Mississippi valley will show both manufactures and products of the farm and mine, while the States of the South and West will display extensively their live stock, agricultural, forest and mineral products.

#### Cost of Expositions.

The construction cost of the Pan-American Exposition at Buffalo was \$9,000,000; of the Parix Exposition last year \$10,000,000; of the World's Fair at Chicago \$18,000,000, while St. Louis will spend \$30,000,000 in building her Louisiana Purchase Exposition in 1903. The area of the Paris Exposition was 173 acres; that of the Pan-American 350 acres, and that of the Louisiana Purchase will be over 1,100 acres.

The physician pondered the case for a few minutes before he ventured an opinion.

"I think your husband needs a rest more than anything else," he said at last. "If he could be convinced of that—" But he refuses absolutely to listen to me, doctor." "Well," returned the physician thoughtfully, "that's a move in the right direction."—Chicago Post.

#### OHIO HARDWARE ASSOCIATION.

The eighth annual convention of the Ohio Hardware Association was held in the hall connected with the Great Southern Hotel, Columbus, opening on the afternoon of Tuesday, February 25. At the opening session about 150 delegates were present. The convention was opened by prayer offered by the Rev. Washington Gladden, of the First Congregational Church. The president then introduced J. Y. Bassell, secretary of the Board of Trade of Columbus, who delivered a brief address of welcome, which was responded to by President Scott for the association, in a short address that did justice to the occasion. This was followed by the roll call, after which the minutes of the 1901 meeting were read. Then President Scott made his annual address, as follows:

#### PRESIDENT SCOTT'S ADDRESS.

Gentlemen of the Convention:

I do not purpose to preface this business session with a formal address. Had I so intended, the Secretary's letter, sent throughout the State, would have barred me, for in it he says: "This convention is to be one of business, from he says: "This start to finish."

I wish, however, to say something concerning the Asso ciation as an organization. In this day of trusts and combinations, unorganized dealers in any line of trade may just as well go way back and sit down.

HOW THE G. A. R. DO IT.

On the fifth of this month the pension board of the G. A. R. met in Washington, headed by the Commander-in-Chief, Gen. Eli Torrence, and five other men of equal prominence. The object of the meeting being to hear and consider various complaints and grievances of members of the Grand Army and other veterans, and take action regarding pension legislation. The committee spent some time at the Pension Office, examining complaints as to some rulings of the Commissioners of Pensions. It is a conceded fact that the present liberal pension legislation is largely resultant from the influence brought to bear by the organized effort of the G. A. R. Many an old soldier gets a pension the size of which is largely measured by the effort of the G. A. R., though he may claim that the organization amounts to nothing, and will not turn from this same pension the pittance of less than two cents a week to keep it up.

LACK OF ENTHUSIASM AMONG DEALERS.

In like manner there are dealers in the State who will not join this body, who are being benefited by the silent, unseen, unwritten and unuttered influences that have gone out from it. Every Hardware firm in the State should become a member of this body.

In more than one case the complaint of the O. H. A. has caused anxious trembling to the offender. Our influence has been felt and heeded, and much good has been done. weight of mercantile organization is now being felt upon the law-making power of the country. Perhaps no one will be so rash as to assert that he has all the lines of his business in hand and working together to his satisfaction and profit.

COMPLAINING MEMBERS.
The member that complains (there are some who do) that little has been accomplished, and less remedied, should remember that it would be an ideal organization that could accomplish in eight years what the individual has failed to bring about in any number of years.

The

REASONS FOR FORMING THIS ORGANIZATION

were no stronger than those that exist to-day for its continuance. New conditions are confronting us every day. Each new one will hardly bear discussion, until another intrudes itself which can neither be solved or evaded.

It is gratifying to know that the moulding influence of the O. H. A. has been felt at home and abroad. Other countries are recognizing and some adopting the organization thought as uttered by this association. Mercantile organization is preeminently an Ohio idea. We are the father, mother, instigators and originators of the association movement. A few days ago, I had a letter from Canada asking how we did it. Hubbard, of Roycroft fame, has said: "Your own will come to you if you hold firmly to the thought, and hustle." My parting word as your president is,

HOLD FIRMLY TO THE ORGANIZATION THOUGHT.

If we fail to bring all things our way, let us be satisfied with the effort we have made to confine our craft to still waters. The stream is full of drift, Navigation calls for an every-day supply of high pressure. Only a skillful hand at

the wheel will prevent disaster.

Gentlemen, the convention is yours. If you have a plan by which competition can be made less keen, if you know how trade can be kept in proper channels, if you have found out how the cost of manufacturing can be reduced, this is the place to tell it, and thus throw light upon the leading thought of our organization, to lighten the burden of business and increase profits. While in a sense we are compelled to consider the difficulties of our business, let us not fail to mention the pleasure and profit it brings, nor forget that it is the hopeful man that will secure the cooperation of others, and thereby gain the desired end.

In closing I wish to thank you for the honors that you have conferred upon me. First as member of the executive committee, called upon to make several addresses; for two years as your president, you have given me abundant evidence that my services have been over-estimated. For all of which I am very grateful; henceforth you will find me in

the ranks.

Long live the Ohio Hardware Association!

T. James Fernley, secretary-treasurer of the National Hardware Association, being present, was called upon by the vice-president, who stated that the convention would be very glad to extend to him the courtesies of the floor. Mr. Fernley then came forward, and delivered, as usual, an able address on the subject of trade organization and its relative importance. He was listened to with commendable attention, and, as usual, made a number of good points which were highly appreciated. The president then announced that next in order would be the report of the secretary, which was as fol-

#### SECRETARY GRAY'S REPORT.

Gentlemen of the Ohio Hardware Association:

I esteem it a great honor to present to you the eighth annual report of the Ohio Hardware Association. Under date of October 10, 1894, a call was made for a convention of Hardware dealers of the State of Ohio, one from each county having received the call. The meeting was held at the Neil House, this city. The firms present represented twenty-eight counties of the State. Those present decided to adopt the name of the Ohio Hardware Association, and according to Section 2 in the Constitution: "The object of this association shall be to promote the interests of and secure the friendly co-operation of the Hardware dealers throughout the State. The next meeting was held in Columbus, February 13th, 1895, at the Neil House, which was the first annual meeting. At that time we had but thirteen members. I had the honor of being at this meeting and later had the great honor of being elected your corresponding secretary. I cannot sufficiently thank the Hardwaremen of Ohio for your continued marks of good will and confidence, and can assure you that I appreciate this honor.

Since we met in this city eight years ago a great many changes have been made. At that time the department store was in its infancy, and the manufacturer and jobber confined their sales to the legitimate trade. To-day the retail trade is suffering from a universal business conflict, caused partly by the manufacturer and jobber taking from us the trade that rightfully belongs to us. There is a serious controversy going on as to the cause and remedy. Grave questions of a vital character relating to our rights are be-These questions demand and must receive the highfore us. est and best thought of the retail dealer's mind.

In all that I have done under the office I have been holding I have sought faithfully and zealously to present our

claims in a friendly way. The object of the association from the beginning was to promote the interests of and secure the friendly cooperation of Hardware dealers. as to these vital questions of the future, I only hope that we will go forward in the same spirit and with a determined purpose to stand up for our rights and to stand together. Without a doubt, we should have a friendly feeling for our competitor. We should never run down our competitors to our customers, nor allow our customers to run down our competitors to us. Some customers will tell you that they can buy nails for 10 cents per keg lower from your competitor, but they desire to favor you, notwithstanding your competitor has said harsh things about you. may be true and you had better settle the deal at once, but always remember, a man who quotes your competitor's prices, never makes them higher than they really are, and that you can generally compromise and get a little more than his first figure. The second statement you need not bother with. There is no use feeding expensive "hen food' to an old "Dominick" that sucks eggs. The chances are The chances are that this fellow said the harsh things about you himself, and your competitor had no voice in it.

Friendship is the one subject that a man in the Hardware business should treat solemnly. We go this way but one time. What we do now will tell in the future. If we could come back and live this life over and correct our mistakes it would be different. But we cannot. As a result we are banded together to promote the best interests of the retail dealers throughout the State, more than ever before in our history, a power in the fullest meaning of friendship.

To have been at the first meeting and to have met the other fifteen members, if nothing more than this had been accomplished, would be enough to entitle all who participated in the good work to the gratitude and the plaudits of the retail Hardwaremen. But great have been our achievements. We have increased in numbers until we have now three hundred and seventy (370) paid up members, who are representative, sterling business men. But as great as has been this achievement, others there are and greater.

We have about fourteen hundred retail Hardwaremen in the State, and at least one thousand of these should be enrolled with us. Unexpected emergencies will arise and unforseen responsibilities will devolve upon us, and it is a fitting opportunity for the statement that all emergencies will be met and all responsibilities will be faithfully discharged if we will enlist those who should be with us and stand on a friendly foundation.

The correspondence relating to our work during the past year has been large but not so large as last year. 10th day of November, 1901, the Executive Committee met at the Chittenden Hotel, this city, and arranged the program for this meeting. Under date of January 28 program was mailed to each and every retail Hardware dealer in the State, and this was followed under date of February 14th by a personal letter appealing to each one to come to Columbus. Following this a postal card was addressed to each dealer, calling attention to both the program and the letter. In all there were sent from the secretary's office five thousand pieces of mail. The correspondence relating to the association is not confined to our own State alone, but to the trade throughout the United I cannot refrain from saying here that my predecessor has done an untold amount of good for this association, not only as a great secretary, but as the gentlest and most lovable type of friendship. This is the place in the O. H. A. that will always be held by John F. Baker. I call attention to this at this time because it is an impressive admonition to us to be friendly to each other and also to be

In closing we ask you to notice our growth from an humble thirteen to our present membership. We know that you have kept trace of these meetings for the good of that which we all seek, "The Hardware Trade of Ohio," and its betterment in every way possible. We hope you will take up at this meeting the lien laws and discuss that which will confine manufacturers and jobbers and retailers within lines properly their own.

We need local association in our own town. I am delighted to see so many present, and may our coming together broaden our friendship and fellowship.

I beg to extend my sincere thanks to our president, who has been to me at all times a very great help, and also to the Executive Committee for valuable assistance when it was most needed, and finally to the members who have al-

ways responded in a kind spirit to all phases of the Ohio Hardware work.

Will C. Jones, financial secretary of the association, then presented the following report:

| Balance on hand as per last report  Received payment of dues since | \$49.0 <b>4</b><br>1,096. <b>43</b> |
|--------------------------------------------------------------------|-------------------------------------|
| Total Paid out for expenses                                        |                                     |
| Ralanas                                                            | 8458 R4                             |

On motion the secretary's report was adopted, and the treasurer's report was received and placed on file. The president then announced the appointment of the following committees:

Committee on Death of Herman Bahlman: O. P. Schriver, Otto Berger, George B. Meyer.

Question Box: A. Rothwell, Hamilton; W. B. Mc-Cracken, Lancaster; Justice Scheider, Marysville.

Laws Relating to Hardware Trade: George Hartke, Cincinnati; C. C. Johnson, Barberton; C. B. Burr, Columbus. Committee on Resolutions: O. J. Taylor, Sidney; W. P. Scott, McConnellsville; John Spoerl, Hamilton.

Nominating Committee: John F. Baker, Dayton; H. C. Wiseman, Springfield; C. E. Kirker, Manchester, and four others to come.

On motion the committee on nominations was increased to seven members, the president stating that the additional names would be given at the Wednesday morning session. On motion the committee on nominations was instructed to report two tickets of candidates to hold office for the ensuing year, but not necessarily two candidates for each office. After some little discussion in regard to this novel suggestion, it was conceded that no harmful results could spring from such action, and the motion was carried. The convention then adjourned until 9 o'clock Wednesday morning.

WEDNESDAY MORNING SESSION.

The convention was called to order, President Scott in the chair. The president announced the following names as added to the committee on nominations: Fred Neile, Cambridge; W. A. Remy, Mansfield; L. F. Stahler, Waverly; Theodore Weld, Marysville, who, with John F. Baker, Dayton; H. C. Wiseman, Springfield; C. E. Kirker, Manchester, comprise committee of seven.

J. P. Duffy, chairman of the Committee on National Association, made the following report:

The by-laws of the National Retail Hardware Association, as you were told last year, prohibited the Ohio Hardware Association from becoming members on account of the Ohio Association admitting to membership jobbers.

Mr. Duffy stated that the committee attended the last meeting of the National Retail Hardware Association and endeavored to arrive at some plan by which the Ohio Association could become a member of the National Association. He said that the result of their visit to the meeting of the National Association was the adoption of a resolution by the National Association, as follows:

"Resolved, That any States whose local Hardware Associations accept as members others than retail dealers the National Association will permit such State Associations to work in harmony with us, but will accept as members only such members of State Associations as are legitimate retail dealers, and their representation shall be the same as other States"

The committee recommended, Mr. Duffy said, that the Ohio Association endorse the resolution and would urge the retailers to become members of the National Retail Association, according to their by-laws and regulations. He also recommended the election of two delegates to the next annual meeting of the National Association; also that the retailers

of the Ohio Association be assessed an additional dollar on their dues to pay the National Association dues.

On motion, the report was received and placed on file.

On motion of George B. Meyer, it was moved that the Ohio Hardware Association join the National Retail Hardware Dealers' Association. The motion being seconded, remarks followed by Messrs. Meyer, Rothwell, Duffy, Bogardus and others in favor of the motion, which was unanimously adopted by a rising vote. It was then moved and carried, that the nominating committee be instructed to send two delegates to attend the National meeting.

Following the program, Mr. Rothwell was then called upon to address the convention on the subject of "Stoves," which proved to be an extremely interesting subject, and was listened to by the delegates with considerable attention, and very favorably received.

W. P. Bogardus, chairman of the committee on lien laws, then delivered his report, which concluded with the following suggestion of the committee:

"Your committee would, therefore, suggest that a committee be appointed to look after and secure, if possible, the passage of a proper lien law, and would recommend that every Hardwareman in the State make it his business to call the attention of his Senators and Representatives to the necessity for the passage of such a law."

On motion, the report was adopted.

Mr. Smith, the secretary of the Lumbermen's Association, came forward and addressed the association at some length in favor of the passage of Bill No. 102, now pending before the Ohio Senate, being a bill to amend the present lien law of the State of Ohio. He said he did not agree with Mr. Bogardus that certain clauses of the Michigan law should be incorporated in the bill, as such had been practically declared unconstitutional by the Supreme Court of Ohio.

The report of the committee on insurance, G. V. Guyton, chairman, was then read by the secretary upon request of the chairman, in which the subject of insurance and the organization of an insurance company within the association was exhaustively dwelt upon. On motion the report was adopted.

On motion of Mr. Carlson, the president was empowered to appoint a committee to go ahead and organize an insurance company for the Ohio Hardware Association. The motion was unanimously adopted. The president stated he would appoint the insurance committee during the afternoon session. The president subsequently appointed the following as members of that committee: W. P. Bogardus, G. V. Guyton, M. B. Talmadge, Chas. S. Johnson, C. W. Jewell. The convention then took a recess until 2 p. m.

#### WEDNESDAY AFTERNOON SESSION.

The convention was called to order at 2 p. m., the report of the grievance committee being first in order. This was followed by the reading of the following paper on

THE TRAVELING MAN, by J. H. Smith, of Smith Bros. Hardware Co., Columbus. Gentlemen of the Ohio Hardware Association:

This is a hard subject to handle on paper or as individuals. Traveling men are of varied temperaments, qualifications and physique. Some are short and jolly, some long and lean, some dyspeptic and irritable and others a happy medium. The young man on his first trip and the old veteran; the one who knows it all and others who are willing to admit that the buyer knows a little. Some know when to quit and some, like the gurgling brook, "go on forever." The one who can tell when a customer is in the humor for a little chat or a good story: and there are some who would tell a story when it should be easy to see that the listener's mind was on other things and his looks said plainly, "Ring off, you bore me." There are some who are always in a hurry to get through with a customer, which is commendable as a rule, for the reason that both the salesman's and buyer's time is valuable. Often times the hurry is not out of consideration for the buyer or because the salesman wants to make a train, but to meet some friend for a game of billiards or possibly poker. A salesman who is anxious to get through business to engage in some amusement will not succeed. If there is time

for amusement after business has been attended to properly, it is all right; but remember the old adage, "Business before pleasure." If any one man possessed all the good qualifications, he certainly would be a jewel. Traveling men, like men in other positions, are human and have their weak spots. When a salesman holds his position year after year with the same firm, he may rest assured that he possesses some of the good qualities necessary to be successful.

It is not a summer vacation to sell goods on the road as some without experience think. Especially is this true with the salesmen who visit inland towns. The country is well criss-crossed with steam and electric roads, but there are still many good towns that must be made by driving. Sometimes this is a delightful change from railroad travel; but when the thermometer bobs around zero or the mud is axle deep, driving until near midnight all alone and not knowing what minute you will break an axle, bust a belly band or be dumped into a ditch, is no cinch. I have had to substitute a rail for a wheel more than once, load the wheel into the vehicle, straddle a horse and go until I found a blacksmith shop, which was usually in the next town. Most all who drive much, have had balky, runaway, kicky or the back-you-in-a-ditch kind of horses to deal with. I would rather have a horse go down the pike at a two-forty clip than have one back all over the road at a snail's pace. You can pull with some hopes of success, but you cannot push on the lines hard enough to hold a horse straight. It is on such occasions as these that traveling men think of their mothers, wives or sweethearts. After making a long and often hard drive, if you are rewarded with a good fat order, it eases things wonderfully, but if you drive ten or twelve miles over bad roads and are given a reception that discounts zero weather, and you do not even get a chance to offer some of the wonderful bargains you have up your sleeve, you are liable to think harsh things.

Some merchants do not appreciate traveling men as they Good salesmen are always gentlemanly and courteous, and it does not cost anything for the merchant to be equally so. I might add that it always pays any merchant to treat a salesman, who is a gentleman, with consideration, and at least have a talk with him if he does not know of any goods he is needing. Traveling men must be well informed about the goods they are selling. They must be posted on the market and are often posted as to the future prospects of the market. They are always ready to impart any information to a customer that they think will benefit him. I am well aware that merchants can't always give an order, but they can treat the salesman so he will go away with a good, friendly feeling. Cold blooded merchants soon become known to the traveling fraternity and many a time they miss a good thing because the traveling man does not love them. If the list of Hardware items was as short as it was in the early history of our State, when our worthy President was a boy, it would not be necessary to have representatives visit the trade. In those days, the local blacksmith made the hasps, hooks and staples, eye hinges and many other articles in the Hardware line; but now the Hardware dealer sells anything from a harness needle to an automobile, and new goods, new designs and new finishes of Hardware are of monthly occurrence, and it is necessary for the merchant to know of these goods. He cannot always come to an intelligent conclusion by reading a description from a circular, but must see samples or talk with some one who can inform him of the merits of the article. much less expensive to have one man call on hundreds of merchants than for the numerous merchants to visit the manufacturer or jobber. Hence the necessity and economy of the traveling man. I recall a story of a merchant who went to the city to buy some goods. Naturally the jobber was glad to see him and wanted to show him that he was a good fellow, so he offered him a cigar. The visitor asked the price of the cigar and was informed. He then asked the price of gimlets, and when he got the price he said, "Well, seeing it is the same to you I will take gimlets." That man had an eye for busi-

Traveling men are expensive. Some a great deal more than others. This has been and always will be a serious problem with employers. Sometimes a salesman stops at a \$4 per day hotel when there is one as centrally located and as good, but not so stylish, for a less rate; sometimes they ride a few blocks when walking is good; sometimes they smoke ten-cent cigars, while the employer smokes stogies; they drive two horses and take a driver when one horse and doing their own driving is cheaper. There is a town fifty miles away where the hotel is better or possibly they have a best girl, and it only costs a few dollars extra and they can get back the next morning

early, and so they go and the firm foots the bill. I am glad to say that all of our salesmen are married and do not make these side trips, but I have known some who did. I am personally acquainted with a man who traveled in the same territory in Michigan that I made some years ago, who made a uniform charge of fifty cents for all meals. Other men traveling for the same firm had meals charged at prices ranging from twenty-five to fifty cents. The manager of the house called the "Fifty-cent man" to account and wanted to know whether he always had to pay fifty cents for his meals. He said, "No, I often get a meal for twenty-five cents, but it is worth fifty cents to eat it." The manager had nothing more to say.

A firm is judged largely by its representatives, and to a great degree are dependent on them. If a salesman misrepresents an article or wilfully misleads a customer, his employer is the one who suffers. A salesman of experience would not do a thing of that kind, but some new, ambitious youth sometimes only thinks of the one order in sight. I think I can say, without fear of contradiction, that Hardware salesmen, like Hardware merchants, are, as a rule, of the highest type of business men. There is no more elevating or honorable business, or one where it takes men of large caliber to make a success than the Hardware business.

A great many men think they are well qualified to sell goods on the road, but it often times takes but a short while for them to find out that they can't make expenses. I heard of such a man, who got an idea that it was easy. He started out with samples and a good supply of expense money, which soon disappeared. He had to send for more money, but had no orders. The firm sent him more money and told him they expected some orders. After he had been out for two or three weeks and still had sold no goods, he wired for more money. The firm wired him to send his samples home. He sent his samples and then wrote them to know how he was going to get home, as he was out of money. They wrote him saying, "Enclosed find some feathers, make yourself wings and fly home." I hope no Hardware salesman will have to resort to wings, because it is hard to get the right flop.

The iron industry, which includes Hardware, is without doubt the most important industry of the present age. It is the barometer that indicates the condition of the industrial and financial world. When the iron industry is in a healthy condition every other branch of trade flourishes; but let the iron market slump and it is certain that every other industry will also immediately suffer. Reports from the iron producing sections show a most healthy condition at the present time. Every mill is sold up for at least six months ahead, and some for the year. Hardware dealers know how hard it was to get goods the past year, and I anticipate a shortage in a number of lines this year. Many manufacturers have been make prompt shipments.

The past three years made for all classes.

The manufacturer, mechanic, farbehind on orders for nearly a year, and are still unable to make prompt shipments. The past three years have been mer and merchant have all had better opportunities for making money than usual, and I think, as a rule, have been making hay while the sun shone. I think, that while the sun has possibly passed the noon time, it will not be dimmed by any serious reverses to business during this or the coming year. I trust my prophecy will be true and that for many years we may enjoy continued prosperity. Lack of confidence is the cause of many panics. People hear rumors of a shortage of currency, or the wheat crop, or some other dire disaster, and get scared. Contradictory reports are circulated, but they are like the tramp who hesitated at a gate on account of a big dog that was in the yard. His pard said, "Go on in, Bill, he won't bite you. Don't you see he is wagging his tail?" Bill said, "Yes, but he is growling, too, and I don't know which end to believe."

Success in anything is dependent on plenty of hard work, constant watchfulness for leaks on account of bad debts and bad stock, careful attention to your customers' wants, and persistent hustle, remembering that

"The man who whispers down a well About the goods he has to sell Will never reap the shining dollars Like one who climbs a tree and hollers."

WEALTH SHOULD BE EQUITABLY DISTRIBUTED.

I think you will readily agree with the proposition that the more equitably the wealth of a nation is distributed among those who produce it the greater and more lasting the general prosperity, and hence the more beneficial to every commercial interest.

It must, therefore, follow that whatever public issues may affect these conditions to the detriment of trade should re-

ceive careful and unbiased consideration in a convention of this kind. And inasmuch as the past so conclusively demonstrates that future economic effects are the most serious feature of the problems of to-day it behooves us as merchants to thoroughly advise ourselves of their premises and in the pride of true citizenship champion and endeavor to effectually apply our convictions.

The president then called upon the Question Box committee to make a report, which they did, reading a number of questions that formed the contents of the question box, upon which a discussion followed in regard to the same, which was participated in by a number of the members, after which the convention adjourned until 9 o'clock Thursday morning.

#### THURSDAY MORNING SESSION.

President Scott called the convention to order at 10 a.m. Following the program, the first called upon was C. W. Jewell, who delivered an address upon

#### HONORABLE SUCCESS.

the interest of which may be judged from the brief selection we make:

"Now, the question comes how to succeed honorably. What is success? The world terms success the attainment of wealth. This is the world's idea of success. My topic is honorable success. It may be the accumulation of dollars; it may be failure, as we have shown; it may be just the eking out of an existence. I have been taught—but I did not get this from Bradstreet—that 90 per cent. of all business mea fail; that 5 per cent. get rich, and that 5 per cent. die in the harness. I am not here to vouch for that statement, but it is told largely as a fact. So then, if we are honorable and die in the harness, it is greater wisdom than to gather gold and die in dishonor.

"I believe a business man has a right to expect success just as much as a farmer has a right to expect a crop of wheat when he sows."

The president than announced that the next subject on the program would be an address by F. A. Powers, on "Some Hardware Don'ts." Mr. Powers than addressed the convention on the very interesting subject selected, from which we make a few extracts:

Realizing as I do the many difficulties besetting the ordinary retail Hardware merchant, I am moved to criticise some of the hindrances which stand in the way of business success. The time is past (in Ohio, at least) when a man with a few hundred dollars, without previous experience, can start a Hardware store and become opulent before he is bald-headed. The evolution of trade demands more capital invested and a better business training than was required even a few years ago. Competition is much sharper, expenses, as a rule, are higher, and the percentage of profit much less. We have the catalogue houses on one side, and the jobbers on the other, both bidding for our customers' trade, and the poor retailer often feels he is "between the devil and the deep sea." We might adopt some of the methods of the catalogue house and department store with profit to ourselves. We don't want to adopt all of them if we expect honorable success.

Don't think you can run your business successfully without advertising. Just which kind is the most effective and profitable is something of a problem. Most of us have theories upon the subject which we have tested with more or less success. It is surprising how few Hardware merchants realize the value of their show windows for advertising purposes. When properly cared for, they can be made to pay big dividends for the labor and expense given them. Don't waste the valuable space they occupy by neglecting to wash the windows and changing the displays often. Don't think because many of the goods you sell soil your hands and clothes that your store must be kept exceptionally dirty. It may look like business to have your goods in such disorder that you must paw them over to find what your customers want, but it is not good business, and there is no excuse for such slovenly methods. The old adage that "goods well bought are half sold" is not more true than the modern one, "goods well displayed will sell themselves." With the improvements now offered for displaying goods, the added expense is but slight compared with benefits received.

Mr. Guyton moved that a vote of thanks be tendered the several gentlemen who had taken the pains and time to address the convention on the various subjects, and the motion was unanimously carried.

W. P. Lewis, president of the National Retail Hardware Dealers' Association, who was present, was then called on by the president for a few remarks, a suggestion to which he responded promptly and made a brief address, after which the convention took a recess until 2 p. m.

#### THURSDAY AFTERNOON SESSION.

The president called the convention to order at 2 p. m. Upon asking if there was any unfinished business on hand, John F. Baker introduced a resolution, which was unanimously adopted, tendering the thanks of the association to the local dealers of Columbus for the courtesies that had been extended to the ladies who had been present with their husbands, which was also made to include thanks for the many courtesies which were extended to the individual members. The president then called upon the Hon. F. B. Willis, of Hardin Co., who delivered an extremely well written address on "The Iron Industry," at the conclusion of which a vote of thanks was tendered him by the association.

The report of the nominating committee, which was then in order, was read by the secretary, and upon a ballot being taken, it resulted in the election of W. P. Bogardus, president; vice-president, L. F. Stahler; corresponding secretary, D. R. Burr; financial secretary, W. C. Jones; treasurer, H. A. Waller; executive committee, J. B. Carson, C. D. Cussins, M. B. Tallmadge, C. W. Jewell.

The nominating committee also reported the selection of the delegates to attend the annual meeting of the National Retail Hardware Dealers' Association: W. P. Bogardus, Mt. Vernon; J. B. Duffy, Greenville. As alternates: F. A. Powers and G. M. Gray.

The committee appointed on memorial, reported a resolution of condolence to be spread upon the minutes, on the death of Hermann Bahlman, president of the Kruse & Bahlman Hardware Co., of Cincinnati, O., and that a copy of same be forwarded to the family of the deceased. The resolution was adopted.

The committee on resolutions reported as follows:

"The decision of the committee was to reaffirm the resolutions of 1898, and pass them without any change."

The report of the committee was adopted and the resolutions passed.

Mr. Bogardus then made a brief address, tendering his sincere thanks for being made the president of the association, and hoped he would have the support of all the members in order to make his administration a success. Mr. Stahler followed, expressing his thanks as well for his elevation to the office of vice-president, which was also participated in by Mr. Burr, elected to serve as corresponding secretary.

It was then moved and carried that the association hold its next convention in Columbus on the fourth Tuesday of February, 1903. The convention then adjourned sine die.

#### BANQUET.

Wednesday evening was devoted to the elaborate banquet, which was given in the dining room of the Great Southern Hotel, and was given by the association, each delegate sharing in the expense. There were about 300 delegates and others that participated in the festivities. The full length of the dining room was utilized, five tables running parallel, and one table running across the room, which being the largest table, was occupied particularly by those who had participated in the oratorical diversions of the convention proper.

The first speaker was Governor Nash, who made a very humorous after dinner speech. At the conclusion of the address of the Governor, the toastmaster introduced Hon. F. B. Willis, of Hardin Co., who entertained the members present with a very happy speech. This was followed by a song by B. W. Payne, which called forth considerable applause. Colonel James Kilbourne was then introduced, and kept the members in a state of continuous enjoyment during his felicitous remarks. A song by George M. Schad followed the remarks of Colonel Kilbourne. H. C. Wiseman was introduced as the next speaker. He was followed by a brief speech from W. P. Lewis, which concluded the speech-making of the banquet.

#### Emery Stone in Greece and Turkey.

The Island of Naxos, embraced in the Greek Archipelago, is situated about 100 miles southeast of the Piræus. Its inhabitants are supported almost entirely by working the emery mines, of which there are two. The Greek Government is the owner and proprietor of these mines, but they are worked exclusively by the natives of the island. The Government has entire charge of the sale of the ore and buys the crude product from the Naxos miners at 21/2 francs (48 cents) per cwt. of 112 pounds. The ore is transported to the neighboring Island of Syra at Government expense, and is there sold on the wharf at 106½ francs (\$20.55) per French ton of 1,000 kilograms (2,204.6 pounds). Two years ago an American company attempted to secure a monopoly of the industry and made an offer to the Greek Government to buy 7,000 tone per year for ten years at 106½ francs (\$20.55) per ton, but for some reason the arrangement fell through. The total annual consumption of Naxos emery is from 5,000 to 6,500 tons. Of this, the United States takes 1,500 to 2,000 tons, and Europe from 4,000 to 5,000 tons. The Naxos mines have never been

Turkey has many emery mines scattered along the coast of the Mediterranean and nearby islands. Those of importance in the neighborhood of Smyrna are at Baltizik, Azizieh, Cosbounar, and Kuluk. Some of the Turkish mines are the property of the Turkish Government, but many of them are owned and operated by local companies and by single individuals. The total annual exports of Smyrna emery stone range from 17,000 to 20,000 tons, of which 10,000 tons go to America and the balance to Europe. The corundum found in the Turkish emery stone varies from 40 to 57 per cent., with the exception of Kuluk stone, which is said to contain about 37 per cent. Corundum in the Naxos stone is reputed to run as high as 60 per cent. The prices of Smyrna stone vary with the quality from \$14 to \$20 per ton f. o. b. Smyrna. I am creditably informed that no emery can be produced f. o. b. Smyrna for less than \$12.50. The Kuluk stone is shipped from the port of Kuluk, and is brought down from the neighboring mountains by camels. This stone is quoted f. o. b. Kuluk at \$10 to \$12 per ton. Turkish stons is not "treated" after leaving the mine, except by hand picking; it is never RUFUS W. LANE, washed or crushed.

Consul.

#### Loring Coes & Co., Incorporated.

The Coes Wrench Co., Worcester, Mass., has been consolidated with Loring Coes & Co., Incorporated, through the purchase by Loring Coes of the interests of his nephews, John H. Coes and Fred L. Coes, in the Coes Wrench Co. At a meeting of the corporation of Loring Coes & Co., held on the 1st inst., the following officers were chosen: Loring Coes, president and treasurer; Frank L. Coes, secretary; directors, Loring Coes, Frank L. Coes and F. W. Blackmer. Frank L. Coes has not previously been connected with the Coes Wrench Co., but has been vice-president and manager of Loring Coes & Co., makers of Machine Knives, since the date of their incorporation, in 1899.

"No, Willie, dear," said mamma, "no more cakes to-night. Don't you know you cannot sleep on a full stomach?"
"Well," replied Willie, "I can sleep on my back."—Ex.

### MINNESOTA RETAIL HDWE. DEALERS' ASSN.

The sixth annual meeting of the Minnesota Retail Hardware Dealers' Association was held in a hall in the Hotel Ryan Annex, St. Paul, on February 26 and 27, 200 members being in attendance. There was a meeting of the executive committee in the morning, but the regular session did not begin until 2 P. M., and it was called to order by President W. H. Tomlinson.

After the roll call, Mayor R. A. Smith gave an address of welcome to the delegates, congratulating them upon the success of the association during the past year, and assuring them of his best wishes for future prosperity. A. T. Stebbins, of Rochester, in his response to the address of welcome, said:

Some one has said there are no better citizens than merchants; they knit all interests together. If one wishes to start some enterprise for the public good, it is not the wealthy nor professional men, but the business men that are sent for. We have met here to get acquainted and also for educational purposes. To-day we have the telegraph, the automobile and wireless telegraphy, and there are great possibilities for the next century which are, indeed, beyond the comprehension

President Tomlinson then read his annual address, speaking substantially as follows:

#### ADDRESS OF PRESIDENT TOMLINSON.

It is with genuine gratification that I call this, our sixth annual, meeting to order. I am pleased to see so many of our members in attendance, showing an increased interest in our work.

Our association, the first to organize, is no longer an experiment; it has attained a solid footing. Composed of the best Hardwaremen of the State, we have steadily increased until we have now over 500 members.

Our finances are in a very satisfactory condition, and we are a power for good. During the year that has passed everything has moved along pleasantly. There has been no friction between the officers and the executive committee, and under the care of our efficient secretary the work has advanced satisfactorily. We have enjoyed a prosperous year, and none of our members have beeen taken away.

One of the many evils which we have organized to overthrow has been done away with, and it would seem poor business sagacity for any one to reorganize it in the expectation of making it a success, with 500 of the best Hardware dealers, and many other dealers in the State, to use their influence against it.

#### SUCCESSFUL INSURANCE FEATURE.

To-morrow President Hatch will give you the report of our insurance department, showing such phenomenal success that with the exception of one loss in North Dakota in the second year of its existence, the interest on the funds in the treasury has paid all our losses. I must earnestly recommend to all our members that as soon as practicable they place a part of their insurance with our company. We do not intend to take any risks that are hazardous, but we want to give good, safe, reliable insurance at cost.

#### ON CO-OPERATIVE BUYING.

Another matter of importance which I wish to bring before you is that of co-operative buying. I believe this plan to be to our interest. In buying together we shall only be imitating our friends, the jobbers, who do it with great success. If we can buy together, and save from 5 to 10 per cent. in so doing, we can offer a strong inducement and practical argument to good business men to become members with us. If you think it advisable, a committee might be appointed to consider this matter.

The proposition to join the National Association will come before you for consideration, and your decision may have great consequences for good or ill to our State Association. Our executive committee will report on the subject, as they have been requested to do, and the matter will be left in your hands for action.

I wish most heartily to thank the trade papers for their

uniform kindness and courtesy toward our association. wish to congratulate you on a prosperous business year now past, and on the prospect of continued prosperity in the immediate future, and in the progress, unity and hopeful outlook of the Minnesota Retail Hardware Association.

President Tomlinson announced that J. E. O'Brien, of Crookston, who was on the programme for a few remarks, was unable to be present on account of illness, and called on T. T. Batchellor for his paper on "The Possibilities of Trade Organization." As Mr. Batchellor was not present, the reading of this paper was held over until the Thursday morning session, and J. F. McGuire, of St. Paul, was called on for a brief address, in the course of which he pointed out the desirability of forming local associations and gave a brief history of the St. Paul local association, which has accomplished much of benefit to the members. While not organized to fix prices, the members of the association, by becoming better acquainted with one another, have learned not to sacrifice profits in competing with one another. Consumers have not been compelled to pay high prices, but have paid fair prices, enabling a reasonable profit to be made. He urged that dealers should do the same in other cities and towns. Through an association the matter of credits can be regulated and buyers can be prevented from going from one store to another, running up bills and not paying them.

At the suggestion of the president, J. C. Nolting, president of the St. Paul Retail Hardware Dealers and Stovemen's Association, held the attention of the convention with a few remarks. The president then announced the following committees:

#### APPOINTMENT OF COMMITTEES.

Insurance—A. C. Hatch, Battle Lake; Knute Hansen, Battle Lake; Julius Schmidt, Wabasha; O. F. Olson, Brandon;

A. E. Anderson, Rothsay.

Press—J. F. McGuire, St. Paul; C. Schroeder, Mankato;
J. P. Watson, Rochester.

-E. H. Heins, Renville; C. V. Ferguson, Chat-Grievances-

field; P. H. Caley, Princeton.
Resolutions—A. C. Stebbins, Rochester; C. F. Ladner, St. Cloud; J. C. Nolting, St. Paul.

This was followed by the annual report of the secretary, Thomas McCracken, from which we make a number of ex-

### SECRETARY M'CRACKEN'S REPORT.

We are now entering upon a new year of our life as a Hardware association, with the anticipation that its close may be signally marked in our work of uniting the retail dealers of our State in all things pertaining to our commercial interest and advancement. We have had a very busy year, and to the ability, discernment and the tireless energy of our officers and Executive Committee we ask you to give full measure of credit for whatever we have accomplished. They have been faithful to the trust you reposed in them one year ago, diligent at all times in duty, zealous in advancing and guarding the principles of our association, and in maintaining the dignity and honor, the high standard of excellence in administrative ability, which has ever been accorded to the official acts of the Minnesota Hardware Association.

Whatever we may have accomplished as your secretary during the year has been made possible by their kindly cooperation and assistance, and we are pleased at this time to acknowledge our gratitude to them. The lines along which all associations are now working have materially changed from those first marked out to govern their action. They have necessarily become so on account of the changed and constantly changing relations between the consumer and the retailer, the retailer and the jobber, the jobber and the manufacturer. Each being an important factor is alike not subject to elimination from the domain of trade, nor would it be desirable to have them so, were this consummation possible.

#### THE CENTRAL IDEA OF FUTURE GROWTH

and usefulness will be, we believe, the assimilation of these varied interests into a more orderly and perfect whole, each having its clearly defined course, which will in no sense infringe upon the rights of the other.

We do not think you can formulate any effective action which does not take into consideration this unity of interest, that will be in touch with advanced thoughts of the retail Hardware dealers of the State.

#### THE REFORMS

which have been made possible are so contrary to old established modes of bargain and sale as to be necessarily slow in There is an educational feature connected with adoption. this movement which must precede and leaven the whole prior to its full realization. Our associations can move no faster along these lines than the consensus of an awakened opinion among retailers will induce them by co-operation to make our efforts effective. Our work must not only be productive of results to the retailer, but of such a nature as to leave no room for doubt in his mind that association work is benefiting him. We believe this time has come to our association and that we will enroll at this meeting enough new members to give us the majority of the retail dealers of this State.

Treasurer G. M. Evenson, of St. Peter, then read his report, showing his receipts for the year to have been \$1,069.09, with expenditures of \$961.02, leaving a balance on hand of \$108.07. On motion the reports of secretary and treasurer were accepted.

On motion, a telegram of sympathy was sent to J. E. O'Brien, of Crookston, who was absent on account of illness.

An auditing committee was then appointed, consisting of C. F. Ladner, of St. Cloud; A. Meugh, of Princeton, and George F. Derry, of Plainview. At 3:50 the convention adjourned to meet on Thursday at 9 a. m.

#### THURSDAY MORNING SESSION.

With President Tomlinson in the chair, the convention was called to order at 9:30. After the conclusion of the roll call, Secretary McCracken stated that at the last annual meeting of the association he had announced that he would use his utmost endeavor to secure 100 new members during the year. Up to the first of the week he had secured 80, and since then had secured 24, making a total of 104. This announcement was greeted with considerable applause by the convention.

In response to further questions, Secretary McCracken stated that the total membership of the association was now 504, and as there were only 800 strictly legitimate dealers in the State, the association may now be said to embrace two-thirds of the retailers of the State.

On motion, a nominating committee consisting of one member from each Congressional District was appointed, which consisted of the following members: A. T. Stebbins, Rochester; C. Schroeder, Mankato; John R. S. Cosgrove, Le Sueur; J. C. Nolting, St. Paul; H. S. Cleveland, Minneapolis; C. W. Bouck, Royalton; H. E. Swenson, Lake Park; A. Sitz, New York Mills.

The nominating committee a little later made their report through Chairman Schroeder, of Mankato, as follows:

#### ELECTION OF OFFICERS.

President, W. H. Tomlinson, Le Sueur.

Vice-President, H. S. Cleveland, Minneapolis.

Executive Committee: Three years, P. J. McGuire, St. Paul; A. T. Stebbins, Rochester; Charles F. Ladner, St. Cloud, succeeding C. F. Stremel, Minneapolis; S. R. Nelson, Owatonna, and C. F. Ladner.

President Tomlinson expressed him gratification in being re-elected in a brief speech.

The question of protection from department stores was taken up, and on this subject J. F. McGuire, of St. Paul, made a few remarks.

The committee on resolutions, through their chairman, A. T. Stebbins, of Rochester, offered the following among others, which were unanimously adopted:

Resolved, That we deprecate the practice of manufacturers and Hardware jobbers selling Builders' Hardware and Builders' Supplies generally direct to contractors, thereby ignoring

the local dealer, and that we hereby request the officers of this association and the National Retail Hardware Dealers' Association to use their best endeavors to remedy this evil, believing that it can be accomplished through conferences with the manufacturers of Builders' Hardware and the officers of the National Jobbers' Association.

A discussion followed in regard to the methods of department store competition, and the unfair manner in which they advertised their Hardware department, which interested the members to a great extent.

H. O. Roberts, of Minneapolis, made a motion that a committee of three on syndicate buying be appointed, the same to make a standard retail price on the thousand and one articles found for sale in a Hardware store, so that the retailers would have something to govern them in fixing prices. The motion was adopted and the chair appointed Messrs. Roberts, of Minneapolis; Cosgrove, of Le Sueur, and Nelson, of Red Wing.

The auditing committee, through their chairman, C. F. Ladner, announced that they had examined the books of the secretary and treasurer and found them correct. The committee recommended also that future reports of these officials should give full details, both of income and disbursements. This was called to the attention of the Association by President Tomlinson in a few brief remarks. The convention adjourned at 12:80.

#### THURSDAY AFTERNOON SESSION.

The meeting was called to order with President Tomlinson in the chair, at 2:15, and he called on A. C. Hatch, of Battle Lake, president of the Retail Hardware Dealers' Mutual Fire Insurance Co., of Minnesota, who delivered a talk on the subject of "Insurance," with the statistics regarding which he was amply provided, and apparently impressed the convention with the desirability of taking considerable interest in this association business, now being largely entertained by the various State Associations. He was followed by P. W. Lyon, of Janney, Semple, Hill & Co., of Minneapolis, who addressed the convention on

#### THREE ESSENTIALS,

from which we make a few extracts:

The manufacturer is the genesis of our commercial life. From him emanate the finished products which form the basis of our trade transactions, like the vital organs of man's being, which take the food and convert it into blood, sending it out through the arteries of the body, supplying life and action to every member; so the manufacturer appropriates the raw material; the iron from the mine; the timber from the forest; the thought of man's mind, and the strength of his muscle; and by the subtle process of manufacture brings forth the merchandise of commerce and sends it down through the great arteries of our business life, furnishing thereby the very life blood to our commercial body.

Let us suppose, for the sake of argument, however, that in order to increase dividends the manufacturer conceives the idea of disposing of his goods direct to the retail trade, with a view of saving the jobbers' profit, what questions face him demanding a solution?

The first is, will it net him larger returns to market his goods direct than under the time honored jobbing system?

2. Will the service rendered on direct shipments be satis-

factory to the retail public?

3. A most vital question, at least so far as the retailer is concerned, is how much, if any, of the profit thus saved by the manufacturer will go to the dealer in the shape of a reduction in prices. And I am going to leave this last little problem for you to figure out at your leisure, for if there ever was an age when one set of men were willing, nay anxious, to give away any portion of their profit to another set of men, this is it.

It will be seen at a glance that in order for the manufacturer to render satisfactory service to the purchasing public in the absence of the jobber he must, of necessity, maintain a sufficient force of agents in the field and a line of distributing warehouses at strategical points in the territory, otherwise what will become of your rush and telegram orders which come to Twin City jobbers daily. Urgent needs must have a quick response. If you become suddenly ill you cannot send to New York for a physician, but are most likely to call the neighborhood doctor, and the retail public will never transact its business satisfactorily on factory shipments.

Now let us turn our attention for a moment to the jobber in his relations to the retailer and the consumer. The question is often asked: May not the time come when large jobbing houses will be led to adopt the methods now employed by catalogue houses, at least so far as selling to the consumer direct is concerned, and instead of employing a large force of travelers and other expensive agencies, which are now deemed so necessary to the proper prosecution of the jobbers' work; be led to draw the coupling pins on the expense account, and running right by the old town of Retailerville, never set a brake until he pulls in at the end of the line at the new town of Consumerville?

But before the jobber casts aside his old friend, the retailer, as a useless link in the chain of events, he must himself make some careful calculations. The first question to be solved is the same as that which the manufacturer must work out in his direct relations with the retailer—namely:

Will it pay larger dividends?

Is it a safe proposition?

And what are the objections to be overcome in its realization?

The first stubborn fact that blocks the track is, that in order to consummate such a scheme successfully it would be necessary to throw overboard the time honored credit system now employed as between the jobber and the retailer, and in its place must be established the same method now pursued by the catalogue houses—namely, that of doing business on a strictly cash basis. And let me say that the fond hope of the realization of the scheme exists solely in the theoretical brain of the man who has never had the sweet experience of closing a long past due account into a slow note, or has never had a vital connection with a crop failure.

Mr. Lyon's address was received by the convention with every evidence of gratification, apparently appreciating the numerous good points which he made in the course of his address.

M. De Motte, of St. Paul, then read an extremely interesting paper on the subject of "Advertising," in which he elaborated a number of convincing arguments.

H. S. Cleveland, of Minneapolis, then followed with an address on "The Relation of the Traveling Man to the Retail Merchant Has Its Many Sides to Consider," in which he argued that the relationship between the retailer and the "Knight of the Grip" should necessarily be a pleasant one. The province of wholesale houses is to employ the best men for traveling salesmen, and the buyer should appreciate that fact and keep on the right side of these honorable representatives of houses with whom they are pleased to do business.

In response to the telegram of sympathy sent to ex-President J. E. O'Brien, the following telegram was received:

"Your message of good wishes and good will received. Accept my kindest thanks for sentiments expressed. May success attend all your efforts, and may all our hopes be speedily and fully realized."

P. H. Caley, Princeton, chairman of the Special Grievance Committee, next made a report for that committee, which was accepted.

Mr. Ladner reported that the committee appointed last year to consider the abvisability of joining the National Association had at first felt that it would be inadvisable, because of the great expense. In view of the growth of the national movement, however, they now feel that Minnesota should join the national organization, and the means are available for paying the dues if the annual banquet is discontinued. They, therefore, recommended favorable action.

Mr. Hatch moved that the report be adopted, and the motion was carried unanimously.

Mr. Stebbins of the Committee on Resolutions offered the following, which was unanimously adopted:

Resolved, That it is the sense of this association that the time has arrived for us to join hands with the National Re-

tail Hardware Dealers' Association, and the Executive Committee is hereby authorized to take the necessary steps to have the Minnesota Retail Hardware Association enrolled as a member of the National Association.

MARCH 10, 1902.

#### EXECUTIVE SESSION.

The convention went into executive session and a lively discussion ensued relative to trade practices which interfered with the interests of retail dealers.

Announcement was made that the Executive Committee had elected W. A. Barto, of Long Prairie, treasurer for the ensuing year.

#### FRIDAY MORNING SESSION.

The Question Box was opened, and a number of queries found, which created considerable discussion. G. L. Nye, of the Minnesota Stove Co., on invitation addressed the convention, adverting to co-operative buying, which he stated he approved if a practical method could be devised for the purpose.

Mr. McGuire presented the following resolution, which was adopted:

Resolved, That the Hardware traveling men of Minnesota are hereby permitted and requested to become honorary members of the Minnesota Retail Hardware Association.

On motion of H. S. Cleveland it was decided to hold the next annual meeting in Minneapolis.

The president declared the convention adjourned, sine dis.

MEETING OF EXECUTIVE COMMITTEE.

The Executive Committee met on Friday afternoon to finish the work laid out by the convention.

W. H. Tomlinson, of Le Sueur, and Chas. F. Ladner, of St. Cloud, were selected as delegates to the National Association, with the privilege of naming a third delegate.

Thomas McCracken, of Minneapolis, was selected secretary for the ensuing year.

#### BANQUET.

The convention proceedings were followed by a banquet at the Hotel Ryan Thursday evening, which proved a most enjoyable affair, and one of its most attractive features. fully 300 being present. The room presented a beautiful appearance, the tables being arranged in the form of a gridiron, the toastmaster's table extending along the head. A fine orchestra, composed of ladies, furnished instrumental music while the menu was being discussed. Two professional entertainers enlivened the evening with song and After the coffee and cigars, speech making began under the direction of J. F. McGuire, as toastmaster. Mr. McGuire proved to be admirably fitted for this exacting position, introducing each speaker in felicitous phrases. The speakers were heard in the following order: President W. H. Tomlinson spoke of the opportunity for social communion afforded by membership in the association; Charles F. Ladner, father of the association, proved that he could tell a story very well; W. A. Barto, the new treasurer, demonstrated that he could talk readily; R. A. Kirk, president of the National Hardware Association, extended the greeting of his organization to the retail merchants of Minnesota; Geo. W. Cope, of The Iron Age, spoke of the extent of the Hardware trade in Minnesota; H. S. Cleveland spoke on the relations of traveling men and retail merchants; A. T. Stebbins discoursed eloquently of the resources of Minnesota; H. O. Spencer spoke entertainingly without referring to Door Hangers or Grindstones; H. P. Hall, of the St. Paul Trade Journal, lauded the standing of Minnesota among the other States at the Buffalo Exposition and elsewhere, and Jesse A. Gregg spoke for St. Paul jobbing interests.

First Burglar—Why, this is a fat job, Bill. How did you know there was so much silver at this house?

Bill—Put an advertisement in the poper offering five dollars an ounce for real silverware, and this here party was one of the ones that answered it.

## RECENT TRADE PUBLICATIONS.

CANADA CORUNDUM Co., Ltd., Toronto, Ont., Canada. 20page catalogue, envelope size, having reference to the product of Crystal Corundum from the Craig mine, possessing corundum deposits in various portions of the Craig mine mountain. The product of this company represents an entirely new era in abrasives, having inexhaustible deposits of pure corundum which is noted as being the hardest natural abrasive in the world, and of which they are now producing more than two thirds of the world's supply. They look forward confidently to displacing emery almost entirely from the abrasive market, claiming as they do that the advantages which the Craig mine crystal corundum possesses over emery and all other abrasives whether natural or artificial, make it only a matter of time before their product comes into universal use. Exploiting, as this little catalogue does, something entirely new in this especially important line, makes it a very desirables publication for the Hardware dealer to write for and familiarize himself with the contents of. A portion of the contents of this pamphlet consists of numerous testimonials regarding the high quality and superior advantages obtained by the use of this product of the Craig mine.

STOLLBERG & CLAPP Co., Toledo, Ohio. Spring circular dated January 15, of this well known wholesale jobbing house, embracing a line of goods suitable for the season which they desire to stimulate the sale of among their customers. This volume is a pamphlet, full catalogue size, printed on better paper than is usually seen in these supplementary catalogues, well illustrated throughout, and includes in its contents the usual Spring assortment, including steel goods, haying tools, grass scythes, wheelbarrows, spray pumps, shovels, spades, post hole augers, window screens, refrigerators, etc. A very useful compendium of Spring wants.

Frank Mossberg Co., Attleboro, Mass. Envelope size catalogue of 20 pages of Bicycle Bells, Automobile Bells and Wrenches manufactured in styles that have already become popular with the trade. This company manufacture sheet metal stampings and special tools; also machinery for the bicycle business. They solicit correspondence regarding the same.

FARWELL, OZMUN, KIRK & Co., St. Paul, Minn. 1902 catalogue of Bicycle Sundries. This is an important addition to the usefulness of their regular catalogue, being adapted more particularly for mail orders throughout the retail trade. It is in pamphlet form, 80 pages, full catalogue size, and embraces in its contents about everything that could possibly be needed or desired in the way of bicycle sundries, and covers too large a line of specialties to be even partially enumerated. It is as complete a representation condensed as it is possible to place between so few pages as are represented in this catalogue.

BUCKEYE CHURN Co., Sidney, Ohio. Envelope size catalogue of 12 pages, covering the products well known to the Hardware trade manufactured by this company, including the Buckeye Churn, the Sunken Lid Ash Dash Churn, the Queen Washing Machine, the Eureka Oak Horse Pail, the Climax and the Buckeye Oak Horse Pails. The Climax Pail is made of oak with flush bottom, and with their patent pail ear extending down the sides and hooked over bottom of stave with rivets through the two upper hoops on each side so the hoops cannot come off. The others are similar in

their construction, made with or without the strap on side. The cheapest article in the catalogue in that line is the Buckeye Ash Horse Pail made of ash with flush bottom, with short ear which extends below the upper hoop, having rivets through upper hoop on each side. These are listed as low as \$3.50 for iron hoops; \$4 for galvanized.

A. Tredway & Sons Hardware Co., Dubuque, Iowa. Spring circular No. 30, February, 1902. This is a 120-page catalogue, evidently intended and designed to assist their large general catalogue distributed to the retail dealers forming their customers. It is a very complete catalogue, comprising all the possible requirements for Spring trade, and covering to a certain extent every branch of the Hardware business that would naturally be stimulated by Spring wants, covering steel goods of every description, including grass hooks, scythes and scythe snaths, post hole diggers and drain spades, scythe stones and grindstones, lawn mowers, refrigerators, sewing machines, washing machines, clothes wringers, etc. Many a good and satisfactory order could be made by careful attention being given to the goods described in its pages, and no doubt the publication is a very acceptable one to the dealer to whom it is sent.

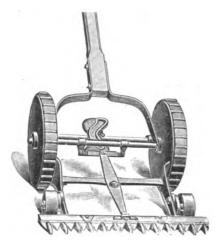

HORTON Mrg. Co., Fort Wayne, Ind. 12-page pamphlet catalogue of Washing Machines manufactured by this concern, which includes the Horton Rotary Washer, the Western Rotary Washer, the Western Washer, the American Washer, and the Wayne Round Washer, together with the necessary repairs numbered and specified for each of the washing machines enumerated in the contents of the catalogue. Included in its contents in the form of a circular attention is called to the latest improved Globe Washer, which is claimed to be the most up-to-date washing machine now before the buying public. Has later improvements, is a double-action machine, has two cylinders or rubbers, which by one motion of the operator are moved in opposite directions, thus rubbing and cleansing the clothes in a shorter time than can be done by any other method. Those interested in the distribution of a specialty as important as a washing machine would do well to write for this catalogue.

CHICAGO FLEXIBLE SHAFT Co., La Salle Avenue and Ontario Street, Chicago, with New York office at 97 Chambers Street, and London office at 6 Denman Street, S. E. Oblong catalogue of large size, covering the more important products of this well known concern, who are large manufacturers of Horse Clipping and Sheep Shearing Machines. They have received the highest honors at every exposition at which they have made an exhibit. The catalogue is fully illustrated throughout, giving large size illustrations showing the operation of clipping under various circumstances, together with illustrations and full descriptions of the machines by which this is accomplished. It is a very interesting catalogue for anyone handling these goods, being complete in every respect, and with full descriptions of their unvarying usefulness. These goods are marketed at moderate prices that afford the Hardware dealer who handles them a Included in the contents reference is satisfactory profit. made to the Clark Carriage Heater, which has become exceedingly popular wherever introduced. A briquette of carbon which is used in connection therewith will heat from twelve to fifteen hours. In fact, a third of a cake is sufficient for ordinary use, and will last from eight to ten hours. These heaters have been regarded as being a very desirable method of heating a carriage, and the sale has largely increased wherever attention has been given to their undoubted merits.

### NEW GOODS AND SPECIALTIES.

The Clipper Lawn Mower.

The Clipper Lawn Mower Co., Norristown, Pa., are placing upon the market the Clipper Lawn Mower, with the manufacture of which they have been identified for so long a time, greatly improved for this season. The illustration we give herewith shows a perspective view of the Clipper

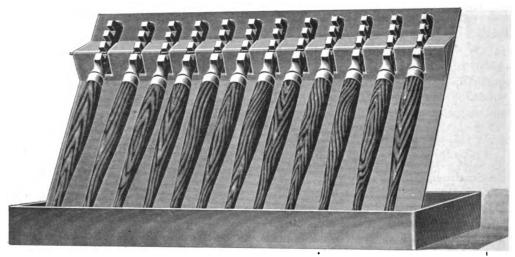

THE CLIPPER LAWN MOWER.

Lawn Mower. It will be observed the cutter bar is directly in front of the wheels. The wheels in traveling over the ground where the grass is cut, never roll down the standing grass as some other mowers do. The small gauge wheels at the side are designed to measure the height you wish to cut the grass. The knives can be sharpened in the machine with a small file or whetstone, or if deemed desirable can be taken out and ground, directions indicating that they should be

upright position, the vibration or reciprocating motion of the knives shearing off the grass in a very even manner. It is claimed by the manufacturers that the improved devices used in this machine make it entirely unnecessary to use either grass hook or shears when this lawn mower is in use. The company also make a Pony Mower of similar construction, having a cutter bar 24 inches long, the wheels being 15 inches in height, with a face of two inches. The handle naturally is much heavier than that of the hand mower. A V-shaped drag bar is attached to handle irons, to which pony is attached. This mower's weight is about 85 pounds.

#### Standard Glass Cutters.

W. L. Barrett, Bristol, Conn., is the manufacturer of the Standard Glass Cutters, which have been his most noted product for the last twenty years. They are made in different styles of handles in order to conform to the hand, and in their construction will be found as suitable as the old glazier's diamond. Instead of the diamond point formerly relied upon as the only article that could properly cut glass, these popular cutters are fitted with a small, hardened steel revolving wheel, the sharp edge of which cuts through the glass equally as well as the diamond. These goods are manufactured in a large variety of styles and sizes at varying prices. The style which we illustrate shows them carded for distribution to the Hardware trade, making a very good counter display that invariably attracts attention. Included in the assortment of these goods will be found Circle Sweeps for cutting circles, rounding lights, etc., which he makes in two sizes, 20 and 40 inches, the metal parts being nickel-plated throughout, and the bottom of the disk

STANDARD GLASS CUTTERS.

sharpened only on the beveled side of the knives. It is claimed that in the operation of the Clipper Mower, on account of the simplicity of construction nothing escapes its grasp, weeds, dandelion and plantain being cut evenly and fully as close as grass. From the improved construction of the machine the height of the grass is immaterial to the Clipper, as so far as the power is concerned no more is required to cut grass two feet high than it would to cut two inches, and it cuts much more closely in the mowing of irregular surfaces and spaces than is ordinarily the case, such as between posts of fences, walks and shrubbery. The fingers on the finger bars of the mower as it progresses, gather in the grass with great uniformity, and in nearly an

covered with rubber. He also manufactures a Glass Tube Cutter, very handy for engineers, steam fitters and others for cutting glass tubes. He has recently issued his 1902 catalogue, which should be asked for by every Hardwareman who has not already received it, as it covers a line of goods not usually incorporated to a similar extent in any catalogue within reach.

Roberts—Have you heard anything about Thompson's affairs since the failure? When does he expect to resume? Peters—Just as soon as the creditors become reconciled to the fact that they won't get a cent.—Ex.

#### REVIEW OF THE MARKETS.

Wire Nails: A fairly good demand continues for Wire Nails, which, inconvenienced as deliveries have been by unusual conditions, has resulted in a depletion of stocks and lack of assortment. The production of nails in some outside plants has been seriously interfered with by the overplus of water caused by the recent storms. Quotations that represent the market continue as previously given: \$2.05 to \$2.10 f. o. b. Pittsburgh, plus actual freight to destination.

New York. No weakness is manifest in the local market for Wire Nails, prices being firm, as follows:

Carloads on dock are quoted at \$2.25; small lots from store \$2.30.

Cut Nails: At the meeting of the Cut Nail Association, held March 4th, it was deemed advisable to advance prices five cents per keg for the month of March. The quotations are as follows: f. o. b. Pittsburgh, plus the actual freight to point of destination, terms 60 days, or 2 per cent. off in 10 days:

 Carload lots.
 \$2.00

 Less than carload lots.
 2.05

New York. No unusual demand exists for Cut Nails at this time. Prices that represent the local market are as follows:

Barb Wire: The Barb Wire market under a very satisfactory demand continues firm, at prices previously quoted, which for quantity lots are as follows:

| To jobbers in carload lots, Painted   | \$2.60 |
|---------------------------------------|--------|
| " Galvanized                          | 2.90   |
| " less than carload lots, Painted     | 2.65   |
| " Galvanized                          |        |
| To retailers in carload lots, Painted |        |
| " Galvanized                          | 3.00   |
| " less than carload lots. Painted     | 2.80   |
| " Galvanized                          |        |

Ellwood & Baker Wise is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plain Wire: The increase in manufacturing facilities on this product, apparently, only adds to the demand, which is an exceptionally good one. Present quotations are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

|                                        | Plain. | Galv.  |
|----------------------------------------|--------|--------|
| To jobbers in carload lots             | \$2.00 | \$2.35 |
| To jobbers in less than carload lots   | 2.05   | 2.40   |
| To retailers in carload lots           |        | 2.45   |
| To retailers in less than carload lets | 2 20   | 9.55   |

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances, as follows:

| 6  | to 9.  |     | Base   |         |      |      |  |  |  | <br>\$0.40 | extra. |
|----|--------|-----|--------|---------|------|------|--|--|--|------------|--------|
| 10 |        |     | \$0.05 | advance | over | base |  |  |  | <br>40     | **     |
| 11 |        |     | 10     | **      | **   | 46   |  |  |  | <br>40     | **     |
| 12 | and 12 | 216 | 15     | 44      | "    | 44   |  |  |  | 40         |        |
|    |        |     |        | 44      | 44   |      |  |  |  | 40         |        |
|    |        |     |        | 44      | **   |      |  |  |  | 40         | **     |
| 15 |        |     |        | **      | **   |      |  |  |  | 75         | 44     |
| 18 |        |     |        | 44      | 44   |      |  |  |  | 75         | +4     |
|    |        |     |        |         | • •  |      |  |  |  | . 1.0ŏ     | **     |
|    |        |     |        | 64      | 44   |      |  |  |  | 1 00       | 44     |

For even weight bundles, 50 pounds and over, 5 cents per bundle advance on above.

Nats: An advance was made by the manufacturers on February 25 in the prices of Cold Punched and Hot Pressed Nuts. Present printed quotations are as follows:

|                                       |   | List. |
|---------------------------------------|---|-------|
| Cold Punched Plain Blank Square Nuts  |   | 4.80  |
| Cold Punched Plain Blank Hexagon Nuts | ' | 5.00  |
| C. T. & R. Blank Square Nuts          |   |       |
| C. T. & R. Blank Hexagon Nuts         |   |       |
| Cold Punched Plain Tapped Square Nuts |   |       |

| •                                 |       | Off  | List. |
|-----------------------------------|-------|------|-------|
| Cold Punched Plain Tapped Hexagon | Nuts. | <br> | 4.80  |
| C, T. & R. Tapped Square Nuts     |       | <br> | 4.80  |
| C. T. & R. Tapped Hexagon Nuts    |       | <br> | 5.30  |
| Hot Pressed Nuts, Square Blank    |       | <br> | 5.10  |
| Hot Pressed Nuts, Hexagon Blank   |       |      |       |
| Hot Pressed Nuts, Square Tapped   |       |      |       |
| Hot Pressed Nuts, Hexagon Tapped. |       | <br> | 5.30  |

Binder Twine: No change is noted in quotations previously given, which remain as follows, subject to 1/4 cent per pound rebate when purchased in carload lots:

|             | Per pound. |
|-------------|------------|
| Sisal       | .11 cents. |
| Standard    |            |
| Manila      |            |
| Pure Manila |            |

Cordage: The rope market continues firm, recent advance on Manila making the quotations which we give below, and which, now represent the market:

|                              | Founds, |
|------------------------------|---------|
|                              | Cents.  |
| Manila, 7-16 inch and larger | . 131/2 |
| % inch                       | . 14    |
| ¼ inch and 5-16              | . 141/4 |
| Sisal. 7-16 inch and larger  | . 10    |
| Sisal, 7-16 inch and larger  | . 101/4 |
| 12 inch and 5-16 inch        | . 11    |
|                              |         |
| Jute Rope, No. 1             | . 614   |
| No. 2                        | . 6′    |

Linsced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

#### THE PHILADELPHIA TRADE.

During the last ten days Winter has, apparently, been trying to break all previous records, and has established a reputation for himself which is almost without precedent. Telegraph and railroad service has been greatly crippled—so much so it was impossible to make shipments to many points—and travelers have found the roads almost impassable, and railroad communication entirely broken.

This has doubtless had its effect on trade, and yet there is nothing to complain of in the volume of business, which has kept up in very satisfactory shape, and the outlook is still good for a lively Spring trade—especially in view of the fact that the retailer has had ample opportunity to dispose of his Winter goods, and, with empty shelves, and with full money drawers, dealers should all be in unusually good shape.

Prices are still very firm, and advances are of frequent occurrence, while the few changes taking place in the opposite direction seem to be mostly a readjustment of values.

The Axe market has taken a decided turn upward, and now seems to be in very strong hands, while still further advances are threatened.

Naturally, collections have suffered somewhat on account of the weather, but there seems to be no reason why there should not be a great improvement in this respect as soon as communications are again restored.

BIDDLE HARDWARE Co.

#### THE PITTSBURGH TRADE.

Pittsburgh has just experienced one of the worst river floods in her history. The financial loss to manufacturers and merchants has been quite heavy. Two to three days of suspension of business, and repairs that must be made, to say nothing of the extra labor and inconvenience entailed.

A large section of the business district had two feet of water over the streets, and a much larger section had the cel-

lars flooded, while all the low lying residence district was under water, causing much suffering.

These floods have been more frequent than usual during the past year or two. This one is the worst since 1884.

Apart from weather conditions business is in good shape, and a little sunshine will give the jobbing interests all they can attend to.

Logan-Gregg Hardware Co.

#### THE DAVENPORT TRADE.

The writer's head is still whirling from the effects of the Prince Henry ball at the Auditorium, in the "City by the Lake," and it may be that the whirl of the dance and this trade report will get mixed. The ball was a great success, more so than this letter will be. The trade conditions compare favorably with the reception of His Royal Highness in this land of the free and the home of the money-getters. The difficulty of obtaining enough of some lines of goods is equal to that of gaining an interview or handshake with the worthy representative from the Fatherland. While on the whole prices of Hardware are firm and advancing, some goods—shovels, for example—have reached as elevated a position as royalty, while other lines, among them may be mentioned screws, as low as the ladies' courtesies on being presented to the Brother of an Emperor. The elegant gowns and brilliant jewels worn may have been bought with the profits of some of the Hardware and Steel industrials, but hardly with the jobbing profits on Nails and Barb Wire. The weather is as bright and exhilarating as the strains of music of the orchestra of one hundred and fifty musicians. Trade is good, and so was the appetite of the dancers. Collections are reasonably fair, and the band played on.

SICKELS, PRESTON & NUTTING Co.

#### THE COLUMBUS TRADE.

Several things have happened since our last letter. The Ohio State Hardware Association met in our city last week, as you well know. We may say that it was the most enthusiastic and best attended meeting they ever held, which is proof that Columbus is the right place for the convention of the State. The easy access and lessened average expense to the delegates from the different parts of the State is an item not to be overlooked. We believe that the visiting delegates and representatives of manufacturers and jobbers were pleased with the treatment they received from the Hardware dealers of Columbus. We did nothing elaborate, but enough to show that we appreciated their coming to Columbus. We are glad to add that they decided to meet in Columbus next year.

We have had a touch of Spring, but it was only of very short duration. We think when the ground hog came out to see about it, that some hungry robin or blue bird spied him and thought it would be a good time to fatten up on some

fleas; but Mr. Hog did not like it, so he returned to his hole for another nap of no telling how long.

The demand for goods for immediate shipment is not large, but plenty of business is being booked for April shipment, and it will hurry us all to get the goods out on time. Makers of wire and nails are already beginning to be a little slow. Manufacturers of steel goods, screen goods, etc., are well sold up and don't want any more orders. The outlook is very encouraging for a heavy Spring and Summer business.

The Smith Bros. Hardware Co.

#### THE ST. PAUL TRADE.

The pleasant weather we have been having has stimulated business to such an extent that we are crowded with orders, which is an unusual condition so early in the year. The farmer and merchant think Spring has arrived, and the demand for barbed wire and nails is at least a month earlier than usual. Possibly this is partly due to the rumors of a scarcity and the rumors of higher prices.

Our State Retail Association held their meeting here last week. They had a good time, and all felt that it paid to attend. The general feeling among them is that the Spring business will exceed that of any previous year.

C. W. HACKETT HARDWARE Co.

#### THE SAN FRANCISCO TRADE.

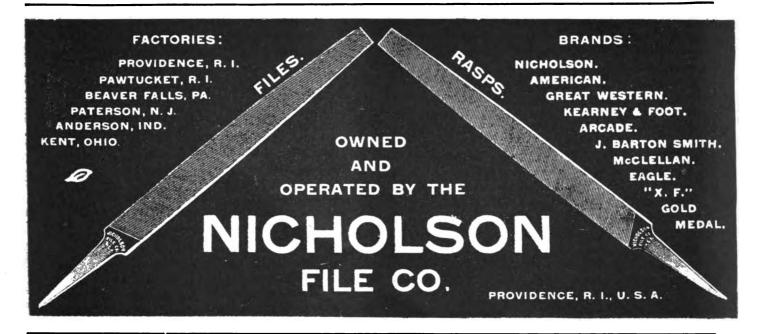

This first day of March has been one of a seasonable sort of days when everybody remains indoors, leaving to itself outside the feature of the day, an incessant downpour of rain, intermingled with strong blasts of wind. This was the weather condition from store opening time in the morning till the middle of the afternoon, when an exceptionally notable change took place and lasted till near midnight. The rain gave way to the wind storm, which so grew by degrees in intensity that by store-closing time, 6 o'clock, it was expanded to the extreme fury measurement of a hurricane, so continuing, with but momentary intermissions till near the midnight hour.

And what has all this to do with the San Francisco Hardware trade? Only this, that the San Francisco Bay was so corrugated with dangerous rolls and swept by violent squalls that the ferry boat service was suspended for the night, and upward of 500 Hardware, stoves and machinery dealers and salesmen, who have their homes over the bay, were compelled to remain in the city all night, many of them dutifully wiring their wives to that effect.

Two of these storm-bound merchants were O. F. Sites, of the Palace Hardware Co., and Henry Gracey, of the stoves and shelf goods firm, Henry Gracey & Co., who are, by the way, president and secretary, respectively, of the California State Retail Hardware Association. And also, by virtue of their office, members of the association's executive committee; they brought the other city members of the executive committee to a rallying point and utilized the stormy night by arranging interesting details and plans incidental to the association's annual meeting, which is to assemble in Marble Hall of the Palace Hotel, in this city, on the 10th and 11th days of this month. Both President Sites and Secretary Gracey express themselves of the belief that this assembly of California Hardware dealers will be a record-breaker, as to attendance, and they predict the consummation of business of vital importance to both the jobbing and retail trades.

On trade outlook and conditions Mr. Sites said: "The Palace Hardware Co. has enjoyed quite a number of notably good trade years, the best of all being that of last year; but judging from the way 1902 has dealt with us the last two years, and the unprecedented number of builders' contracts being signed and under consideration, we feel confident that this year's business with us will greatly exceed that of last."

And this week word was received from John C. White, of Marysville, an agricultural and mining centre of Northern

California. Mr. White is president of the Pacific Retail Hardware Association and prominent in the firm of White, Cooley & Cutts, Hardware dealers of fine and wide repute in Northern California. Mr. White writes that the wet weather conditions up his way are just right for his section of country, and that new crops and mining prospects never looked better, and that like all other California-loving people of the Northern part of the State, he is delighted with the knowledge that Southern California is also getting a good wetting.

INDUSTRIAL PRESS ASSOCIATION.

## Consolidation of Russell & Erwin Mfg. Co. and P. & F. Corbin.

Official announcement has been made that the directors of the P. & F. Corbin Co. and the Russell & Erwin Mfg. Co. of New Britain, Conn., have come to an agreement, which, when ratified by the stockholders of the two companies, will bring about a consolidation of these two great manufacturing interests. The two companies, which have been for years the commercial bulwark of New Britain, have been rivals for the past thirty years, being engaged in practically the same line of manufacturing. Both have been successful, yet on account of the complications of general lines of business it has been thought to be better for the stockholders of both concerns and for the general manufacturing interests of New Britain to consolidate them under one head and one management.

The new company will have ample capital stock, and with the superior producing abilities both companies possess, the new concern will be a potent factor in the Builders' Hardware interests of the country. While the details of the consolidation have not yet been completed, the terms of the agreement will be submitted to the stockholders in a few days by means of a circular letter, and it is expected that the consolidation will be effected by May 1.

Hon. P. Corbin, the head and founder of the P. & F. Corbin Co., is to be the president of the new company. It will be formed somewhat after the pattern of the American Brass Company of Waterbury and the Naugatuck Valley, and will take over the stock of the two concerns. The head-quarters of the new company will be New Britain and the policy will also be determined there. The consolidation is in no sense a trust and there will be no bonds or water in the stock of the new company. The name decided upon is "The American Hardware Co." The Corbin Co. and the Russell & Erwin Co. will maintain their identity as separate organizations and will be managed by directors of the combined corporation.

There have been rumors afloat for some time that something important was pending in the affairs of the two companies, but nothing was given out. A meeting of the leading directors of the two companies was held a few weeks ago, but few people knew what was going on and the announcement came as a surprise.

The capital stock of the P. & F. Corbin Co. is \$500,000, and of the Russell & Erwin Co. \$1,000,000. At the last session of the Legislature both companies obtained authority to increase their capital stock. The stock of the new company will be at least three times that of the present capital of both companies.

The directors and officers of the Russell & Erwin Co. are as follows:

President-George J. Laighton.

Vice-President-Howard S. Hart.

Secretary—Theodore Smith.

Assistant Secretary—Isaac D. Russell.

Treasurer-Edward Meyer.

Directors—William G. Smythe, George J. Laighton, A. J. Sloper, F. L. Hungerford, Daniel R. Howe, Robert W. Parsons, F. P. Wilcox, C. E. Mitchell and Howard S. Hart.

The annual meeting of P. & F. Corbin was held recently and the directors and officers of the corporation are as follows: President and treasurer, Philip Corbin; first vice-president, Andrew Corbin; second vice-president, Charles M. Jarvis; secretary, Charles E. Wetmore; assistant treasurer, Charles H. Parsons; directors, J. P. Talcott, Charles Miller, Charles H. Parsons, Charles E. Wetmore, Charles Glover, Charles M. Jarvis and A. N. Abbe.

The capital stock of the P. & F. Corbin Co. is \$500,000 and the par value of the shares of stock is \$25. Recent quotations in the Hartford stock market have been 107 bid and 115 asked for the shares. At the bid price the half million of stock would bring \$2,140,000 and at the asking price \$2,340,000. The capital of the Russell & Erwin Co. is \$1,000,000 and the par value of each share is \$25. In the Hartford market the recent asking price was 62. At this price the entire capital stock would bring about \$2,250,000. It will be seen that the market value of the total capital stock of both companies is nearly equal. Much of the stock of these companies is owned in this city.

The Russell & Erwin Mfg. Co. was founded in 1839 by Henry E. Russell and Cornelius B. Erwin, who with F. T. Stanley bought out the firm of Stanley, Russell & Co. There were several other partners until January, 1846, when the company was reorganized as "Russell & Erwin," and until 1851, when the title became the Russell & Erwin Mfg. Co.

Its capital stock was \$125,000. The business prospered and the capital was soon increased to \$200,000, and in 1864 to \$500,000. For some years the capital has been \$1,000,000.

In 1853 the firm of P. & F. Corbin was organized as a stock company, the names of the founders being retained and since that time it has enjoyed continuous prosperity. Originally the company made ox-balls for tipping the horns of cattle, window springs, lamp-hooks and kindred products, but soon branched out into the manufacture of certain kinds of bolts, locks, hinges, latches and builders' Hardware.

## New York State Association of Jobbers of Bicycle Supplies.

At a meeting held at the Butterfield House, Utica, on February 26, of the sundry jobbers in bicycle supplies, the following firms were represented:

Sidney B. Robey & Co., Rochester, N. Y.

E. H. Hall Co., Rochester, N. Y.

Albany Iron & Hardware Co., Albany, N. Y.

Union Cycle Co., Utica, N. Y.

Clark, Horrocks & Co., Utica, N. Y.

C. H. Childs & Co., Utica, N. Y.

J. A. Richard & Co., Schenectady, N. Y.

C. B. Barker & Co., New York City.

P. A. Frasse & Co., New York City.

Elmira Arms Co., Elmira, N. Y.

H. R. Olmstead & Co., Syracuse, N. Y.

Spalding & Co., Syracuse, N. Y.

Kelsey & Co., Buffalo, N. Y.

An organization was effected, and the following officers elected:

President—H. L. Hall, of the E. H. Hall Co., Rochester. Vice-President—A. E. Brian, of P. A. Frasse & Co., New York City.

Secretary and Treasurer—Wm. Spalding, of Spalding & Co., Syracuse.

The Executive Committee consists of the following:

H. L. Hall, of E. H. Hall & Co., Rochester.

A. E. Brian, of P. A. Frasse & Co., New York City.

William Spalding, of Spalding & Co., Syracuse.

C. L. Kelsey, of Kelsey & Co., Buffalo.

Harris Parker of C. B. Parker & Co., New York City.

There was also prepared a list of eligible members of the New York State Jobbers, which will be revised and corrected from time to time, so that a complete and accurate list of the New York Jobbers can be had for future reference and consideration. The meeting was a most enthusiastic one and satisfactory from all standpoints, and will be, as was the general opinion, of considerable assistance and value, not only

to the jobbing trade in general and those interested in the jobbing business, but also of assistance in many ways to the manufacturers who deal with the jobbers as well as to the trade in general.

The following list of regrets and assurances of co-operation were received:

Willis Park Row Cycle Co., New York City.

J. S. Leng's Son & Co., New York City.

Wilson Co., New York City.

New York Sporting Goods Co., New York City.

American Cycle Mfg. Co., New York City.

Chas. R. Miller, New York City.

Jos. Straus & Co., Buffalo, N. Y.

#### The New Axe Combination.

The Axe Combination recently formed is said to include the following important manufacturers, representing a capital of \$15,000,000. The American Axe & Tool Co., itself a consolidation of ten or twelve plants, with headquarters in the Postal Telegraph building, New York, and factories in Pittsburgh, Beaver Falls and Lewistown, Fa., and Jamestown, N. Y.; the Kelly Axe Mfg. Co., at Alexandria, Ind., the second largest factory; the Warren Axe & Tool Co., Warren, Pa.; the United States Edge Tool Co., Cattaraugus, N. Y.; the Standard Axe Co., Pa.; the Mann Edge Tool Co., Lewistown, Pa.; Romer Axe Co., Dunkirk, N. Y.

Tommy—Granny, do your specs magnify?

Granny-Oh, yes, Tommy; a little.

Tommy—Then, would you mind taking them off while you cut my cake, please, granny?—Ex.

She.—"Does my new dress give me a good fit?"
He.—"I think it will when you see it in the glass."

# STANLEY RULE & LEVEL CO.

NEW BRITAIN, CONN., U. S. A.

## Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

#### For Conservative Legislation.

Mr. H. M. Atkinson, a New Englander who has identified himself by residence and activity with Southern development, writes in the twentieth anniversary number of the Manufacturers' Record, of Baltimore, urging carefulness in legislation. He says: "The South to-day is in a stage of active growth and development. The laws that may be fitted for older, more settled and more closely populated cities and States will not do for the South to-day. The rights of capital should be guarded, and it should be treated honestly and justly. Nothing will help the South more to-day than the reputation that investments made in the Southern States will be protected. The way to develop a country is to pass laws that mean the protection of capital, and the passage of such laws will mean increase of population and increase of taxable values. The broad view of such questions can only be brought about by education. The broadening of the individual and the teaching of the principles of political economy and municipal government are the needs of the day. This means also the broadening and strengthening of character—that is, the production of men, the word being used in its best sense."

#### Southern Development Only Begun.

"We have increased our coal production from 6,000,000 tons in 1880 to over 50,000,000 last year," says the Manufacturers' Record, of Baltimore, in its twentieth anniversary number, "but we have only opened a small mine here and there, when compared with the extent of territory and of wealth of coal in the great coal area of the South. Twenty years ago the South produced less than 200,000 barrels of oil a year. West Virginia alone is now producing over 15,000,-000 barrels a year, and the extension of this oil field into-Kentucky and Tennessee and into the farther South is every day being emphasized by the boring of new wells; while, turning to the Gulf, Texas has startled the world with an oil supply so far beyond our comprehension that it is almost folly to attempt to predict what may be its influence in revolutionizing many of the industries of Europe as well as of America. But the statistics which tell the story in cold figures of what has been accomplished, and tell how our pigiron production has grown from less than 400,000 tons to 2,600,000 tons, our cotton mill capital from \$21,000,000 to \$150,000,000, our total manufacturing capital from \$250,-000,000 to \$1,100,000,000, our exports through Southern ports from \$261,000,000 to \$510,000,000, tell us really but a small part of the work which has been accomplished."

# TO SUPERSEDE EMERY

## CRAIG MINE

# CRYSTAL CORUNDUM

Why buy iron ore for abrasive purposes? Emery is 70 per cent. oxide of iron, combined alumina, etc., and only 30 per cent. corundum. Try it with a magnet and see for yourself. The 70 per cent. rubs and burns, only the 30 per cent. (the corundum) cuts and polishes. Craig Mine Crystal Corundum is 98 per cent. pure. The 98 per cent. cuts and polishes.

#### WHAT CONSUMERS SAY ABOUT IT.

THE MONARCH EMERY & CORUNDUM WHEEL CO., Camden, N. J.—"We enclose you an order for a car load of Craig Mine Crystal Corundum and trust you will see that it reaches us without delay. Now that we are accustomed to using it. we frankly admit all that you claim for it. Reports from our customers show them to have formed the same high opinion of it."

THE HART EMERY WHEEL CO., Hamilton, Ontarlo.—"You ask us for an opinion of Craig Mine Crystal Corundum and our experience in its use. Our opinion has never varied Craig Mine Crystal Corundum is the supplanter of emery as material for making abrasive wheels."

VERITY PLOW CO., LTD., Brantford, Ont.—"We would say the Craig Mine Crystal Corundum we received for polishing purposes was very satisfactory and very much superior to the emery that we had been using before. We found that we could polish at least two plows more with the same buff than we could with emery."

Champien Seeder Co., URBANA, IND.

DAVID MAYDOLE HAMMER Co., Norwich, N. Y. catalogue of Maydole Hammers, elegantly illustrated, being lithographed throughout in natural colors, both hammer and handle; the cuts are shown in many cases in full size. The contents include a full line of Adz Eye Nail Hammers, round, bell face and octagon, also with straight claw; Joiners' Nail Hammers, either round, bell face or octagon; Farriers' Adz Eye Driving Hammers, round and octagon; also in Boston and California patterns; Farriers' Adz Eye Driving Hammers, Whaleback Claw Hammers, in the several Included in the contents are Horseshapes; also plain eye.

shoers' Rounding, Turning and Fitting Hammers; t Ironers' Hand Hammers, Blacksmith's Hand Hammers, both wedge and shoulder pein; Machinists' Ball Pein, etc. This is one of the most complete Hammer catalogues that has come to our notice. The weights in every case are given without including weight of handle. Each particular pattern of Hammer has an arbitrary number with list prices, making it unnecessary to send description, and enabling the factory to fill orders with ease. Quite a number of new styles and patterns are included in this catalogue that are not yet familiar to the entire trade, and yet will no doubt meet with a ready sale when introduced.

THE B-B MFG. CO., Davenport, Iowa.

SE your ice cream freezer more and your stove less. You will be more comfortable in summer if less time is spent over a hot stove. It pays in the time saved and in comfort. Part of the meal must be cooked, but part may be frozen. It takes less time to freeze than it does to cook—if you use the

# Peerless Iceland Freezer

Or the One Motion Freezer

Three minutes is the freezing time. Ice cream, ices, frozen fruits and puddings are more wholesome and delicious than any other dessert, especially in summer. The only expense is the materials, which you have in the house. Patented Dasher makes one motion enough, and the Peerless Iceland the simplest, most economical and best freezer for you to get. "ICE CREAM SECRETS" (free) gives many new recipes as well as all the good old standbys, all easy to make.

To Remove all doubt: If you've never made ice cream at home, or if you have leaden drom your dealer take it home, and if not perfectly pleased, return it, and dealer will refund your money. If your dealer hasn't it, he can get it; or write us and we will see that you are supplied Be sure and get a Peerless Iceland Easily recognized from above photograph; notice label.

DANA & CO., Dept A, Cincinnati, Ohio.

The Peerless Ice Chipper to chip ice properly, saves ice, time and hands. 25c at all dealers or from us.

# Your Customers will see it.

This is another of a series of advertisements which will appear in all the leading magazines and ladies' papers this Spring and Summer. All of your women customers take one or more of these publications. Don't you want to have your store identified with the very best advertising?

Order Peerless Iceland Freezers and Peerless Ice Chippers from your jobber early so that he can put you in touch with our advertising department. If yours doesn't handle them, see one who does, or write us and we will see that you are supplied.

DANA & CO., Cincinnati. San Francisco: 105 Front St. New York: 10 Warren St.

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

#### New Companies, Agencies, Etc.

Boston, Mass.—Fred E. Randall, who for years has been a prominent dealer in Chelsea, Mass., has opened a new store at No. 245 Columbus Avenue.

Buffalo, N. Y.—The Wright Taper Roller Bearing Co. has been incorporated, with a capital of \$900,000. The company will construct extensive works in Buffalo for the manufacture of an anti-friction taper roller bearing for automobiles, bicycles, road vehicles, and for other purposes, under the American patents of W. Hamilton Wright, who also holds European patents.

Burlington, N. J.—The Gray Mfg. Co. has been incorporated, and will locate a factory here for the manufacture of bicycles, automobiles and machinery.

Easton, Md.—F. A. Shannahan opened repair shop in Dover Street.

Findlay, O.—Bruce Houser opened shop in North Main Street.

Meriden, Conn.—H. E. Loll opened store in Colony Street.

New Orleans, La.—The Johnson Wheel Co. has been organized, with \$1,000,000 capital, and a plant will be established there at an uncertain date fixed at "as soon as certain conditions have been complied with." The company has bought from J. N. Johnson the patents on a spring wheel for bicycles and automobiles, etc. The officers of the company are: Albert Mackie, president; J. N. Johnson, vice-president; E. H. Mc-Fall, secretary. Mr. Johnson is from Hattiesburg, Miss.

New York, N. Y.—The Aster Motor Co. is being organized, and will probably be incorporated for \$1,000,000. It owns the American rights to the Aster motors, which were formerly handled in this country by the Waltham Mfg. Co. The plans are to import the motors and build them into vehicles here. They are made in sizes suitable for motor-cycles as well as for motor vehicles.

Owego, N. Y.—M. H. Gaskill has reopened repair shop.

Quitman, Ga.—G. F. Buser opened repair shop in old Bank building.

# PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us

CHEAPER

NEW IDEA

THE ACME OF PERFECTION, JENNINGS NEW A7% SAW.

Just the width you want.

For Keen Kutting it stands alone.

This saw is on new old lines, 6 inches wide at butt, 114 inches at point. A saw that has been worn down by constant use becomes invaluable to the owner, as it can be used for many purposes where a full width saw is unwieldy. They are made of the best refined spring steel, ground four gauges thin on back, full beveled filed and set, carved and full polished handle, four improved brass screws. For fine work it stands alone.

## THE BEST ROTARY **WASHING MACHINE?**

is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.

noiseless.

The tub is made of Louisiana Red Cypress Lumber, cherry finish; the legs are solid with tub (not removable, breakable legs fastened with screws).

The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot s ap-suds, and cleaning them without rubbing them to pieces.

This washer is made by experienced mechanics, and will out-last any other washer on the market.

The tub has a wringer box fastened with steel brackets.

The lid on the tub closes tight, no escape of steam.

Manufactured by H. F. BRAMMER MFG. CO.. DAVENPORT, IOWA.

HARDWARE

The following named gentlemen were unanimously elected to membership in the Hardware Club of New York at the March meeting of its board of governors:

Fred H. Cozzens, 13 Park Row, New York.
Frank A. Fuller, 35 South William Street, New York.
John K. Hayward, 280 Broadway, New York.
Charles S. Whitman, 2 Tryon Row, New York.
Walter F. Burns, Chicago, Ill.

.

At the annual meeting of the Hardware Club, March 15th, the following governors, whose terms had expired, were unanimously re-elected for three years: George H. Sargent, Arthur G. Sherman, Robert Sickels, Robert H. Swayze, Edward C. Van Glahn. The reports of the officers showed the club to be in an eminently satisfactory condition in every respect.

£

It is reported by way of St. Louis that at a secret conference held in New York City last week, a company was formed with a capital of \$30,000,000, composed of the houses of Simmons Hardware Co., of St. Louis; Hibbard, Spencer, Bartlett & Co., of Chicago, and Bigelow & Dowse Co., of Boston. This would make a strong consolidation of important interests, but would scarcely revolutionize the Hardware trade as a Trust.

.

At the annual meeting of the Board of Governors of the Hardware Club of New York, held on March 20th, a presentation of a complete service of cutlery was made to the treasurer, Thomas F. Keating, in commemoration of the completion of ten years of consecutive service as treasurer of the club. The service consisted of dinner and dessert knives and a full set of carvers, all in pearl handles, with sterling silver mountings. They were arranged in a handsome oak cabinet on special trays, attractively lined throughout, the whole outfit forming an admirable and appropriate selection for the purpose for which it was prepared.

•

The members of the Montreal Metal and Hardware Manufacturers and Merchants' Association held their first annual dinner at the Montreal Club, March 13th. The chair was occupied by the president, Mr. Jas. W. Pyke, and the vice-chairs by Messrs. Wm. McMaster and George Caverhill. After the dinner those present amused themselves with games of ping-pong and billiards. The following is a list of those who attended: Fred. Bacon, Thos. P. Bacon, H. M. Blaiklock, A. H. Campbell, George Caverhill, George J. Crowdy, T. Charles Davidson, Randolph Hersey, A. E. Hanna, J. R. Kinghorn, J. B. Learmont, W. S. Leslie, J. T. McCall, Wm. McMaster, J. C. McCormick, T. H. Newman, T. L. Paton, C. J. Peters (Winnipeg), Jas. W. Pyke, Robert Starke, Wm. Starke and J. Stanley Cook, secretacy.

.

Owing to the scarcity of Mother-of-Pearl and the consequent heavy advance in the price of this material, a special meeting of the American Pocket Cutlery Manufacturers' Association was held at the Hotel St. Denis, New York, on March 20, to consider the question of the selling prices of pearl handle pocket knives. The meeting was largely attended, and it was unanimously resolved to immediately withdraw all quotations on pearl handle pocket knives and to revise the selling prices in accordance with the advanced cost of the raw material.

There seems to be no end to the advertising matter distributed by Sargent & Co. in the interest of the Gem Food Chopper. Among the latest is a striking circular printed in blue on bright vermillion paper, with a 5½-inch cut of the chopper illustrating it. The novelty of the ad. consists in its reaching the reader folded three-cornerwise in a very ingenious manner, which permits its safe transit through the mails.

I Handa

The National Retail Hardware Association, which has been in session in Chicago for two days, March 19 and 20, elected the following officers for the ensuing year: President, H. G. Cormick, Centralia, Ill.; vice-president, C. N. Barnes, Grand Forks, N. D.; treasurer, W. P. Bogardus, Mount Vernon, Ohio. M. L. Corey, Argos, Ind., was re-elected secretary.

It has been decided to hold the Twelfth Annual Convention of the Southern Hardware Jobbers' Association at Atlantic City, N. J., commencing on Tuesday, June 17th, and ending Friday, June 20th. The association having already enjoyed the beneficent hospitality of that ideal location for a convention held during the Summer months, the desire was a strong one to repeat the pleasant experience.

£

The Strong Hardware Co., of Burlington, Vermont, the leading Hardware concern of northern and western Vermont, has just purchased the bankrupt stock of Hardware of S. W. Woodbury of Northampton, Mass. The stock is inventoried at \$20,000, and will be shipped to Burlington.

National Association of Manufacturers.

The seventh annual convention of the National Association of Manufacturers will be held in Indianapolis, April 15, 16 and 17. Local arrangements for the convention are being made by a committee of Indianapolis business men under the leadership of D. M. Parry, who has been for many years a member of the executive committee of the association, and a particularly hospitable welcome to visitors is assured. Members of the association are manifesting rather more than usual interest in this year's convention, and there is promise of an unusually large attendance from all parts of the country.

President Theodore C. Search announced at Detroit last year, when he consented to accept the presidency for the sixth time, that he could not serve the association in that capacity beyond the expiration of the present year. Mr. Search has recently made known his adherence to this determination, and one of the most interesting problems which the Indianapolis convention will have to consider will be the selection of a new president. This matter has been quietly discussed among the members for several months, but at present there is nothing to indicate upon whom the choice of the association will fall.

During the six years of Mr. Search's presidency the membership of the association has increased from less than 200 to more than a thousand, and a vast amount of hard work has been done to promote the interests of the manufacturers of the United States in a broad-minded, public-spirited way.

The National Association of Manufacturers was organized in Cincinnati in 1895, and its annual conventions have been held in Chicago, Philadelphia, New York, Cincinnati, Boston and Detroit.

HARDWARE

VOL. XXIV.

MARCH 25, 1902.

NO. 1

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade.

HARDWARE is published on the 10th and 25th of each month. The subscription is \$1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made in the safest manner available to the remitter. Post-office and Express Money Orders are always safe and may be sent at our own risk.

Register your letters when you remit by cash

Foreign Subscriptions.—For each copy to be mailed outside the United States, the Canadas, and Mexico, the price is \$1.50 a year, postage prepaid.

Change of Date.—It takes two weeks to change the date, after your subscription!'s renewed.

Expiration of subscriptions. The date on the wrapper indicates when your subscription expires.

Change of Address.—Always give both your old and your new address when you ask us to change your address.

The Name of your Post-office and of the State you live in should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

Letters should be addressed

The Circulation of "Hardware" is Larger Than That of Any Other Paper n the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The wintry conditions which prevailed during the past fortnight checked to a limited extent the anxious urgency with which the forwarding of early Spring requirements has been associated, and the let up was appreciated by the bustling jobbers, who have been doing their best to push orders to completion for an early shipment. Business keeps at an extremely active standard wherever heard from, travelers meeting with unqualified success in their migrations, and full and well-assorted orders for stock supply are daily forwarded for early attention.

The freshets having subsided almost entirely, restore a feeling of confidence where before was prevailing gloom over uncertain conditions, in which prospective prosperity died a-borning and wrecks and devastation covered too large a section of country. The mills, hindered by these unexpected obstructions to productiveness, are again assuming normal conditions of supply, and although greatly overtaxed to fill orders to the satisfaction of everybody, are able to make more definite promises that stand a good chance of fulfilment. Although the factories generally have their order books crowded with orders taken early from the optimistic jobbing fraternity, supplementary requisitions are going forward daily, as unexpected demands bid fair to deplete the jobber's own supply of goods in excess of even the generous anticipations previously entertained.

The manufacturer has troubles of his own in obtaining

a supply of his wants in the way of raw material, the inability to obtain prompt transportation in some sections still preventing the mills from making complete deliveries of stock in every instance.

The prevailing tone of the several markets in our industry is a firm and encouraging one, no positive weakness being perceptible anywhere. In fact, several comparatively small advances are noted, tending to brace up the market on analogous goods, and stimulate deliveries so as to profit by the advancing quotations. On some leading staples advances are expected early in April, and the indications at present seem to favor largely a firm and rigid line of quotations that will cause the Spring business to move along with no fear of loss, and with but little opportunity for speculation.

From all reports within reach, Shelf Hardware is shown to be actively in demand, better goods than has formerly been the case being consistently called for. The demand for heavy Hardware is a noticeable one, and being nearer the raw material than some lines, is more easily susceptible to changing quotations. Orders have been remarkably good on Wire Screens and Screen Doors, Steel Goods, Mechanics' Tools of good grade, Cream Freezers, and Wire products generally, especially Wire Fencing. The most hopeful outlook is the one now before us. The Winter being in its last stages, must soon give way to the more genial environment of our enjoyable Spring temperature. We will soon forget the inconveniences of the past few weeks, when storms and freshets created moments of peril and days of uncertainty. Trade and collections are now exceedingly good.

The Reduction in Volume of Exports.

The reduction of forty-one million dollars in the exports of the United States for the eight months ending with February is not considered at all discouraging by those interested in the growth of our export trade, nor is it an indication of a decline in the general growth of that trade. On the contrary, in all important articles except three, in which conditions are abnormal, there has been an increase. The decrease is solely, or practically so, in corn, due to the great crop shortage caused by the drouth of last summer; in copper, in which prices have greatly fallen, and in iron and steel manufactures, due to the unusual demand of the home market upon our manufacturers and the reduced demand in foreign markets. In corn and corn meal alone the exports fall more than forty-seven million dollars below those of the corresponding period of last year, while the total decrease in all exports is but \$41,012,584; showing that if corn exports were normal the total figures would show an increase of more than six million dollars over last year and over the corresponding period of any preceding year. In iron and steel manufactures, the figures of the seven months ending with January (February figures being not yet available) show a reduction of about sixteen million dollars in exports, this, as has already been explained, being due to the excessive demand of the home market upon our manufacturers and the lower prices and reduced demand abroad. In copper, the only other important article which showed a decline, the figures for January show an increase of nearly 50% in quantity, and a slight decrease in value, compared with those of January, 1901 (February figures being not yet available), though for the seven months ending with January, the export figures still fall considerably below those of the preceding year.

In three items alone, corn, copper, and manufactures of iron and steel, in each of which the falling off in exports is due to exceptional causes and may be considered as tempo-

rary, the reduction is over seventy million dollars, while the total reduction in exports for the eight months ending with February is but forty-one million dollars, showing that in other articles than those in which conditions are abnormal there has been an increase in exports of more than thirty million dollars.

Even with this decrease of forty-one million dollars the United States still stands at the head of the world's exporting nations, the total exports of domestic merchandise being: United States, \$957,986,427; and the United Kingdom, which most nearly approaches the figures of the United States, \$911,346,250.

Improvement in the Export of Manufactures.

The export figures for the month of January, and the seven months ending with January, 1902, just completed by the Treasury Bureau of Statistics, show an improvement in the outward movement of manufactures. In the month of January, 1902, the exports of manufactures amounted to \$34,-412,992, against \$32,654,035 in January, 1901, and are the largest shown in any January except 1900, when the total was \$35,586,940. Compared with January, 1901, it will be seen that the figures show a gain of nearly \$2,000,000 in the exports of manufactures. For the seven months ending with January the exports of manufactures are about thirteen millions less than those for the corresponding period of the fiscal year 1901. Indeed, manufactures for the month of January show greater evidence of activity in the export trade than any other class of our exports, being the only great class of exports which shows an increase in January, 1902, over January, 1901. Agricultural exports in January, 1902, fall eight millions below those of January last year, while products of the mines, forests, and fisheries are in January, 1902, slightly below those of January, 1901; while manufactures, as above indicated, are nearly two millions greater than those of January, 1901. In the three great articles in which manufactures had shown a decline during the past year-illuminating oil, copper manufactures and manufactures of iron and steel—there is a decided improvement, especially in illuminating oil and copper. The January exports of illuminating oil are \$4,579,970, against \$3,986,019 in January, 1901; and for the seven months ending with January are \$33,-774,156, against \$31,166,759 in the seven months ending with January, 1901, and \$33,239,556 in the corresponding months ending with January, 1900, thus exceeding the highest preceding record in the value of exports of mineral oil during the period under consideration.

In copper manufactures the exports of January are valued at \$3,965,622, against \$3,790,364 in January of last year. The quantity exported has very largely increased, the total number of pounds of copper ingots alone (which form the bulk of copper manufactures) being in January, 1902, 32,085,041 pounds, against 22,270,030 pounds in January, 1901, and 28,389,422 in January, 1900. For the seven months, however, the exports of copper manufactures are still about nine million dollars below those of the corresponding seven months of the preceding fiscal year. It will be observed that the quantity of copper exported has greatly increased, though the value shows but a comparatively slight increase. The only item of importance in the list of manufactures exported which still shows a reduction is that of iron and steel, which falls in January about a million and a half dollars below the figures of January, 1901, being in January, 1902, \$8,088,958, against \$9,610,552 in January, 1901, and \$10,218,628 in January, 1900. For the seven months the total exports of iron and steel manufactures were valued at \$57,290,128, against \$73,616,467 for the seven months ending with January, 1901, and \$66,504,611 for the corresponding seven months of the fiscal year 1900.

The continued activity of the American manufacturer, which is shown in the steady outward movement of all manufactures except in the one class above noted, is further illustrated by a remarkable increase in the importations of manufacturers' materials. The Bureau of Statistics classifies the importations into five great groups: foodstuffs, raw materials for use in manufacturing, material partially or wholly manufactured for use in manufacturing, finished manufactures, and luxuries. In these five great divisions the chief increase is in manufacturers' materials. They show in the single month of January an increase of seven and a half million dollars, and in the seven months ending with January an increase of fifty million dollars, compared with the corresponding periods of the preceding fiscal year. The total increase in importations during the seven months ending with January is sixty-seven million dollars, of which fifty million dollars is in manufacturers' materials.

The following table shows the imports and exports by great classes in the month of January, 1902, compared with January, 1901:

	JANUA	ARY.

Pennsylvania Retail Hardware Dealers' Association.

On March 12 the following circular was issued, having reference to the meeting this week of the Pennsylvania Retail Hardware Dealers' Association:

The Pennsylvania Retail Hardware Dealers' Association will meet at the Monongahela House, Pittsburgh, March 26 and 27.

You are cordially invited to attend these meetings, and if you are not already a member, we hope that it is not because you think such organizations are unnecessary.

The truth must be forced upon us that there is only one force mighty enough to cope with the powerful influences that are operating to undo us, and that is the combined forces of the retail dealers of the country.

It is useless for the few to make their protests against these evils. We must plan, as great conquests are planned, and units, as by co-operation only great victories are achieved.

unite, as by co-operation only great victories are achieved.
We need your help. Will you be present at these meetings?

Please reply promptly on the inclosed postal card, as the Committee on Entertainment desires to complete its work.

J. F. Frye, Secretary.

J. E. Degry, H. F. Robinson, G. F. Rudolph, Programme

The above circular has been forwarded to the retail Hardware merchants in the State whose names the association have been able to obtain. Those who are missed will understand it is not by design, as the officers desire to have every Hardware dealer in that State attend the meeting and eventually become a member of the association. Complete arrangements have been made by which it is hoped a very interesting and profitable meeting will be the result, and succeed in obtaining an important accession of members. Any further information that may be desired having reference to the Convention may be obtained from the Secretary, J. F. Frye, Charleroi, Pa.

"And you broke off the engagement?" said one young man. "Yes—not brutally, you know—but I managed it."

"Told her what my salary is."—Ex.

The Dunham Jr. Hand Lawn Roller.

In towns and cities of any importance it will be generally observed that the people who own homes, and even factories and business establishments, take each year more and more interest in the artistic surroundings of their particular location with each succeeding year to make it look more homelike and attractive. In many places it is even made compulsory by town ordinances to keep the streets clean and the lawns in proper condition, not only for the benefit of the property holders, but to further the reputation of the village and stamp the people as enterprising and progressive.

No part surrounding a home should be looked after with more care than the lawn. The lawn is to the outside appearance what a carpet is to the inside. Even though the house may be a humble one, if the lawn be large and, more especially, green, how much more enjoyable is its appearance?

The question now arises, What is essential to make the lawn present this appearance? If you will but stop to consider the work of the farmer in tilling the soil for crops in the Spring, and the many different implements and tools he uses to insure the same, does it not seem that many lawns are neglected? There are few implements the farmer uses that serve him to better advantage than the Land Roller, for it is a well known fact that in the early Spring the frost coming up from the earth, upheaves it, and thus leaves it in a

THE DOMINIA ON HIM DE WAY ROBBIN

rough and loose condition, which is detrimental to the proper growth of seed. No doubt it would remain just so were it not rolled and firmly packed in the Spring season. This process also serves to retain the moisture below the surface as nourishment to the roots.

In order to have a lawn worthy of the name, nearly the same work must be done and about the same line of implements be used, with, of course, some variation as to size. With this end in view we present herewith a cut of the Dunham Jr. Hand Lawn Roller, designed for use on private lawns and gardens.

This small but useful implement is manufactured by J. W. Dunham & Son, Berea, Ohio, who have a reputation of making a large and complete line of land preparing machinery. The Dunham Jr. Lawn Roller is made in two sections, each 12 inches wide by 20 inches high, and of sufficient weight to pack the soil thoroughly. Where more weight is desired they supply extra weights, two of which can be put inside of each section and attached to axle with set screw. The machine is made in many other sizes, and is made strong and durable enough to last a lifetime. The Hardware trade will find that an increasing demand each year will result from their early introduction, as from their moderate price, dealers who have handled them find them good sellers. Further information and prices will be gladly forwarded upon application to the manufacturers.

New England Hardware Dealers' Association.

The regular monthly meeting of the New England Hardware Dealers' Association was held at the Quincy House, Boston, Wednesday, March 12th, President S. D. Balkam in the chair. The business meeting was held immediately after

the usual dinner. A. M. Mackenzie was elected to membership. In distributing the notices announcing the forthcoming meeting, a slip was sent to the members on which they were invited to give selling prices of a number of articles sold by them, in which more or less varying quotations were usually noticeable. With a view to bringing about, if possible, more uniformity in selling prices, especially of staple articles, it was deemed advisable to obtain such prices as were made by the members for the purpose of comparison, and endeavor to make them less at variance. These slips were returned at this meeting, and a careful comparison followed, which gave every evidence that greater uniformity prevailed in the trade than was thought possible, showing that the effort made previously to accomplish this had produced good results. The association is trying very hard to increase the membership, realizing that in numbers there is strength, and that an association of this character becomes more important with an increasing membership. The methods of accomplishing this object were discussed at this meeting, but no definite conclusion was reached. Calvin M. Nichols and Henry M. Sanders were appointed an entertainment committee for the April meeting. D. Fletcher Barber gave notice that at the next meeting a change in Art. XII of the by-laws would be asked for. The Hon. Willard Howland, of Chelsea, was the principal speaker of the evening, and held the attention of the association thoroughly while he discoursed on "The Duty of the Business Men to the State," after which the meeting adjourned.

Spalding's Catalogue of Spring and Summer Sports.

Spalding's large catalogue for the trade is specially prepared for them, and is a work of art. No expense has been spared this year in making the catalogue the most complete ever issued by them. It certainly is a work of art, and reflects great credit on those who produced it. The illustrated cover is an unusually attractive one, and the three lifelike illustrations of a golf player, lawn tennis player and baseball player display considerable artistic ability. The catalogue is printed on superior paper, and contains over 500 illustrations, making it a valuable compendium that should be at the right hand of every buyer in the business.

Spalding's complete line of baseball supplies, which contains the latest styles of bats, new mitts and other baseball equipment, is fully illustrated.

The tennis department is much more complete this year than ever, and Spalding's new line of tennis rackets is shown in two beautiful pages of half-tone illustrations. The new styles of tennis nets, and the new championship tennis poles and the backstop nets, are illustrated in a very artistic manner.

This year's catalogue is more complete than ever, and will be sent postpaid to any dealer free of charge. Those who are not dealers will receive this catalogue on receipt of five cents to cover the actual cost of mailing.

Testifying to Its Superiority.

Providence, R. I., Nov. 21, 1901.

Canada Corundum Co., Toronto, Can.

Gentlemen: Replying to yours of the 18th inst., we take pleasure in testifying to the superiority of Canada Corundum over any Emery or artificial abrasives we have ever seen. Our constantly increasing orders for your material are the best evidence we can offer as to our opinion of it. Yours very truly,

AMERICAN EMERY WHEEL WORKS,

H. A. RICHMOND, General Manager.

Tramp—Give us a nickel, will yer, lady? Lady—Aren't you ashamed to strike a woman?

CALIFORNIA STATE RETAIL HDWE. ASSN.

The 344 members who attended the second annual meeting in San Francisco of the California State Retail Hardware Association, on March 10 and 11, are superlatively happy over the results attained, especially at the second day's session, which was largely devoted to conference with a representative delegation from the Pacific Coast Hardware and Metal Association, the jobbers' organization. And so, it is predicted, will every other Hardware retailer in the State be comforted when he receives the executive committee's report of the meeting, which is to be prepared and distributed.

This large meeting of the delegates, representing the five local associations of retail Hardware dealers in the State, held its sessions in the Marble Hall of the Palace Hotel, the applauded opening address, which was one of hearty welcome, being delivered by Mayor Eugene Schmitz, the new chief executive official of San Francisco, who has always been identified as a practical man of industry in this city's affairs, and who was elected by the industrial vote.

Mayor Schmitz's words of welcome were followed by the address (which was received with fervent appreciation) of the presiding officer, O. F. Sites, of the Palace Hardware Co. of San Francisco, the president of the State Association, who spoke substantially as follows:

THE PRESIDENT'S ADDRESS.

Members of the California State Retail Hardware Association—Gentlemen: Through some strange decree of fate the retail Hardware merchant seems to be beset with more annoyances than the dealer in any other line of merchandise. Some of these annoyances are local in character, while others, more serious, affect every dealer throughout our beautiful State.

About four years ago the retail Hardware dealers of Sacramento Valley, goaded by existing evils in their district, organized the Pacific Retail Hardware Association, with John C. White of Marysville as its president. They commenced a vigorous, and carried on so energetic a campaign that, under his wise guidance, they accomplished a vast amount of good, and succeeded in eliminating many grievances that had heretofore rendered their business life almost unbearable. They were enabled thereby to make better showings in their business summary each year, and so contentment has dethroned discontent, whose reign had already been far too long.

Some two years later the San Francisco and Oakland Retail Hardware Dealers' Association was formed, and like its prototype, the Pacific, its efforts were rewarded by the most gratifying success.

The amount of good accomplished by these two associations was so apparent that the more enthusiastic members of each conceived the plan of amalgamating the two bodies, that they might work together in stimulating the merchants in other districts to form other associations, then bringing them together by affiliation until the whole State should be completely organized and working together for the common good of all, the *local* associations to adjust matters of local interest, the higher body to adjust and remedy all matters of a more widespread and broader character.

This State body was the culmination of our hopes, and was finally constituted by the executive committees of the two associations I have mentioned, February 15th, 1901, with myself chosen as its first presiding officer.

A common fault heretofore found everywhere was the strange way in which each merchant regarded his neighbor and competitor. We were the reputable dealer, our neighbor the disturber. Organization, coming together, has melted this largely away. We found our competing brothers estimable gentlemen after all, and have learned to love, where once mere toleration was all we were willing to bestow.

So, gentlemen, as I look into your faces to-day, I feel that every one is my close friend, that his trials are mine, and it is for-us truly to help bear one another's burdens.

Is not this in itself a great reward for our efforts? And were there no other benefits to be enumerated, have we not been well and truly paid?

Next in order, by way of preface to his elaborate yearly report in detail, which, by the way, will be considered with other matter of association interest by the executive committee before given out to the trade papers, Sccretary Henry Gracey said:

THE SECRETARY'S REPORT.

Mr. President and Fellow Hardwaremen: During the last twelve months the entire Hardware trade of the State have been communicated with several times, giving information from the executive committee as to formulated plans for our organization work, and receiving in return from many individual and company dealers wholesome suggestions, and I wish to emphasize that I appreciate to the fullest extent the confidence, friendship and encouragement you have accorded me in my work. Your executive committee has been untiring in effort to organize the State trade into local organizations, preparatory to becoming affiliated with the State body. Under present laws our State Association embodies only local retail Hardware associations, the reason for this being principally to obviate a great expense and a great deal of work, which of necessity would be the case in the instance of accepting the individual Hardware dealer to become a direct member of the State association. From this time on it may be expedient, however, to make some changes as needs demand, hence I would suggest that this matter be taken up at this meeting.

February 15, 1901, our State association organized, with two local associations as members, the Pacific Retail Hardware Association, numbering 78 members, with headquarters at Marysville, and the San Francisco and Oakland Retail Hardware Dealers' Association, numbering 20 members, both now, by the way, largely increased as to membership, the last named showing an increase upward of an hundred fold. In addition to the two societies named, the State association embraces also these three: Central Retail Hardware Association, with headquarters at Salinas; San Joaquin Valley Retail Hardware Association, with Fresno for headquarters, and Southern California Retail Hardware and Implement Association, headquarters being at Los Angeles, the total membership exceeding four hundred retail Hardware dealers.

And now, brothers, a few words as to our individual duty. If you knew an earthquake was coming, you would naturally look for a place of safety; if you knew some standard article of Hardware was going to take an advance, you would hasten to buy. The professional dead-beat can go from store to store, obtaining credit simply because you do not know he has already robbed your neighbor. Hence one of the absolute necessities for successful work is a true knowledge of the situation. This must come from you personally. Every member should report occasionally. It may be to send a circular or advertisement, particulars of something or other. These reports as a whole furnish an intelligent knowledge for successful work. Your secretary is no mind reader; he can not afford to take chances of falling into a false position, and so he confidently looks to you, and you alone, for reliable information, co-operation and assistance.

information, co-operation and assistance.

In concluding, I wish to bring to your notice the active part your president has taken in this work. We have been in very frequent consultation, and there has not been a semblance of discord or divergence of opinion. His counsel has been wise and freely given. There has not been a task or a demand that he has not met with cheerfulness; no matter how pressing his business, he has evaded nothing.

Following the secretary's report were other remarks by several interior dealers that likewise touched upon vital matters affecting the welfare of the trade, and caused a warm debating consideration in executive session that consumed much of the first afternoon, the later part of the day being devoted to the election of officers for the ensuing year, resulting as follows: President, O. F. Sites (re-elected), San Francisco; vice-president, G. A. Gutman (re-elected), Germantown; secretary, Henry Gracey (re-elected), San Francisco; treasurer, H. C. Bennett, San Francisco. The following executive committee, consisting of two representatives from each of the five local organizations, was also chosen: C. W. Bennett, Fresno; Theodore Turner, Modesto; E. A. Eaton, Salinas; J. W. Baxter, Watsonville; W. L. Lutz, Santa Ana; E. C. Dawe, Santa Barbara; John C. White, Marysville; A. L. Nichols, Chico; S. Armstrong, San Francisco, and Max M. Brown, San Francisco.

The major portion of the second day's sessions were devoted to a conference with the members of the Pacific Coast Hardware and Metal Association, or the San Francisco jobbers. Some had talked of this as a threatening meeting, but it all developed into a clear and friendly understanding, after some wordy battles on the floor of the convention.

On the third day upward of three hundred of these Hardwaremen from all parts of the State were the guests, with their wives, of the members of the Pacific Coast Hardware and Metal Association for an extended pleasure tour of the bay on the steamer Monticello, including a special trip to the summit of Mount Tamalpais for luncheon.

The American Hardware Corporation.

The final details have been completed, and the P. & F. Corbin Co. and the Russell & Erwin Mfg. Co. can now be said to be successfully merged into the American Hardware Corporation. The formal details were completed at a meeting of the directors of the subordinate companies held in the office of the P. & F. Corbin Co. on March 13. The personnel of the board of directors who will control the destinies of New Britain's giant corporation was decided upon.

The directors are as follows: Hon. Philip Corbin, Andrew Corbin, Charles M. Jarvis, Charles H. Parsons, Charles Glover, George J. Laighton, Andrew J. Sloper, Howard S. Hart, William G. Smythe.

The directors of the American Hardware Corporation then

met and elected the following officers:

President-Hon. Philip Corbin.

First Vice-President-Charles M. Jarvis. Second Vice-President-George J. Laighton.

Treasurer--A. J. Sloper.

Assistant Treasurer-Charles E. Wetmore.

Secretary—Theodore E. Smith.

Less than one-tenth of the stock of the subordinate companies remain as yet untransferred. This clearly emphasizes the disposition of the stockholders towards the merger, considering that only about three weeks has transpired since the announcement of the plan was sent out to the stockhold-The time limit fixed at that time for the transfer of stock was April 1, and there is little room for doubt that by that date all the stock will have been exchanged for American Hardware Corporation stock.

The articles of incorporation have been filed with the secretary of State and with the town clerk, and from this date the affairs of the two companies will be conducted under the

one head.

Demand for American Machinery in Belgium.

Consul Winslow writes from Liege, February 17, 1902, that the business outlook in that part of Belgium is much brighter, and that there is a fine opening for American goods, especially labor-saving machinery. Belgian manufacturers are beginning to realize that in order to successfully meet the competition of the United States, up-to-date machinery is necessary, and in the opinion of the consul there is in that country a market for this class of our exports. He says that he has recently had many calls for addresses of American firms engaged in various lines of manufacture, and that he is cognizant of an opportunity to furnish tools and machinery for an extensive rubber plant, as well as an outfit for a manufactory of enameled ware, communications in regard to which may be addressed to John Gross, Rue Chevanfosse 13, Liege.

American Wringer Co.

AMERICAN WRINGER Co., New York. Pamphlet catalogue of 88 pages, very carefully compiled and handsomely printed in colors throughout by the aid of lithography, every article of their large product being shown in a very attractive manner by this process, the frontispiece giving an idea of the Woonsocket plant of the company, which is claimed to be the largest clothes wringer and rubber roll factory in the world, and the extent, as illustrated, would seem to indicate the truth of this statement. The various Wringers that form the product of this well-known company are fully shown and described, including the Horse Shoe Brand, the Royal, the Universal, Keystone, Empire, Novelty, Excelsior, etc. All the details of changes and improvements are fully shown and illustrated, giving the sizes and dimensions of each particular Wringer, and manner of packing, and such other particulars as the dealer would require in order to purchase them

understandingly. Included in the contents of this attractive catalogue will be found, in addition to the regular and usual line, Show Stands, Gem Toy Wringers, Empire Clothes Dryers, Universal Mop Wringers, Household Folding Benches, and Ball Bearing Clothes Mangles, together with several other Mangles marketed under the name of the Universal, Eclipse and American. Prices are given throughout, and altogether it is the handsomest catalogue we have seen from this company up to date. The advertising department of the company furnish free of charge to those handling their goods electrotypes and advertising matter to illustrate and describe their Horse Shoe Brand Wringers. This is intended to facilitate local advertising, and should be availed of by the dealers handling their product. In the price list accompanying the catalogue are given "wholesale case lot prices," which are strictly net, and cover the entire contents of the catalogue.

Spraying and Sprayers.

The use of a sprayer to exterminate insects on trees and plants is a necessity where profit is to be considered by a fruit and vegetable grower. The Comet Sprayer can be used from bucket or barrel and throws a continuous stream or spray 50 feet. Its uses are manifold about the premises, for putting out incipient fires, washing windows and buggies, sprinkling lawns, plants and crops, as well as for destroying insects. It is worth our readers' while to send to its maker, H. B. Rusler, Johnstown, Ohio, for an illustrated catalogue and learn the value of the Comet Sprayer.

SHOULD AULD ACQUAINTANCE BE FORGOT".-III

"Calling back voiceful years. Lingering by some with tears. Hearing, through hopes and fears, That watchword 'Do.'"

Ah! what sweet memories cling to No. 193 Pearl Street, occupied in my boyhood days by the Hardware firm of Wolfe & Gillespie. Mr. John Wolfe, always a kind, courteous, and polished, true gentleman. George D. H. Gillespie, a genuine type of "full orbed manhood," one who truly did "scatter seeds of kindness." I well remember his effective kindness to me, both in sickness and in health. And there were also the Bruff brothers, Richard P. and Charles Bruff, H. S. Hurxthal, and George Arthur Seaver.

Charles Bruff and H. S. Hurxthal have been

"Loosed from the finite shore, Infinite truth before. Grander, with nobler life to fill."

And John Wolfe and George D. H. Gillespie, both with them.

I would that earth's choicest roses be woven in a wreath to each of their memories—roses—
"Thornless, fadeless, sweet."

And to the living, I would say, that I most sincerely cherish the friendship of those with whom it was my pleasure to be associated. I well remember the many kindnesses shown to me by Richard P. Bruff, with profound feelings of grati-

George Arthur Seaver, I understand, is living in the Crescent City. Here's to you, my old chum, with assurances of kindly remembrances! We are all to-day

> "Nearer the great white throne. Nearer the crystal sea."

Young Theodore Wilmerding was also a clerk with me, and most of the antics that we boys indulged in were generally of the harmless type, such as sending out a new clerk to buy, in order to complete some bills, double bladed shoe knives, or thirty-inch mill saw files.

Walter R. Wood, afterwards in the grindstone business, was also one of my associate clerks with Wolfe & Gillespie. Unlike Theodore Wilmerding, who was about my equal in mischievousness, Walter was always dignified, and steady, He, of course, never, that is, "hardly ever," indulged in any mischief. John Wolfe had stored in the cellar of the store, 193 Pearl Street, a quantity of wine in baskets piled up one on top of the other. One day the lower tier of baskets suddently collapsed, there being nothing but straw in them, bringing those above down on the empty baskets "a la squatte voo." Of course rats were blamed for absence of the bottles, and although we were then working very late at night, neither of us could throw any light upon the dark transaction. Mr. Wolfe told me confidentially that he was satisfied that the rats were the cause of the trouble, but they were of the two-legged species. Mr. Wolfe, gentleman that he was, never alluded to the subject again, but I assisted in removing the remaining baskets to his private residence in Twelfth Street, near Broadway. I have no doubt, "Hop," that in this episode originated the reply we use nowadays of "Oh, rats," when we hear an improbable yarn. Mr. Wolfe's house was in truth a picture gallery, and upon many an occasion I enjoyed studying the paintings hung therein. There are, no doubt, many living to-day will who remember the sale by Mr. Wolfe of his art treasures.

Our packer of general Hardware was Samuel Geary, who

only wanted the slip marked "complete" placed on a bill, when he would tackle it, and it was packed in a "jiffy," in good old-fashioned casks, and well packed, too. "Sammy" did not care to wrestle with a bill that had the slip on it, marked "leave open." He would give that particular bill a wide berth. "The "leave open" ticket was to convey the fact that there were goods to come in to complete the bill, and "Sammy" could never tell how much space was required, and, in fact, he never wanted to know, or would fail to understand when we endeavored to explain to him. All he wanted was "complete" on the goods. We had then what was called a "pick up" clerk, whose duties were to buy the goods necessary to complete each bill. Bills in those days were generally completed before packed and "back order books" very seldom used.

In the "busy season," which occurred in the Spring and Fall, we clerks often worked up to midnight, in laying out bills for the packer to work on the next morning. I carried one set of keys and the packer another set, so he could open the store in the early morning, he going home about 6 p. m. and I locking up at night. After so doing one night, and leaving with the others, I returned quietly, for the purpose of opening a cask of Wostenholm's pocket knives, and worked on them until nearly morning, locking the store from the inside, leaving the big key in the lock, and went to sleep on the lounge in the private office. The indefatigable "Sammy" could not get in, and what a racket he did raise. After a while I awoke, let him in, and received his benediction in a very unecclesias-

The guns we sold in those days were nearly all doublebarrel, of both English and Belgian manufacture. Length of barrel, 36, 38, 40, and even 42 inches. Bores 10, 11 and 12, all muzzle loaders, as there were no breech loaders then. Our stock embraced the well known English make of Wesley Richards, William Greener, and Moore & Harris. Deringer pistols, made by Henry Deringer, of Philadelphia, were sold then at \$25 a pair. George Hickox had charge of the gun department, which occupied our entire third floor. I succeeded to the management of the gun section, and held that position for many years. We did sell some guns then for sure. Our trade was entirely with the extreme Southern States, where the brand "Gillespie" on the lock was recognized as a pledge of good quality. Lehman's rifles, French powder horns, and game bags we also carried in stock. What a contrast between the guns sold in the "fifties," with their extreme length of barrel, and those of the present day. What advances toward perfection have been made. Then we had no "Parker," "Winchester," "Remington" or "Baker" with their 26, 28, or 30-inch barrels and "choke bore." I would not be surprised to learn that the present generation will fire their guns by "stored electricity."

When working nights during our "busy season" the firm allowed us boys 50 cents each for our suppers. This sum was sufficient for a "gorge" at either Clark & Brown's, in Maiden Lane; George W. Brown's, in Water Street, or Goslin's, in Nassau Street, opposite the old post office. At this latter named restaurant we often met "the boys" of Halstead, Haines & Co.'s dry goods house, who were then located at 31 Nassau Street, and we boys swapped yarns together, as to which house had sold the most goods and who had the largest number of bills not gotten out yet, we taking good care that our house led in this competition. After supper we went back to work, which lasted generally until midnight, sometimes all night. None grumbled, but all worked with a will as we realized two facts, one was the necessity of extra work, and the other that for six months of each year, we had comparatively nothing to do in the way of overwork, but with plenty of time to ourselves.

The practice of taking our customers to places of amusement was not so universal then, as now, still once and a while we would take a good one to Christy's minstrels, then at Mechanics Hall, 472 Broadway, or, perhaps, to Burton's Theatre, Chambers Street, which was then located where the American News Co. building now stands, and which before Billy Burton's time was the site of Palmo's Opera House. In the Fall of 1851, the Ravel family were playing at Niblo's Garden, Burton at his own theatre, Forrest at the Broadway, and Miss Charlotte Cushman at Brougham's Lyaeum, Broadway and Broome Street. The best seats, either in dress circle or parquet, at each of the above mentioned theatres, were 50 cents each, and no ticket speculators in sight. The old Park Theatre was destroyed by fire early in the evening of December 16, 1848.

We bought many circular, mill pit and cross cut saws from R. Hoe & Co., whose shops were then located at 29 Gold Street. Hoe's goods were then, as now, of first quality, and finish in every particular. I remember once attempting without any assistance to lower a lot of cross cuts, from our fourth floor. They had no ears rivetted to them, and I did not place the slings in proper position. Our hatchway in the Pearl Street store was in the centre of the building. The saws slipped through the slings, as I shoved them off, and down the hatch they flew, right and left, upright and horizontal, landing on the first floor, I in the meantime yelling like an Indian, "stand from under." Everybody did run, dodging the downpour, and fortunately, no one was injured, notwithstanding people were continually passing under this skylight hatchway. This accident was not so much the result of carelessness on my part as it was a desire to do my tasks quickly and without help. In this case it was certainly "the more haste the less speed," and I profited by the lesson.

Money was made in those days, and while I have been living in the past, let me say to my young Hardware friends who are now struggling for advancement and ultimate success, that the present offers as good, if not better, opportunities than ever before.

"To-day leads you up to the hill tops
That are kissed by the radiant sun,
To-day shows no tomb, life's hopes are in bloom,
And to-day holds a prize to be won."

JAMES E. HALSEY.

Southern Supply Dealers' Association.

The question of forming a Southern Supply and Machinery Dealers' Association has been given very careful and serious consideration for some little time by a number of the supply and machinery dealers in the South, and we are pleased to state that from the encouragement which has been received, it has been decided to take steps to perfect the organization.

The first and most important step in consummating the preliminary arrangements was to secure the services of some one to act as promotor or organizer. Those interested in the movement were fortunate enough to secure the services of Mr. C. B. Carter, now Secretary-Treasurer of the Southern Hardware Jobbers' Association. Mr. Carter having served the Southern Hardware Jobbers' Association for about six years, was deemed eminently qualified to organize and take charge of the proposed association, it being desirable that the two associations—which are so closely allied—should be handled by one and the same officer.

It has been deemed advisable to call a meeting of the supply and machinery dealers of the South during March or

April, to meet in Charleston, the exact date to be decided upon a little later, and to this end Mr. Carter will open up correspondence with these dealers regarding the details, etc. Those addressed, it is hoped, will promptly and cheerfully answer any inquiries which may be addressed them, and it is also anticipated that they can see their way clear to attend the Charleston meeting at the time fixed, and that each dealer addressed will become a charter member of the association. Those already interested are fully satisfied that an organization among the machinery and supply dealers will result greatly to the advancement of this representative line of business and prove highly remunerative to the individual members.

Those already interested, and who sign the call, are the following: Smith, Courtney & Co., Richmond, Va., by Geo. A. Smith, president; the Henry Walke Co., Norfolk, Va., by S. M. Price, president; Jno. G. Christopher, Jacksonville, Fla.; Georgia Supply Co., Savannah, Ga., by E. N. Hartfelder, president; the Cameron & Barkley Co., Charleston, by C. B. Jenkins, president.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interests to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MARCH 17, 1902.

313,921. Weather Strip, J. Cotrell, Schell City, Mo.

313,935. LIFTING JACK, A. H. Handlan, Jr., St. Louis, Mo.

313,943. Bench Dog, M. J. Kugler, Barnesville, Ohio.

313,950. Bit Brace, J. T. Pederson, Brooklyn, N. Y.

313,990. PAIL, T. A. Coke, Brooklyn, N. Y.

314,011. LOCK MORTISING CHISEL, P. L. Fox, Bridgeport, Conn.

314,005. HANGING DOOR, C. W. Emerson, Charlestown, Mass.

314,058. BENCH HOOK, J. B. Sargent, New Haven, Conn. PATENTS ISSUED MARCH 18, 1902.

695,461. Ax HANDLE CLAMP, L. Johnsen, Seattle, Wash.

695,598. Gas Heated Sad Iron, D. R. Blair, Birmingham, England.

695,660. Tool Box, J. Swan, Seymour, Conn.

695,666. Spring Hinge, E. Bommer, Brooklyn, N. Y.

695,669. Ax Head and Handle Therefor, R. H. Carter, Kimbolton, New Zealand.

695,736. SASH LOCK, H. H. Kendrick, Fulton, N. Y.

Big Industry for Ilion, N. Y.—The Remington Cartridge Co.

Papers were filed March 8 with the county clerk of Essex County, New Jersey, incorporating the Remington Metallic Cartridge Co., with a capital stock of \$250,000.

The incorporators are Eliphalet Remington of Ilion, Stuart Lindsley of Orange, N. J., and Joseph M. Merrill of East Orange, N. J. The officers of the company will be: President, Eliphalet Remington; vice-president, Joseph M. Merrill; secretary and treasurer, Stuart Lindsley.

The object of the formation of this company is the manufacture of metallic cartridges and ammunition of every form and description. The company already has the backing of several capitalists of influence in New York and New Jersey, and as soon as practicable the manufacture of Remington cartridges will be commenced on a large scale, and in all probability the plant will be located at Ilion.

Mr. Remington, the president of the company, is the only surviving member of the original firm of E. Remington & Sons, manufacturers of Remington firearms, of Ilion.

The first complete printing machine was patented by Koenig in 1814.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

London, March 15, 1902.

There was a time when British ironmongers worked under different conditions from those of their Hardware cousins in America. The differences have been gradually lessened until the general conduct of a modern, up-to-date English Hardware store is very similar to that of those in the principal cities and towns of the United States. Reform and reorganization are the order of the day throughout the whole commercial world. Not least has the upheaval touched British Hardwaremen, who have awaked from their long sleep, and by their present day activity closely follow in the wake of their American brothers in trade.

The association movement, so long an established power in the States, has taken a firm hold in England. Many strong associations now exist in different parts of the country, and under the guiding hand of R. H. Smith, the energetic secretary of the Central Board of the Ironmongers' Federated Association, have already done yeoman service in redressing many of the local, as well as the more generally felt grievances of the trade. The London Branch, but recently formed, is growing, and although the metropolis of Great Britain is so large and its suburbs so scattered, it is hoped it will be the means of bringing together in a bond of friendship the Hardwaremen of the locality. The latest development of the movement in this country is the effort now being made to form county associations. Lancashire and Yorkshire are first in the field to inaugurate this scheme of progress. When these are in full working order they will be more on the pattern of the American associations, which are more comprehensive and cover a much wider field of enterprise than anything yet attempted here.

Another step in the advancement of the British Hardware association movement has been made by the proposal of Councillor Wilson, a member of the Manchester Association, for the adoption of a badge such as can be accepted by every iron-monger's association in this country. This is following in the steps of American associations, many of which, like the Ohio Hardware Association, whose ensign is a padlock, adopt a distinctive badge. It is thought such an emblem would enable buyers to obtain the full benefit of association membership.

We hear a great deal about "American invasion," and undoubtedly there is a friendly commercial invasion going on at the present time. Not only are manufacturers from the United States, but from Canada, finding this little islandthe home of John Bull—a fair market in which to push their export trade. There are two reasons why these makers are more successful than formerly. They now realize that implements and machinery of American design will not do for this country, and have learned that by studying the conditions under which these machines are operated they can adapt their patterns to the requirements of English farmers, engineers and mechanics. This being done, the users readily appreciate the value of any superior implement, and quickly grasp where its advantages lie. The other reason why American goods are becoming popular is that owing to the scarcity of farm labor, the higher rates of mechanics' wages and the difficulties of obtaining good domestic help, labor-saving contrivances of every type find a ready sale. It is needless to add that the products of American factories and the goods placed upon the market by representatives of such firms on this side. are essentially of that character.

Catch phrases and little stories, although perhaps containing nothing but well known historical facts, often make the most effective advertising. An English firm appear to have found this out. They have hit on a "good thing" in calling attention to the mistake of the old Romans in believing, when they reached the Pillars of Hercules, there was "nothing beyond." It was a blunder rectified many centuries later, when Columbus discovered America. "Ne Plus Ultra" is a bad motto for a commercial nation or an individual trader to adopt. It is not possible to reach the end of cemmercial development, and there is always a "beyond" for every nation. The success of traders will, to a large extent, be in proportion to the largeness of their understanding this rule of progress. The possibilities of the "beyond" are wide and far-reaching, and many American manufacturers are in the van. Not satisfied with the breadth and length of their own country, they realize the "beyond" in Great Britain and its teeming colonies, and their friendly invasion is indicative of their real national life.

The visit of the Prince of Wales to Avonmouth to cut the first sod of the new docks for the port of Bristol is an event interesting to Americans. The ancient city of Bristol has long been content to rest in the memories of the past glories of its merchants of Elizabethan days. The steps now being taken should give new life to the city, and it is hoped that its new dock will enable its manufacturers to be brought into quick communication with America, Australia and other of the great markets of the world.

Some efforts are now being made in Trinidad to establish an oil industry. The existence of the great Pitch Lake is sufficient indication that mineral oil must exist, if it can be properly located and worked. There is, therefore, a possibility of the West Indies becoming a competitor in the supply of petroleum oil, now so largely drawn from the United States. A discovery of petroleum gas at Heathfield, Sussex, was reported a short time since. Some further investigations point to the probability of a lake of oil lying beneath this picturesque English county. It is stated that an American company, with which the name of Pierpont Morgan is associated, is about to promote the industry. Rumors come from Hamburg that Dr. Karl Tietz has invented a new fluid which, when mixed with water, resembles petroleum, and can be used for burning purposes as such.

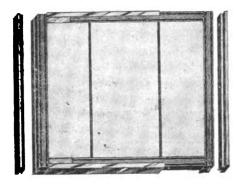

A record output of iron was recently made from the new American furnace put up at Askam-in-Furness by the Millom & Askam Hematite Iron Co. It is stated that no less than $305\frac{1}{2}$ tons of high class Bessemer iron was made from low grade ores.

A movement is on foot for organizing a British and Colonial Exhibition at Cape Town. This is likely to be strongly supported in this country, and will form an exceptionally good opportunity for British makers to introduce their goods into the South African colonies. The promoters intend contining the exhibits to the products of British and Colonial manufacturers. There is abundant evidence that the establishment of peace in South Africa will be the signal for German and American merchants flooding the country with their wares; naturally British traders will want to secure the lion's share of the plunder.

The proposed American Exhibition at the Crystal Palace (London) will give an impetus to the sale of American goods and machinery. The exhibition will be opened in May, and will remain open until September. I hope to have something more to tell your readers about this interesting commercial enterprise in a future letter. Suffice it to say that the grand old palace of glass will be filled with the choicest productions of the nation which is strong and vigorous and possesses an unrivalled wealth of commercial energy and inventive genius.

"Twentieth Century" Adjustable Sliding Window Screen.

We illustrate herewith the Twentieth Century Adjustable Sliding Window Screen manufactured by the A. J. Phillips Co., Fenton, Mich., and for whom F. P. Wilkinson, 90 West Broadway, New York, is the sales agent. It will be noticed the general construction is similar to the company's adjustable window screen known as the "Flyer," in which two frames slide upon each other, and thus secure an adjustment fitting the window in width. The frames are made of beech wood, oiled, and the steel bindings on the edges of the wire cloth and the metal cap on the top and bottom of the screen are painted the same color, usually green. In the "Flyer" Window Screen and in all the other adjustable screens, the only attempt is to produce a screen which can be spread under

SOTH CENTURY WINDOW SCREEN

the lower sash of the window. The "Twentieth Century" Screen, while adjustable in width, is arranged to slide up and down on dove-tailed slide-sticks, which the customer nails to the casings. The screen may be used either inside the window or outside, preferably inside. The sash is thus permitted to slide past the screen and to be raised to any desirable height. It will be noted that the construction of the screen is such that either side of it presents a straight line entirely across the screen so that it is entirely fly tight. When the screen is used outside the sash, the slide-sticks are nailed to the outside stops. It will be seen that the screen may be raised and lowered whenever desired and that, whether left inside or outside, it is always in place.

Recent Publications of the Trade.

GOSHEN MFG. Co., Goshen, Ind., are distributing an eightpage leaflet which illustrates and describes the Hercules Hay Slings and Hay Carriers manufactured by them, showing the various operations by which their utility has been firmly established, and the numerous parts in connection therewith specially numbered and described, by which they may be ordered if wanted. A very interesting leaflet that cannot be otherwise than acceptable to the Hardware dealer. This company also manufactures a number of styles of Lawn Swings which are illustrated in an attractive catalogue published by them, showing them in actual use by the aid of half-tone cuts that are very well engraved. The illustrations show the Goshen Four-Passenger Lawn Swing, and also the same style calculated for two passengers. They also show the Jumbo Lawn Swing used as a hammock, and also with awning; also the Daisy Two-Passenger Lawn Swing and the same arranged for four passengers. A number of other illustrations are given showing the various uses to which these Swings may be applied, from usefulness on the porch to the advantages of having them part and parcel of a picnic party. It is a very cleverly constructed catalogue, that should be apt to make sales. The principle is also applied for home use to Baby Swings. They are also manufacturers of Folding Lawn Seats, Camp Chairs and Camp Stools. The Hardware dealer will find the catalogue one that will interest him.

SARGENT & Co., New Haven, Conn., and New York, are distributing their handsome catalogue of Wire Screen Hardware and other Spring and Summer goods for 1902, dated March 1, 1902. This is one of the most attractive catalogues of the kind that has come to our notice, containing in one pamphlet of the same size as their regular catalogue and consisting of 80 pages, all the various articles that are enumerated in the large catalogue applying to Spring sales for Wire Screens and goods of this seasonable character. Included in the contents will be found about everything that the dealer could possibly need for the purpose; in addition thereto, a number of other salable lines of Hardware adapted for the season-too large a number of titles to successfully enumerate, and dealers having not already received this compendium of salable goods should write for the same at once. Nothing more worthy of their acceptance could be obtained. Included in the contents will be found such goods as Screen Hardware of every description, Coil Door Springs, Spring Hinges, Square and Neck Bolts, Chain Bolts, Door Pulls in large variety, Shutter Knobs, Surface and Flush Sash Lifts, Door Holders, Door Stops, Hammock Hooks, etc.

SYRACUSE CHILLED PLOW Co., Syracuse, N. Y. Catalogue No. 10 of Wood and Steel Wheelbarrows, Contractors' Plows, Steel Sewer Buckets, Drag, Road and Wheel Scrapers, Charging Barrows, Steel Skips, Push Carts and Store and Warehouse. Railroad and Wharf, Grocery and Baggage Trucks. The principal new tool that is illustrated in this catalogue is their Wheel Scraper, as shown on pages 32 to 35. This Scraper embodies several new and very important features that appeal to every contractor. It is simple in construction, and having been thoroughly tested, is found to be sufficiently strong and durable for the work for which it is intended. This is a pamphlet catalogue of 54 pages, printed in colors on fine coated paper, handsomely engraved throughout, with a full description of the various articles referred to, with list prices, etc., etc. The company manufactures a large line of the goods referred to above, and the various illustrations throughout the catalogue indicate the mode of construction. the style of goods and the general utility of the entire line. It is as complete a catalogue of the goods referred to as has come to our notice. Included in its contents are the wellknown Syracuse Hand Carts, which are made in a number of varieties. The company also manufacture Baggage and Express Wagons. Dimensions are given in every instance on Wheelbarrows, the capacity of each barrow, size of tray, size of wheels, the weight and the list price, and this method is carried out throughout the catalogue, giving evidence of great care in compiling, and a natural desire to have all the information that the dealer would be apt to seek. It is certainly a useful and desirable catalogue of the goods exploited.

RECENT TRADE PUBLICATIONS.

BISSELL CARPET SWEEPER Co., Grand Rapids, Mich., and New York. Oblong pamphlet catalogue printed on coated paper, finely illustrated throughout with their entire product, with elegant half-tone cuts in color showing their line of "Cyco" Bearing Carpet Sweepers, together with the other various styles with which the name of this concern has long been identified. It includes in its entirety the "American Queen," "Boudoir," "Ideal," "Premier," "Gold Medal," "Prize," "Welcome," "Superior," "Grand Rapids," etc. It also includes in its assortment the larger size Sweepers manufactured by this company, such as the "Grand," the "Club," and the "Hall," designed for sweeping large residences, halls. churches, lodge rooms, etc. One of the latest in the Carpet Sweeper line is Bissell's "Improved Misses'" Sweeper, which is also represented; Bissell's Toy Carpet Sweepers, including the "Little Daisy," "Baby," "Child's," "Little Beauty," "Little Queen" and "Little Jewel." They also show the "Three Sweeper Easel," which is made of oak and finished in antique, displaying three Sweepers and requiring a floor space of only 20 inches square. This is furnished gratis with an order of one-half dozen or more high-grade Bissell Sweepers. Other methods of displaying Sweepers are shown, suitable for show windows or counters, among which may be mentioned Bissell's Display Shield, Bissell's "Six Sweeper Easel" and Bissell's "Ten Sweeper Easel." Another very handsome appliance for the same purpose is Bissell's "Grille Easel." These various appliances, now so fully adopted by the trade generally, have resulted in quadrupling the sales made under other auspices by the Hardware stores handling these goods, and they are well worthy of consideration, and the catalogue should be sent for by dealers making a specialty of this attractive line.

CHARLES MORRILL, 277 Broadway, New York, has issued a catalogue booklet having reference to the Pearson "Cyclone" Spike Puller, which is the invention of a practical railroad man, and is the outcome of a universal demand for a tool of this character, it being intended for general railroad work. but is the most suitable tool imaginable for drawing railroad spikes, that may be placed between guard rails, switches or on bridges, trestles, embankments or any other place where the operator has but a limited space in which to do work with a very insecure footing. The use of this tool makes all these objectionable features present less importance. Only one operator being required, his strength alone can be used to a large extent to do the work. The puller, which weighs about 30 pounds, consists of a cast steel frame 23 inches in height, into the top of which is screwed a 11/8-inch tube 28 inches long, making the total height of the tool 51 inches. On the lower end of the rod is attached the spike gripping apparatus. which consists of a pair of Swedish steel jaws made to work on the toggle-joint principle. The leverage is so adjusted that for every 100 pounds pressure exerted on the handle a lifting force of over 372 tons is obtained. The booklet under review is handsomely illustrated, with large size half-tones, full page illustrations, showing the various uses to which this important tool may be applied, and showing the same in a manner exceedingly graphic that may be readily understood and followed implicitly in the use of the machine. There has been a decided want for a tool of this character. Included in the contents of this booklet will be found also an illustration of the Car Sealer Manufactured by Chas. Morrill, sometimes known as a lead seal press. These presses are used by express companies as shippers of sealed merchandise, and are made of semi-steel and provided with an adjustable die.

R. R. Montgomery & Co., Decatur, Ill. Envelope booklet of the "King" Fly Killer, a patented article that kills flies without crushing, an illustration of which may be found in their advertisement on another page in this issue of *Hardware*. The booklet is devoted to the description and enumeration of the various kinds of flies that infest certain localities, and the advantages of being in possession of one of the "King" Fly Killers when any of these annoyances are within reach. A number of testimonials from different parts of the country, showing the selling merits of the Fly Killer, are also included, which would indicate that they were trade winners wherever introduced.

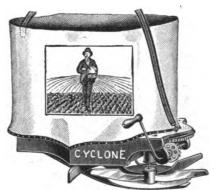

VANDERGRIFT Mfg. Co., Jamestown, N. Y. 24-page catalogue of the Hand Washing Machines which form the principal product of this company, which includes in its contents full descriptions and illustrations of the new Vandergrift Rotary Washer, both round and square, the improved Pan-American and Vandergrift Washers, the Western, the Defender, American, Union and Challenge, all of which are made by this company. They embody in their construction about all the possible improvements a machine of this character needs to make a complete equipment. A number of the Washers are equipped with Blackstone's improved bottom, which insures against warping, and thereby prevents leaking, a cross-piece being embodied in the construction of them that is one inch in thickness, dovetailed into the bottom, and holds the same perfectly rigid. The manufacturers state that in shipping for export, their machines, both round and square, are boxed two machines in a case, each case measuring about 13 cubic feet. They are enabled by this method of packing to place all the gearing on the inside. Illustrations are given of all the various parts that form the complete whole, each of them properly numbered so that repairs may be ordered without difficulty. The catalogue has an attractive cover that will assist materially in its local distribution.

SUPPLEE HARDWARE Co., Philadelphia, Pa. 1902 Spring catalogue of Sporting Goods. which includes in its contents a full description and illustration, with prices, etc., of Guns, Rifles, Revolvers, Ammunition, Hunters' Clothing, Tennis, Gymnasium and Base Ball Goods, Croquet, Bicycles and Sundries of every description. This catalogue is of large catalogue size, of 114 pages in volume, and designed more especially for the stimulation of mail orders. From the contents of the catalogue such orders may be readily prepared. The articles referred to in the enumeration above are handsomely illustrated throughout with wood cuts, very few, if any, halftones being employed, and just enough descriptive matter to make a prompt selection of the goods required. A large variety of Dog Collars is shown in connection with the other goods enumerated; also Fishing Tackle and Anglers' material, which covers quite a number of pages. the most complete catalogues of the goods embraced in its contents that one would expect to receive from a jobbing house making a specialty of responding to mail orders. The company state in connection therewith that, handling as they do the most salable articles in their particular line, they wish to impress upon their customers, present and prospective, that all correspondence referring to the same will be promptly answered, and to that end correspondence is invited. are sole agents for the U.S. Arms Co.'s Double-Barrel Breech-Loading Shotguns. These guns are recommended to both merchant and user in every respect, and as they are placed on the market at a low price in comparison to other American guns, or the best imported Belgian guns, they ask the trade for some attention to be paid to this particular line, which is worthy of the attention of every Hardware dealer handling sporting goods of this character.

NEW GOODS AND SPECIALTIES.

"Cyclone" Seed Sower.

Champion Seeder Co., Urbana, Ind., are the manufacturers of the Cyclone Seed Sower, an illustration of which we give herewith, which is a hand broadcast seed sower that has already become exceedingly popular in nearly every State and Territory in the Union. The machine weighs less than four pounds, and yet is exceedingly strong and durable. It is very simple in construction, yet in distribution of seed it is claimed that one man with this machine can do more and better work than four men by any other method. The castings used in its construction are of the best quality of grey iron, the wood principally of seasoned poplar, and the sack, of heavy, ten-ounce duck. The machine is made attractive for marketing purposes by being painted two coats of bright vermillion. It is provided with a number of mechanical devices that are claimed by the manufacturers to give evidence of its superiority. The machine is framed together in a manner that gives it strength, with no chance of warping, as is the case with a single board. It has a slope feed board which keeps the seed run together in a small hopper on the feed where it belongs. It has an arch cut out of the side so

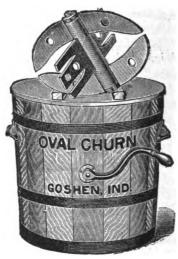

"CYCLONE" SEED SOWER.

that the machine fits easily and closely to the body, and hangs evenly. It has a crank shaft above the distributing wheel, which is a point of convenience to the operator, avoiding seed being continuously thrown against the hand. It has a vibrate feed agitating seed from the bottom. It has a distributing wheel eleven inches in diameter, with an eightinch disk, cut and pressed out of a single piece of tin. It has a spring set catch which comes naturally where the left hand rests. By this device, the seed can be let on or shut off in an instant, avoiding loss. The hopper or sack is large enough to hold about three pecks, and the duck used is heavier than is often used for tents. All these points are worth studying, and the knowledge of them assist in its popular sale.

Improved Oval Churn.

The Goshen Churn and Ladder Co., Goshen, Ind., are the manufacturers of the Improved Oval Churn which we illustrate in this article. The Churn is already popular in the trade wherever it has been introduced, but this season several improvements of importance have been made, making it desirable to call attention to the fact. The staves are made of the very best white ash lumber, thoroughly kilndried, and the churn is very substantial, well finished and made for service, every care being taken to use the best materials with a certainty of lasting qualities under the circumstances. The castings are so constructed as to have scarcely any friction, and to avoid rust are well galvanized. It is so arranged that the dasher can be taken out without

the necessity of removing any of the castings. It is practically noiseless as it has no gearing, and this facilitates the running qualities, making it require but little labor. The manufacturers call attention to the fact that different from

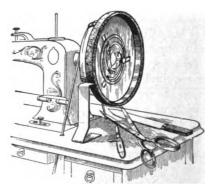

IMPROVED OVAL CHURN.

similar articles now on the market, it is not encumbered with legs, and if deemed desirable it can be placed on a chair, table, bench, etc., when churning. It is manufactured in five sizes: 4, 6, 8, 10 and 12 gallons, the list prices of which are respectively \$3.75, \$4, \$4.25, \$4.50, and \$5. This company also make a large line of Step Ladders and Single Ladders. Included in the assortment are also Windlass Extension Ladders, 20 to 48 feet long, information regarding which will be promptly furnished upon request.

The Home Sharpener.

Bullock Mfg. Co., 56 Fifth Avenue, Chicago, Ill., among the numerous specialties controlled by them which they are placing on the market, are distributing through the Hardware and Housefurnishing Goods Trade the Home Sharpener, an illustration of which we present herewith. The Home Sharpener is a corundum wheel for attaching to

THE HOME SHARPENER.

the fly wheel of sewing machines by the aid of which knives and scissors and other similar tools for household use may be sharpened. As may be readily seen in the illustration, it may be attached in a moment or so, and the articles referred to sharpened in an extremely quick and easy manner. The body of the wheel is made from cold-rolled steel and heavily nickel-plated. The grinding band is made of the finest corundum, molded and baked, each band being \(\frac{5}{8} \) of an inch wide. They are distributed to the trade, each wheel packed in a strong, neat box, with illustrations and instructions for

using. Sample wheel will be sent to any dealer by express, prepaid, on receipt of 75 cents. In lots of one dozen or over, they are sold to the trade at \$6 per dozen, f. o. b. Chicago. In order to assist in the introduction of this novelty, one wheel is given free with every order of three dozen when cash accompanies the order.

The Dime Screen Door Check.

The Caldwell Mfg. Co., Rochester, N. Y., are placing before the Hardware trade a Screen Door Check destined to

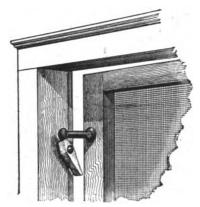

FIG. NO. 1.

become popular. Fig. 1 illustrates the closing door bringing the plunger on the door in contact with the top of the rubber bumper, throwing it up to position as in Fig. 2. The door

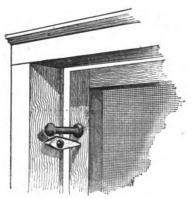

FIG. NO. 2.

rebounds from the concussion and the bumper drops by gravity to the position shown in Fig. 3, allowing the door to close. The bumper is of molded rubber, tapered to give the greatest amount of spring. It checks the door 3 inches

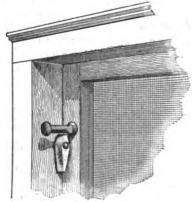

FIG. NO. 3.

from the closing point. The plunger is of japanned iron, and a round head blued screw for the bumper is supplied. The outfit is put up with a card of directions exactly locating screw holes for both right and left hand doors. It is explained that the operation does not depend upon the momentum of the door, and that the device will always prevent the slamming of a screen door, whether the door is opened wide or partially. The checks are packed in attractive display boxes.

Volcano Chimney Top.

Iwan Bros., Streator, Ill., are placing upon the market through the Hardware and Stove trade the Volcano Revolving and Ventilating Chimney Top, of which we give an illustration. The improvements in this chimney cowl consist

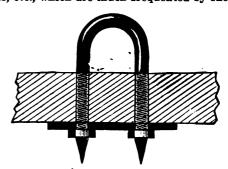

VOLCANO CHIMNEY TOP.

in the iron mountings being composed of two pieces only, requiring no pins or wire to hold the cap down. The hood, as will be noticed by the illustration, is made on mechanical principles, having a deflector corresponding with the hood, by which is formed the sloped opening in the back, as shown in the cut. The hood thus made in connection with the deflector, fully protects the chimney from rain, sleet and snow, and currents of wind cannot be drawn into it by the usual suction. On the contrary, when the wind passes through the sloped passage of the hood, it is calculated to create a strong upward draft, thus allowing full passage of all smoke. This feature is claimed to be unique with this chimney top.

Schall's Safety Screw Staple.

Frederick Pfeisfer, 88 Chambers Street, New York, is the sole selling agent for Schall's Safety Screw Staple, of which we give an illustration. The feature of this staple is that it can be driven into or through a board, and quickly secured on the inner side by means of a rectangular slotted counter plate and two threaded nuts. It is especially recommended for store rooms, coal bins and similar places in apartments, slat houses, etc., which are much frequented by sneak thieves,

SCHALL'S SAFETY SCREW STAPLE.

who with a jimmy quickly and noiselessly withdraw the usual staple even when clinched. The sharpened points, if so desired, can be as quickly protected by forcing a piece of soft wood over them, holding it in position by driving a nail in the centre of the piece through the slotted counter plate. The exact outer dimensions of the staple are $2\frac{1}{2} \times 1\frac{1}{8} \times 3$ -16 inches. The wrought iron counter plate is $2\frac{1}{2} \times 5\frac{1}{8}$ inches outside, with a rectangular slot or opening $1\frac{3}{8} \times \frac{1}{4}$ inch, through which the sharpened legs of the staple pass.

REVIEW OF THE MARKETS.

Wr Regular shipments are again possible at the mills, the embarrassment caused by transportation difficulties having been lessened materially, and the manufacturing facilities are now in a much more normal condition, to catch up if possible on the back orders that have accumulated. The demand continues excellent. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots.	\$2 05
To jobbers in carload lots. To jobbers in less than carload lots	2.10
To retailers in carload lots	2.10
To retailers in less than carload lots	2.20

New York. The assortment to draw from has not been as complete as usual, owing to insufficient supplies from the mills. The market is firm, however, and the following are the present quotations: Small lots from store, \$2.25 to \$2.30; carloads on dock, \$2.20.

Cut Nails: The Cut Nail market has been handicapped by insufficient supplies of raw material in the shape of steel plates. The demand, however, is a fairly good one in about the usual proportion as its principal competitor. Quotations are as follows, f.o.b. Pittsburgh, plus the actual freight to point of destination, terms 60 days, or 2 per cent. off in 10 days:

Carload l	ots		 	 	 .\$2.00
Less than	carload	lots.	 	 	 . 2.05

New York. The following quotations are the prevailing ones in the local market:

Carload lots on dock\$2	.13
Less than carload lots on dock	
Small lots from store	.30

Barb Wire: A very heavy demand continues to be the feature in the market on this important staple, the supply of which will, it is indicated, prove more or less of a shortage if demand continues as at present. Quotations are as follows:

To jobbers in	n carload lots, Painted	.\$2.60
44	" Galvanized	
44	less than carload lots, Painted	2.65
"	" Galvanized .	2.95
To retailers	in carload lots, Painted	2.70
**	" Galvanized	. 8.00
**	less than carload lots, Painted	. 2.80
44	ti Colmonicad	

Ellwood & Baker Wise is 5 cents, and Washburn & Moen Glidden is 10 cents per 100 pounds higher than the prices above named.

Plais Wire: Promptness in delivery of Plain Wire is hardly expected under the present demand, although the mills are running to their utmost capacity. Transportation facilities impede deliveries considerably. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

Pian.	Gaiv.
To jobbers in carload lots\$2.00	\$2.85
To jobbers in less than carload lots 2.05	2.40
To retailers in carload lots 2.10	2.45
To retailers in less than carload lots 2.20	2.55

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances, as follows:

6	to 9	Base				 			. \$0.40	extra.
10		\$0.05	advance	over	base	 			40	**
11		10	**	44	**	 			40	**
12	and 121/4	15	**	**	44	 			40	••
13			44	**	44				40	**
14		35	46	**	44			Ĺ	40	44
15			44	44	**				75	**
16		55	**	44						**
17			66	44	44			_	. 1.00	44
ĪŘ			66	**					. 100	44

For even weight bundles, 50 pounds and over, 5 cents per bundle advance on above.

Shovels and Spades: An advance on the list prices of \$1.50 per dozen was a matter of considerable comment by the

trade generally, for even at the 40 per cent. discount at which this line is sold to the retail trade, the net advance is a marked one. The list of the Maynard pattern and Bear goods has been advanced 50 cents per dozen. Orders at the factories have been unusually good, and as the advance doesn't go into effect until April 1, orders have been stimulated, and many are being rushed forward to save the difference in cost. The terms and discounts to the various classes of trade and rebates allowed have not been changed, and remain as heretofore.

Nats: On the 18th inst. an advance was made by the manufacturers in the prices of Cold Punched and Hot Pressed Nuts. Present printed prices are as follows:

		Het.
Cold Punched Plain Blank Square Nuts	1	\$4.70
Cold Punched Plain Blank Hexagon Nuts		
C. T. & R. Blank Square Nuts		4 90
C. T. & R. Blank Hexagon Nuts		5 30
Cold Punched Plain Tapped Square Nuts		4.50
Cold Punched Plain Tapped Hexagon Nuts		4.70
C. T. & R. Tapped Square Nuts		4.70
C. T. & R. Tapped Hexagon Nuts		5.10
Hot Pressed Nuts, Square Blank		5.00
Hot Pressed Nuts, Hexagon Blank		5.80
Hot Pressed Nuts, Square Tapped		4.80
Hot Pressed Nuts, Hexagon Tapped		5.10
The Tieberr times Transfer Tabler		

This advance, it is stated, has been made on account of the advance in the price of iron.

Biader Twine: As the Hemp market continues its high quotations, no change is noted in those for Binder Twine, which remain as follows, subject to ¼ cent per pound rebate when purchased in carload lots:

	T CT	pound.
Sisal	11	cents.
Standard	11	cents.
Diametric	101/	conte
Manila	10.7	, cente.
Pure Manila	14%	, cents.

Cordage: The market for Sisal and Manila Hemp continues firm, with no indication of immediate weakness. The quotations which we give below still represent the market:

	Cents.
Manila, 7-16 inch and larger	181
% inch	14
1/4 inch and 5-16	14 1/2
Sisal, 7-16 inch and larger	
% inch	10%
inch and 5-16 inch	11
Lath Yarn, medium and coarse	814
Jute Rope, No. 1	61/2
No. 2	

Linsced Oil: The following quotations are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels......64 cents per gallon. In lots of 5 barrels or more......68 cents per gallon.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw. Calcutta Oil, 85 cents per gallon.

THE ALBANY TRADE.

Both Winter and Spring have of late been contending for supremacy. The result—the breaking up of the ice-bound streams by the rain and the melting snow, the freshets and inundations causing untold misery and damage; following all this, a cold spell checking the floods, alternating a renewal of mildness and more boating in the public streets. When this ends and conditions become normal, Spring trade will continue with a rush. Everything points to an excellent demand for goods. The trouble will be to supply the wants of customers. The warnings being sent out by some leading manufacturers of the scarcity of stocks and consequent delays in filling orders, suggest the belief that full market rates will be obtained for goods. Margin of profit, however, still remains small, so many being open for business on the basis of Jakey Einstein's employers, who wrote him daily, "What we want is orders." "Cash in hand" always commands low

prices to the buyer, and goods in hand ready to ship ought also to favor the seller. Not only how low you sell, but how soon can you ship, customers are asking thus early in the season, and indications are that this will certainly be the theme for quite a period. The consolidation of manufacturers is being better understood by practical experience. The filling of small orders direct from the large mills is slow work and is not practicable, and the tendency to draw business of this kind to the stock-carrying jobbers is very noticeable. A very few leading articles are still selling at low prices, and the sagging continues, notwithstanding the higher cost of raw material entering into their manufacture. Will the fight continue, or will this competition eventually be remedied by further consolidations? Collections, usually slow at this period of the year, are keeping up the record, but after "Tax Day" (April 1st) in the country, an improvement will doubtless commence.

ALBANY HARDWARE AND IRON Co.

THE CHICAGO TRADE.

It affords us pleasure to state that we are busier than ever; in fact, since our last writing, have been so pushed with orders that it is hard work for us to keep up and make our usual prompt shipments. The Spring trade is certainly starting in good and early, and we see no reason why we should not expect it to continue. The markets in general are very firm, and while there have been but a few advances, and those very slight, yet we learn that we may look for some in the near future, particularly on one very staple line, on which the advance will also be quite a large one.

Wells & Nellegar Co.

THE CLEVELAND TRADE.

Prince Henry's visit to this country awakens reflection upon the benefits we have received from the people he represents. The real worth of the German emigration to our population and the uplift of German scholarship. The fear that once prevailed of German rationalism has terminated in admiration for their courageous recognition of the rights of the human mind. They made a declaration of mental independence that did much to enfranchise and free us from superstition, when confidence in the intellect was greatly needed to save us from loss of intellectual integrity. This influence upon the founders of our Government advanced human progress a thousand years. Every avenue of life, not excepting theology (which is last to be influenced), has felt the benefit of its uplift. "New theology" and "higher criticism" are among its results. German thinkers like Lessing made a pathway through the wilderness of superstition, and made life broader, freer, sweeter and lighter. We honor ourselves by honoring the representative of such a nation. Our commercial competition in the future is to be with Germany, but we are beginning to learn that competitors need not be enemies. We are learning this in our domestic trade through organization.

The National Hardware Association has done much to alleviate the evils of competition by insisting that the rights of manufacturers, jobbers and retailers be alike respected, believing that the consumer can be best served in this way. If the few jobbers who refuse to co-operate are actuated by what they conceive to be personal interest, they are mistaken, for injury to the retailer is injury to their customers, upon whom they depend for prosperity. February beats the high record of 1901, fulfilling all expectations for the beginning of another prosperous year. There is an entire absence of speculation in mercantile business. The tendency to the commercial spirit that is feared by the good people, seems to strengthen rather than to destroy the desire to be of service. The aid that brain has rendered muscle is the measure of human progress. It has released labor of drudgery by adopting new machinery and new methods. It is doing the world's

work and making life more worth living. The magnificent management of our business enterprises is the admiration of the world. We have learned that success depends upon the service rendered, so that the large brains are being utilizd for public benefit. The commercial spirit has made England, Germany and this country great, and is doing for Japan splendid service. It is the most potent instrument for promoting civilization, and need not be feared.

THE LOCKWOOD-TAYLOR HARDWARE Co.,

THE COLUMBUS TRADE.

We certainly thought the winter was over, but St. Patrick's Day, or some other force, brought us very near zero weather. There is nothing new to report on the business situation so far as trade is concerned. We can truthfully say that it is good, but we are already experiencing trouble in getting goods. It is surprising the reasons that are given for not filling orders. In most of the cases it is on account of some material that goes into the article to be made. From other sources, high water or labor trouble causes delay, and then when goods are ready for shipment they can't get cars. It does not look very much like an over-production in 1902. Labor troubles are beginning to cause uneasiness. When work is plenty and workmen are getting a top-notch price, they seem to think it a good time to hold up manufacturers. We believe in good wages, but we must say that in many instances their demands seem unjust and unreasonable. Labor organizations are opposed to combinations, but theirs was about the first; and no one can deny that it is the most arbitrary in existence. But time rights all things, and we will hope that it will right the strife between capital and labor. They should be close friends, as neither can get along with-THE SMITH BROS. HARDWARE CO. out the other.

THE PITTSBURGH TRADE.

Retail State Associations have been much in evidence lately, and Pennsylvania is to have her turn in a convention to be held in Pittsburgh, March 26. These associations emphasize very strongly their belief that goods should be distributed from maker to consumer through the hands of the merchant who carries a stock in the place of distribution as against the idea of the maker going directly to the consumer, or distributing from catalogue houses. We believe this is the correct, and all things considered, the most economical method of distribution.

We go further and believe the jobber is necessary to gather the great variety of goods needed, to carry them in his warehouse, and distribute to the retailer in quantities required.

If both retailer and jobber can be fully waked up to the fact that it is absolutely necessary for them to stand shoulder to shoulder in defense of this method of distribution of goods through the regular channels, the work of the associations

STANLEY RULE & LEVEL CO.

NEW BRITAIN, CONN., U. S. A.

Improved Carpenters' Tools.

will be of great value. United action by so great a body as this will have a hearing from the manufacturers and greatly improve the Hardware business.

LOGAN-GREGG HARDWARE Co.

THE PHILADELPHIA TRADE.

At last, after a late Winter, Spring seems to be making his bow to the public, and orders for Spring goods are coming in so rapidly that stocks are already low, and on some styles of goods it is impossible to satisfy all demands, even although, anticipating the situation, jobbers have placed Spring orders considerably in excess of ordinary needs. There seems to be no prospect of improvement in this regard, and it is quite likely there will be considerable difficulty in filling orders as the season advances, and this is true not only of Spring goods, but of other leading lines, as the demand from all sides seems to continue unabated, and these seems to be entire confidence in the market, which certainly shows a growing sign of strength.

The present week has seen another advance in machine bolts, coach screws, common carriage bolts, and many lines appear to have stiffened considerably in price, while the consolidations in prospect, or already effected, are likely to cause still further advances in prices.

We are happy to say, however, that in the new consolidations the tendency does not seem to point towards a radical advance in prices; on the contrary, it is recognized that the interests of the trade and of the manufacturers at large are better served by a moderate advance and one which is justified by higher wages paid, and by the increase in costs and the scarcity of raw material.

There is considerable complaint among manufacturers that, even at the advanced prices charged by them last year, there was not sufficient profit in the year's work, owing to the fact that both labor and raw material had advanced so greatly, and if such are the facts, a moderate increase seems justifiable. At all events, the tendency seems to be undoubtedly in that direction.

BIDDLE HARDWARE Co.

TO SUPERSEDE EMERY

CRAIG MINE

CRYSTAL CORUNDUM

Why buy iron ore for abrasive purposes? Emery is 70 per cent. oxide of iron, combined alumina, etc., and only 30 per cent. corundum. Try it with a magnet and see for yourself. The 70 per cent. rubs and burns, only the 30 per cent. (the corundum) cuts and polishes. Craig Mine Crystal Corundum is 98 per cent. pure. The 98 per cent. cuts and polishes.

WHAT CONSUMERS SAY ABOUT IT.

THE PRESCOTT EMERY WHEEL CO., Prescott, Ontario.—"In reference to your Craig Mine Crystal Corundum, we take pleasure in saying we have used it extensively for the last year and exclusively for half this time. In our experience we consider it an abrasive that is unequalled. We believe that your article will rapidly take the place of emery."

THOMAS ARCHER, 314 East 22nd St., New York City.—"In reference to the Craig Mine Crystal Corundum, I do honestly pronounce it the best and most effective abrasive that I have ever used. My line of work consists of an endless amount of glass reaming, and I have been using almost every kind of abrasive,—sand, pure Turkish emery, carborundum, etc..—but have never been able to obtain as speedy or satisfactory results with either of the above, as with Craig Mine Crystal Corundum. I truthfully assert that in my line of work it gives fully five times quicker and better results than any abrasive I have ever used before, and I take pleasure in recommending it to the trade."

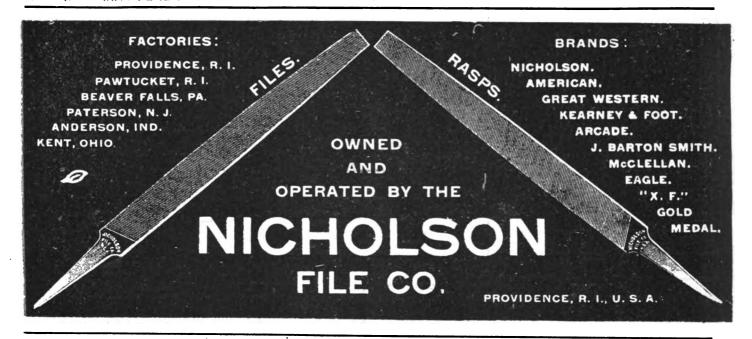

THE DETERMENT WHERE CO. Detects the content of the

THE DETROIT EMERY WHEEL CO., Detroit, Mich.—"We are in receipt of your recent favor asking how we like the car of Craig Mine Crystal Corundum bought of you. The enclosed order for two more car loads is probably the most satisfactory answer we can give you."

Digitized by Google

THE MINNEAPOLIS TRADE.

Business has opened up very nicely for this time of the year, with every indication of good volume of business through the season. We are already experiencing some difficulty in getting certain lines of goods and think it will be worse later on. There is a large influx of farmers coming in here constantly. Railroad officials say they never saw such a tide of immigration and it has been continuous all winter. This means lots of business later on. There are prospects of something of a shortage in lumber, in fact logging roads were broken up through a thaw much earlier than usual and a great many logs that would have got in the market were left in the woods and will have to remain there for another winter; therefore there is no prospect of a decline in price of lumber

W. K. Morison & Co.

THE ST. PAUL TRADE.

With an early Spring, business opens up in good shape, orders are getting more and more plentiful every day, and the quantities ordered are larger. We have every reason to expect a good business, and we are now getting it, as for this time of year our sales show a large increase over previous years. Prices are held firm and should be, because of the scarcity which now exists in some lines, and will get worse as the season advances. The man who keeps his stock full of staple goods is very wise. There is no prospect of declines; there is possibility of advances and a sure scarcity.

C. W. HACKETT HARDWARE CO.

THE SAGINAW TRADE.

Since the season of 1902 opened there has not been a dull day experienced in this section. The four weeks of Spring weather we have been enjoying have caused a great demand for Spring goods that are not generally called for until later in the season. This has caused the buyers of our several departments no end of trouble in keeping up stocks. Everything points to an increased business for 1902. The demand for carpenters' tools was never so great as at present. Builders' Hardware and all small miscellaneous Hardware that is classed "shelf goods" has been in great demand. The same trouble that was experienced among jobbers last season bids fair to arise this year, namely, scarcity of goods and slow shipments by manufacturers. Especially is this true on the heavier lines, as already indicated by advices received from the different manufacturers of wire, nails and iron, advising us that it is impossible to make prompt shipments. That this condition of affairs will continue throughout the year we think is inevitable, because, as the year advances the volume of business will increase. MORLEY BROTHERS.

Hardware and Sewing Machines.

The sewing machine has become a part of almost every household throughout the world, and the many Hardware dealers who are now selling them as a side line will, no doubt, be interested in a concern manufacturing needles.

The Shrimpton Mfg. Co., 273 Church Street, New York City, are an exclusive needle house. They import sewing machine needles for all the principal machines in use in the United States, and carry a stock of several millions of needles. Their goods are made in Europe, where the art of needle making has attained perfection through centuries of experience. They carry a line of all sorts of needles for all sorts of purposes, as well as machine needles.

World's Fair Classification Book Shows the Marvelous Activity of the Human Race.

An advance copy of the Classification Book for the Louisiana Purchase Exposition at St. Louis in 1903 has been received. Fifty-three pages are required for a mere enumeration of the groups and classes of exhibits. The exhibits of the entire exposition are divided into fifteen departments as follows: Education, eight groups; art, six groups; liberal arts, thirteen groups; manufactures, thirty-four groups; transportation, six groups; agriculture, twenty-seven groups; horticulture, seven groups; forestry, three groups; mining and metallurgy, five groups; fish and game, five groups; anthropology, four groups; social economy, thirteen groups; physical culture, three groups. The total shows 144 groups and 807 classes, and under each class is a possibility for a multitude of exhibits. Nothing reflects more clearly in so small a space the variety of human occupations or more comprehensively the broad scope of the great exposition which the people of St. Louis are preparing for next year. A place is provided for every conceivable product worthy of exhibition and all nations of the world have been invited to take part. Acceptances have been received from many. The work of construction is progressing earnestly. The buildings will have an aggregate floor space of 200 acres and the grounds a total area of 1,000 acres. The money now available aggregates \$15,000,000, besides \$1,000,000 appropriated by the State of Missouri and various liberal sums from other States. The Classification and the Rules and Regulations of the Exposition will be mailed free on application to the Director of Exhibits, World's Fair, St. Louis.

"Dunn is a good shot, isn't he?" "Very good. We were practicing with our guns at my country place the other day, and he hit the bull's eye the first time." "Very clever," "Yes; but he had to pay for the bull."—Em.

SPALDING

HE Spalding Retailers' Protective Policy will continue on the progressive lines laid out when it was inaugurated, January 1, 1899.

Dealers should remember that:

"The Spalding" line of Athletic Goods is an all-year-round line, with a guarantee profit, backed by a house with a world-wide reputation. Always something selling, and no price-cutting allowed. If there is a dealer who does not know about our goods or understand our policy, we shall be glad to have him write to us for full particulars.

In order to give better service, and facilitate quick delivery of our goods, we have established a number of new distributing offices, beginning with the season of 1902.

For the information of the trade, we give below a list of cities where we maintain houses or distributing offices for our goods.

Spalding's Spring and Smmmer Catalogue for 1902 is now ready and will

be sent to any dealer who asks for it.

The new catalogue is a work of art 88 pages, bound in handsome illuminated cover, contains over 500 illustrations and will be a handy reference guide to any

dealer handling sporting goods. Send at once for one.

Spalding's Official Base Ball Guide for 1902. Larger and more complete than ever. Contains the Official Playing Rules for 1902. Order at once through your news company.

Changes and Improvements.

Alton, Ill.—The Hapgood Plow Co. has started the work of constructing a new iron foundry at its plant to do the casting for the plow works. This is a new departure for the Hapgood plow works, as all casting has been done by contract. The new foundry will employ thirty men, and will work the year round.

Ansonia, Conn.-The Derby Machine and new machinery in its factory. It is the purpose of the company to go into the business of manufacturing novelties, such as toys, etc.

Bristol, Conn.-W. L. Barrett will move his Hardware business from the Root factory building on Main Street to Ira B. Smith's new shop on Parallel Street.

Chicago, Ill.—The Grand Crossing Tack Co. has made plans for the erection of an industrial plant to cost \$500,000 on the east side of the Calumet River, between One Hundred and Eighteenth and One Hundred and Twentieth Streets. Contracts for the new plant have already been let. It is to consist of twelve buildings, containing floor space of 70,000 square feet. There is to be mill for the manufacture of steel billets, and all the accessories. The main building

Hartford, Conn.-Ground has been broken for a factory to be occupied by the Atlantic rated concern is the Newark Handy Tool Screw Works. It will stand on Charter Co. It will manufacture patented tools on Oak Street, and will be 204 feet in length, a capital stock of \$50,000. Incorporators, 55 feet in width and two stories in height. Augustus Dusenberry, John Hausman, Ed- The material selected is brick, and the front

R. Losey, William B. Guild and Adam Ohl, terra cotta work. In addition there is to be an engine and boiler house 32 by 17 feet,

Meyersdale, Pa.—The Tubular Lock Co. of this place has purchased the William Miller Cyclone Dust Collector factory, and will convert the large building into a lock factory for the manufacture of tubular door locks. A 40x50 foot addition is now in course of construction, and will be fitted up with all the latest and most improved facilities for the casting of brass and iron when completed. The company purchased the entire stock of the S. R. Slaymaker Lock Co. at Lancaster, Pa., and have already commenced to ship machinery to this

Embarrassments.

Cincinnati, O.—Spencer M. Jones has been appointed receiver for the Belmer-Eames Tool Co.

Recent Fires.

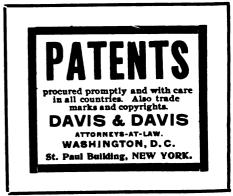

St. Louis, Mo.-The factory of the Benbow-Brammer Washing Machine Co., at 5217 McKissick Avenue, has been burned down, with a loss of \$40,000.

Miscellaneous.

Boston, Mass.—The annual meeting of the stockholders of the Ames Plow Co. has been held at the corporation's office in Quincy Hall. Oliver Ames was a second time chosen president, and Charles J. Whitmore was re-elected treasurer. The old board of directors was retained in office.

Reading, Pa.—The annual meeting of stockholders of the Reading Stove Works was held recently at the office of the company. The election for directors resulted as follows: Edgar Amole, Frank L. Connard, William H. Luden, W. Harry Orr, Jesse Posey, Robert P. Shick and Charles H. Williamson. Upon reorganizing, the board elected W. Harry Orr, president; Edgar Amole, treasurer; and William S. Essick, secretary.

South Norwalk, Conn.—The annual meeting of the stockholders of the Norwalk Lock Co. was held recently, and the old board of directors was re-elected, as follows: E. Hill, John H. Ferris, Augustus F. Beard, W. F. Bishop, A. N. Wildman, Robert H. Swayze and E. Beard.

Sell them what they Want.

It's easy to sell the goods people want. Housekeepers want Sargent's Gem Food Chopper, they call for it, they know it is a great kitchen convenience, they believe it is the best— and it is. We are advertising the Gem liberally; women are being convinced that it is an indispensable kitchen utensil and they want it. You can supply that want and it will be to your advantage to order to-day a stock of Sargent's Gem Food Choppers.

Ware, Mass.—A bicycle repair shop has been opened by the Ware Cycle Co. on North Street.

Changes and Improvements.

Auburn, Me.-The V. S. Darling Bicycle Co. will move, April 1, to 52 Court Street.

Bridgeport, Conn.—The H. Wales Lines Co., of Meriden, will shortly begin work on a big four-story brick addition to the plant of the Union Metallic Cartridge Co. in "the grove" on the north side of Barnum Avenue. The building will be 173 by 50 feet, with a main stairway and toilet room projections, and will have two wings, one 180 by 40 feet and the other 72 by 41 feet. The big addition to the factory has been made necessary by the increase of business. It will cost about \$50,000.

Charlotte, Va.-G. B. Keller has purchased interest of partner in Relay Bicycle

East Alton, Ill.—The Equitable Power Co. is preparing an important addition to its big plant, and will furnish one more big manufacturing institution for Alton. It is planned to begin the manufacture of nitroglycerin and dynamite, also fulminating caps and the metallic shells for cartridges. The addition to the plant will give employment to almost twice as many hands as are now on the pay roll.

Galesburg, Ill.-Walton Mfg. Co. have moved to South Chambers Street.

Grand Rapids, Mich.-W. Smalley Daniels having disposed of his interests, the business of Smalley & Daniels has been taken over by the W. B. Jarvis Co., Ltd.; capital, \$25,000. The new company will be under the management of Mr. Jarvis, who has associated with him C. B. Kelsey, cashier of the People's Savings Bank, as chairman; James Bayne, of the Bayne Photo and Engraving Co., as secretary, and a number of prominent business men and sportsmen of Grand Rapids.

Great Barrington, Mass.-Minkler & Collins, whose bicycle shop was destroyed by the recent fire, have rented a room in the Berkshire Block.

Hartford, Conn.-Charles E. Wood, former superintendent of the Pope Tube Co., and for the last year located at Toledo, O., as manager of Factory D of the Shelby \$1,800, insurance \$1,000. Steel Tube Co., has resigned that position. He will assume the superintendency of the Seamless Steel Tube Co. of Detroit, Mich.

New York, N. Y.—The P-T Motor Co.

at 322 and 324 Seventh Avenue, at the corner of Twenty-eighth Street. A new plant has been installed, consisting of lathes, drill presses and other machine tools, greatly increasing the facilities of the company.

Reading, Pa.—Charles T. Heckler will occupy new building, 222 Penn Street.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher

prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.
